THE BRITISH EMPIRE UNIVERSITIES

MODERN ENGLISH

ILLUSTRATED

DICTIONARY

CONTAINING

COLOURED PLATES, ILLUSTRATIONS IN MONOCHROME, DUOGRAPH CHARTS, MAPS, AND THE CENSUS,

WITH A REFERENCE LIBRARY & TREASURY OF FACTS.

REVISED AND BROUGHT TO ITS PRESENT STATE OF PERFECTION, AFTER THE BEST AND LATEST AUTHORITIES ON LANGUAGE, UNDER THE CHIEF EDITORSHIP OF

EDWARD D. PRICE,

Editor of Hazell's Annual Cyclopædia (1886-91), The Student's Imperial Dictionary (1904), The Pearl Cyclopædia of Universal Information (1892), Haydn's Dictionary of Dates (1904 ed.)

AND

H. THURSTON PECK, PH.D., LITT.D., LL.D.,

WITH THE ABLE ASSISTANCE OF THE FOLLOWING

EDITORIAL CONTRIBUTORS :

PROFESSOR SIR ARTHUR QUILLER-COUCH, King Edward VII. Professor of English Literature in the University of Cambridge.

SIR JAMES YOXALL, M.A., M.P., Secretary of the National Union of Teachers; Editor of "The Schoolmaster."

PROFESSOR ISRAEL GOLLANCZ, M.A., LITT.D., F.B.A., University Professor of English Language and Literature, and Dean of the Faculty of Arts, King's College, London.

PROFESSOR WALTER RIPPMANN, M.A., Chief Inspector of Schools to the University of London.

HENRY R. TEDDER, F.S.A., Secretary and Librarian of the Athenæum.

RITCHIE GIRVAN, M.A., In charge of the Department of English and Teutonic Philology and Lecturer on English Language, University of Glasgow.

MAJOR H. H. WADE, Editor of "The Army Review."

PROFESSOR GEORGE SAINTSBURY, M.A., L.L.D., D.LITT., Professor of Rhetoric and English Literature University of Edinburgh.

PROFESSOR HENRY CECIL KENNEDY WYLD, B.LITT, OXON., Professor of English Language and Philology in the University of Liverpool.

LIEUT.-GENERAL SIR ROBERT BADEN-POWELL, K.C.B., LL.D., F.R.G.S.,

H. J. L. J. MASSÉ, M.A., Wadham College, Oxford University.

FRANK W. DYSON, F.R.S., LL.D., The Astronomer-Royal.

PROFESSOR FOSTER WATSON, M.A. D.LITT., Emeritus Professor of Education in the University College of Wales, Aberystwyth.

A. E. TURNER, B.A., Formerly Major Scholar and Jeston Exhibitioner of Trinity College, Cambridge.

COMMANDER CHARLES N. ROBINSON, R.N., Editor of the "Navy and Army" (1905).

M. S. BIRKETT, of the Census Office.

(Editors of the various Glossaries are shown on a following page).

GLOSSARIES

BY THE FOLLOWING NOTED AUTHORITIES.

Cricket Terms.—LORD HAWKE.

Lawn Tennis Terms. — ANTHONY F. WILDING, World's Champion (1910–1911–1912–1913.)

Football Terms. — Rugby. — J. E. RAPHAEL, Old Oxford "Blue"; English International (1901–1905); Captain of English XV. in the Argentine (1910); Ex-Captain of "Old Merchant Taylors" XV.

Football Terms.—Association.—W. U. TIMMIS, Secretary of the Corinthians Football Club.

Aviation Terms.—CLAUDE GRAHAME WHITE, Holder of the Gordon-Bennett Aviation Championship of the World Trophy.

Golf Terms. — JAMES BRAID, Open Champion (1901–5–6–8–10.)

Motoring Terms.—H. WALTER STANER, Editor of "The Autocar."

Contractions and Abbreviations.—J. A. JOFFE, A.M.

Christian Names of Men and Women. —DONALD CLARK, A.B.

INTRODUCTORY.

In issuing THE BRITISH EMPIRE UNIVERSITIES MODERN ENGLISH DICTIONARY, the publishers have been actuated by the desire to POPULARIZE the use of dictionaries—the fundamental text-books of the English language. An effort has been made to take the dictionary out of the class of dry and practically "dormant" books by making it more than a mere list of words, and letting its great worth as a necessary, *every-day* individual reference book be apparent to every man, woman, and child in the Empire.

The publishers have sought a combination of the knowledge of the great authorities from the principal seats of learning in the Empire, and have endeavoured to produce a new compilation based upon the principles of the best of all previous lexicographers. Every effort has been made to make this publication thoroughly trustworthy and up-to-date, and in every instance only the best and highest authorities have been consulted.

The prefatory matter will be found educational as well as interesting and authoritative, while the Addenda, or "Treasury of Facts," is most complete and valuable, and contains a large amount of useful information such as is usually found only in comprehensive encyclopædias.

The thanks of the publishers are due to those associated with different branches of His Majesty's Government for courtesies extended in making possible in many departments of the book that extreme accuracy which could not otherwise have been obtained.

THE PUBLISHERS.

PREFACE.

A dictionary which seeks to meet a popular demand should be accurate, complete, modern, and convenient.

It should be accurate, for misinformation is worse than no information at all. Sound knowledge is wealth; unsound knowledge is valueless.

Completeness in a condensed dictionary, such as this, requires that it should contain all words of the English language in general use, except those more properly confined to a dictionary of technical terms, and requires also the omission of words which have become obsolete, and words (except those frequently occurring in general conversation and reading) which more strictly belong to dictionaries of foreign languages. This new work seeks to include within its compass all words which are likely to be referred to daily by the business man, the student, and the ordinary reader.

The claim of THE BRITISH EMPIRE UNIVERSITIES MODERN ENGLISH DICTIONARY to being modern and up-to-date is not unreasonable—for it has the benefit of the latest results of the scholarship of the Empire's greatest seats of learning, based on the labours of earlier lexicographers; and, therefore, it probably contains a larger proportion of the most recent words than any dictionary now published.

Convenience has been sought in the size and shape of the book, and in making it possible for the user of the dictionary instantly to discover whatever he is seeking, and to find at the same time the details relating to the subject, such as the spelling and pronunciation of the word, correct plurals, the formation of irregular verbs, the meaning of suffixes and prefixes, the use of synonyms and antonyms, and all the information which a good dictionary is intended to supply.

These and other essential points, it is believed, have been duly observed in the preparation of the present work. The words have been selected both with a view to utility and to general knowledge. The vocabulary is arranged in strictly alphabetical order, making quick reference easy.

According to the best modern usage, the pronunciation of each word is plainly indicated by phonetic spelling.

The definitions, though concise, are sufficiently comprehensive to embrace all the more important distinctions and modern usages, and every effort has been made that these should be accurate and reliable.

A special feature is the size of the type—larger than is usual in a book of its size and kind—obviating that strained scrutiny which is so exasperating to anyone who desires to consult a dictionary on the spur of the moment. The omission of the derivations of words and of compound words, the meaning of which is perfectly obvious, is also a characteristic of the present volume. By this plan many words are included which could not otherwise have been given in the space at disposal.

The system adopted of giving the preterite, the past and present participles of verbs which double the consonant in these tenses, and of verbs ending in *e*, will, it is hoped, be of assistance to perplexed writers who are not always certain as to the rules which govern such forms.

An unusual feature in a dictionary, but one of very great value, will be found in the many special glossaries, following the vocabulary proper, containing comprehensive lists of new words added quite recently to our language, by the rapid development of aerial navigation and of motoring. Complete glossaries of the terms used in cricket, football, golf, and lawn tennis, are also given, and are compiled in each case by well-known and distinguished specialists in their respective departments.

The chief authorities on the different phases of the English language have been carefully consulted and compared; while the value of the book is largely enhanced by the monographs which form part of the Introduction and have been written by eminent specialists. The interest is also increased by the many illustrations, explanatory of subjects referred to in the text, and by the useful collection of facts set forth in the Reference Library at the end of the book.

In the belief that the demand for a convenient, complete, reliable, and modern dictionary has been met by the production of the present volume, we venture to hope that the work will receive a favourable reception at the hands of the public.

THE EDITORS.

THE ORIGIN AND HISTORY OF DICTIONARIES.

By Foster Watson, M.A., D. Lit.
(Emeritus Professor of Education in the University College of Wales.)

By a dictionary or lexicon is understood, ordinarily, a collection or catalogue of all the words of a language with their significations, the words being arranged according to the alphabetical order of the first letter with which they begin. In the best unabridged dictionaries a comprehensive treatment of orthography and pronunciation, and of the meaning and use, the derivation and history of words is included and an account of synonyms is usually to be found. Often, further, in continuance of the custom in the largest dictionaries of the classical languages, significant words are illustrated by quotation of passages showing the context of the word treated, usually, at various stages of its history. An earlier form of the dictionary is the vocabulary, usually on a smaller scale, or with shorter explanations of the separate words. The term glossary is used for a collection of words or phrases, either unusual, foreign, or technical in nature in an article or subject. An index is an alphabetical collection of words used in a book or subject, without explanations. A concordance supplies passages giving the contexts of the various words in an author or book. These different terms though having etymologically distinct meanings are not always used in their exact sense, and may, in particular cases, be found used for the term " dictionary." The word " dictionary " itself, meaning a word-book, is sometimes found used as the equivalent for an encyclopædia, *i.e.*, a comprehensive subject-book, or " thing "-book. Each of the two types, " dictionary " and " encyclopædia " tends to combine both functions, though encyclopædias are distinguished by fuller treatment. The first encyclopædia in English is the work of John Harris, in 1704, entitled *Lexicon Technicum*, which is explained by the sub-title as "A Universal English Dictionary of Arts and Sciences," explaining not only the terms of Art but the Arts themselves. This work was followed by Ephraim Chambers' *Cyclopædia*, or " A Universal Dictionary of Arts and Sciences," containing an explanation of the terms, and an account of the several subjects, in the liberal and mechanical Arts and the Sciences, human and divine." Chambers' work was amplified by Abraham Rees, in England, and was translated into French, and influenced Diderot's and D'Alembert's Encyclopædia. Encyclopædias were thus the outcome of dictionaries, and in their turn re-acted on dictionaries as we see in the title " Encyclopædic Dictionary." Subject-dictionaries have developed in many directions, *e.g.*, Dictionaries of the Bible, of Separate Arts and Separate Sciences, of Medicine, Law, Theology; of Antiquities, of Dates, etc. In history, an outstanding example

is the English Dictionary of National Biography; in geography, the numerous Gazetteers. In origin, they are all traceable back to differentiations in the idea of word-dictionaries. *Thesaurus* has been often used for both word-dictionaries, and subject-dictionaries, when the subject matter was marked by comprehensive treatment. Thus Etienne Chauvin styled his book (1692) *Lexicon Rationale sive Thesaurus philosophicus*, to denote a dictionary of philosophical terms.

The origin of the word-dictionary in the rudimentary form of a simple vocabulary, no doubt goes back to great antiquity. But it is obvious that dictionaries only became necessary when the study of letters had advanced beyond the earliest stages. For all practical purposes it is sufficient to regard the Greeks as the first effective dictionary-makers. At any rate, it is from them that modern nations can distinctly trace the origin of glossaries for educational uses. Greek education centred round the teaching of the great national poets, in the schools, particularly Homer, and when the Romans began to assimilate Greek culture, they collected the fragments of older Greek lexicographical vocabularies. Thus Apollonius, the Sophist, who is supposed to have lived at Alexandria, in the time of Augustus, compiled a lexicon of words used by Homer, the *Λέξις Ομηρικαί* edited by J. B. G. d'Ansse de Villoison, in 1773. Other glossaries, and forms of dictionary development were naturally to be found much earlier, in Greece itself, as for instance, those connected with the names of Zenodotus of Ephesus, the first superintendent of the great library at Alexandria, in 280 B.C., and Aristophanes, of Byzantium, the fourth superintendent of the same library, in c. 264 B.C. Nicander Colophonius, in the second century, B.C., wrote glossaries. Porthenius, in the first century, B.C., wrote on the choice words used by the historians. Didymus Chalkenteros wrote lexicons of the Greek tragic poets in the time of Cicero. But one of the most important of all the writers of late Greek dictionaries was Hesychius, probably of the fifth century, A.D., who accumulated subject-matter from most varied sources. This, the most extensive Greek dictionary that remains from antiquity was first edited by the Renascence scholar, Musurus, in 1514, but afterwards, in 1766, by the great Greek scholar Ruhnken, founded on the previous work on Hesychius edited by Alberti.

Another writer to whom Renascence scholars often refer is Julius Pollux, who produced in the second century, A.D., his *Onomasticon* of Attic words and phrases arranged according to subjects. This is the great model of later vocabularies and phrase-books of the mediæval ages and their successors, up to the time of Comenius's *Janua linguarum* and *Orbis pictus* of the first half of the 17th century. The Greek lexicon of Photius in the ninth century attracted the attention of the English scholar, Richard Porson, who published an edition of it in 1822. But Suidas, in the tenth century, A.D., is the best known mediæval compiler of a Greek lexicon, on an alphabetical basis, and on this work, enormous critical labour has been spent. The first printed edition was edited by Demetrius Chalcondylas, and printed at

Milan in 1499, and in 1834 the Oxford Press published in three folio volumes, the scholarly edition of Thomas Gainsford. Numerous errors in this book have caused Suidas to be regarded as extremely careless, but at the time of the Renascence, he was much in request. Erasmus, in one of his digressions in the *Adagia*, refers to a difficulty he had experienced in consulting the lexicon of Suidas. He asked a friend for the loan of a copy, which he knew he possessed, one which had the adages marked on the margin. He only required its use for a few hours so that his amanuensis might copy some passages for him. His friend refused to lend him Suidas, on the ground that he was afraid that learned men would be held in less esteem, if what had been hitherto their own monopoly should be made public property.

As with Greece, so with Rome, unfortunately, the story of the dictionaries is that of lost books and forgotten authors. The greatest name is that of M. Terentius Varro, of whom St. Augustine said we must feel astonished that he found time to write anything, on account of his extreme devotion to reading, and that he wrote so much that we can scarcely believe that anyone could find time to read all that he composed. His *de lingua Latina* is only known by six books extant out of twenty-four, and these are disfigured by numerous blanks, corruptions, and interpolations. Second to this work is the loss of the *de Verborum Significatione* of Sextus Pompeius Festus. This work embodied the fragments of a dictionary probably of the same title, by Verrius Flaccus, which, had it remained intact, would have been of the utmost value for knowledge of Latin words.

These Greek and Latin glossaries or dictionaries, or lexicons, if we may so call them, belonged to the type in which the words of a language are explained in the same language, Greek in Greek, Latin in Latin, except in the later Latin times, when Latin was used for the explanation of Greek words. When Latin became a language spoken and written in other countries, though not the mother tongue, glossaries and vocabularies developed to meet the needs of the bilingualism. When Greek was studied in the Middle Ages, a Graeco-Latin dictionary became necessary. Thus there is notice of such a Graeco-Latin glossary in the seventh century, A.D., and another in 869, A.D., by the Irish Hellenist Martin.

The mediæval vocabularies were mainly either a collection of Latin words with explanations either in simple Latin or in a vernacular language. A collection of such vocabularies and glossaries from the eighth to the thirteenth centuries was made by Thomas Wright, and privately printed in 1857. In 1884 this collection was re-edited and published by R. P. Wülcker. It includes the treatise *de Utensilibus* of Alexander Neckam of the twelth century, which consists of the Latin terms for all the ordinary avocations and occupations of men and women, with continuous interlinear glosses of explanations in easier Latin, in Norman-French, and in English. The vocabulary was grouped round subjects, and not arranged alphabetically. John de Garlande, in 1225, wrote his *Dictionarius*, which is the first known use of the mediæval Latin form of the word "dictionary." De Garande gave the Latin names for the parts of the body, for trades and

manufactures, and so on. He then describes the house of a Parisian citizen and its furniture, his own wardrobe, the Church and the priest, etc., giving all the Latin terms connected with these topics. These vocabularies eventually developed into the alphabetical dictionary form, but Renascence writers describe how difficult it was to get their pupils to proceed to the reading of authors, when as yet there were no printed dictionaries available. The method of teaching Latin and Greek proposed by J. L. Vives, in 1531, in his *de Tradendis Disciplinis* involves the making of his own dictionary by each pupil, by collecting for himself first the usual and afterwards the unusual words, and then carefully noting in a paper-book the meaning of the words, as he finds them used by the classical authors themselves. Latin dictionaries had been compiled in the fifteenth century as *e.g.*, that called *Papias*, drawn up by Solomon, Abbot of St. Gall and Bishop of Constance, in 1409; another called *Gemma Vocabulorum*, in 1469; and one by Dionysius Nestor.

England was equally active, and in the fifteenth century produced, besides other vocabularies, the *O tus Vocabulorum* (the Garden of words) which was printed by Wynkyn de Worde, in 1500, the first printed Latin-English dictionary which held the field until Sir Thomas Elyot compiled his dictionary. Another of the fifteenth century dictionaries was the *Promptorium Parvulorum* or *Children's Store-house*, an English-Latin vocabulary, which has been re-printed and edited for the Camden Society.

But the first and most renowned of the larger Latin Dictionaries of Renascence times was that of Ambrose Calepin (published at Reggio) in 1502. This work became so famous that it supplied the generic name for a dictionary, which was often called "a calepin," as a grammar was called "a donat" (after the celebrated grammar of Aelius Donatus). Calepin made a great collection of Latin words from Latin authors, and included meanings in Italian and other languages. Eventually the Dictionary was not only Latin but Polyglot, including, in its greatest expansion, no less than eleven languages. Conrad Gesner is said to have added 4,000 words to Calepin's Latin dictionary. Paulus Manutius, later, edited it and in 1609 Jean Passerat revised it, and yet it is said Matthias Martinus "made two volumes of their omissions." From Calepin Robert Estienne, better known by the Latinised form Stephanus, adapted a *Dictionarium* as he called it in Latin and French, in 1531, at Paris. From this, as basis, he elaborated the great Latin dictionary, the *Thesaurus Linguae Latinæ*, in which he was assisted by various learned men, and continued to increase and improve it in many editions. This was the first great Latin Dictionary to illustrate the force of words as employed in idioms and by the great classical writers, and to indicate shades of meaning used by various writers. Robert Estienne was one of the very greatest scholar-publishers. In 1530 he printed an edition of the Greek New Testament and in 1532 the Latin Bible was beautifully produced by him. It is of his family, it is said, that there was no member, not even of the servants, who did not understand and speak Latin. He collected materials for a great Greek dictionary, but these he handed over to

his son, Henry Estienne. It is of Robert Stephanus that De Thou (Thuanus), the great French scholar, said that not only does he stand above Aldus and Froben, those princes of publishers, but the world, De Thou declares, owes more to him than to all the great "conquerors." At any rate, Robert Stephanus is the Father of modern Latin Dictionaries.

Henry Estienne (or Stephanus) carried forward the family tradition. To the materials placed in his hands by his father, Henry added the full labours of twelve years. In 1572, this great *Thesaurus Græcae Linguæ* appeared. Henry Hallam observes that this work marks an epoch in Greek studies, and adds the following remarkable judgment: "In comprehension and copious interpretation of words it not only left far behind every earlier dictionary, but it is still the single Greek *Lexicon*; over which some have ventured to abridge or enlarge, but none have presumed to supersede." He did not, however, reap the fruit of his enormous labour for two reasons, firstly, he published the book (in five folio volumes) at a prohibitive price, and secondly, John Scapula, a corrector to the press in Estienne's employment, made a selective abridgement in one volume, in 1579, which was very successful. But, as Mark Pattison pointed out, for seven years Stephanus had had the field to himself, and was not successful, even then. The fact was, says Pattison, it was not by plagiarism that Scapula got possession of the market, but by the clear instinct that discerned the imperative condition of manageable bulk."

We can now turn to the history of dictionaries in England since the Renascence. In the first instance we have to consider Latin dictionaries, for the production of the Latin dictionary, even in England itself, preceded the compilation of an English dictionary, and indeed it was the Latin Dictionary, as compiled by Englishmen, that led to the English Dictionary.

We have seen that in the Middle Ages there had been vocabularies, etc., of Latin with English equivalents, arranged according to subjects. The first great Latin Dictionary produced in England was compiled by Sir Thomas Elyot*, and published in 1538. Elyot, in his Preface, describes the materials he had at hand and his difficulties in dealing with them:

"I well perceyved, that all though dictionaries had been gathered one of another, yet nethelesse in each of them are omitted some Latin wordes, interpreted in the bokes, which in order preceded. For Festus hath many, which are not in Varros *Analogi*; Nonius hath some, which Festus lacketh; Nestor toke not all that he found in them both. Tortellius is not so abundant as he is diligent. Laurentius Valla wrate only of wordes, which are called elegancies, wherein he is undoubtedly excellent. Perottus in *Cornucopie* dyd omitte almost none that before him were written, but in wordes compounde he is to(o) compendiouse. Fryere Calepine (but where he is augmented by other) nothyng amended, but rather appaired that which Perottus had studiously gathered. Nebrissensis (*i.e.*, Antony of Lébrija)

* *Dictionary of Sir Thomas Elyot Knyght*, published by Thomas Barthelet, in 1538.

was both well learned and diligent, as it appereth in some wordes, which he declareth in Latin ; but because in his dictionarie wordes are expounde in the Spanish tunge, which I do not understand, I can not of hym shewe min opinion. Budæus in the exact triall of the native source of wordes, as well as Greke as Latin, is assuredly right commendable, but he is moste occupied in the conference of phrases of both the tunges, whiche in comparison are but in a fewe wordes. Dyvers other men have written sundry annotations and commentaries on olde Latine authors, among whom also is discord in their expositions." Elyot claims that he has included over a thousand more Latin words than were to be found in Latin dictionaries in England previously.

Elyot was a diplomatist of Henry VIII.'s Court, and his dictionary was revised and augmented by a poor tailor's son, Thomas Cooper, who had been educated in Magdalen College School, Oxford, who became Master of the School and had William Camden as one of his pupils. In Mary's reign, he practised as a physician, but after the accession of Queen Elizabeth, Cooper became Dean of Christ Church and Vice-Chancellor of the University of Oxford, and was Bishop of Lincoln, and afterwards Bishop of Winchester. Cooper (whilst "schoolmaster") published his revised Elyot's Latin Dictionary in 1548, followed by editions in 1552 and 1559. In 1565, the work greatly increased, appeared as *Thesaurus Linguæ Romanæ et Britannicæ*, together with a *Dictionarium Historium et Poeticum*, with Cooper's name alone on the title page (followed by editions in 1573, 1578, 1584.) Cooper's wife is stated to have burnt his notes for the Dictionary after he had been eight years at work, her apologists saying she did it "lest he should kill himself with study." However, he calmly set himself to re-write what was lost. It must be pointed out that Cooper had the advantage over Elyot, that in the meantime, Robert Estienne's great Latin *Thesaurus* had appeared, and Cooper readily and freely availed himself of the Frenchman's great work.

After Cooper, the following work shows the line of continuation of dictionary compilation in England :—

An Alvearie or Triple Dictionarie in Englishe, Latin and French : Very profitable for all such as be desirous of any of those three languages. Also by the two Tables in the ende of this booke, they may contrariwise, find the most necessary Latin or French wordes, placed after the order of an alphabet, whatsoever are to be founde in any other Dictionarie : and so to turn them backwards againe into Englishe when they read any Latin or French authors, and doubt of any hard worde therein, 1573. [2nd Ed., 1580.]

The author of this work was John Baret, a Fellow of Trinity College, Cambridge, who had taken the M.D. degree, and it is remarkable, in this connection, how many of the old Dictionaries, Nomenclators, and Cyclopædias were compiled, at some stage, by men associated with "physic." Baret describes the way in which he came to compile his Dictionary, and this account supplements the passage above quoted from Elyot :—

"About eyghteene years agone, having pupils at Cambridge

studious of the Latin tongue, I used them often to write epist'es and themes together, and daily to translate some piece of English into Latin. Perceyving what great trouble it was to come running to mee for every word they missed, knowing then of no other Dictionarie to help us but Sir Thomas Eliot's *Librarie*, which was come out a little while before, I appoynted them certaine leaves of the same booke every day to write the English before the Latin, and likewise to gather a number of fine passages out of Cicero, Terence, Cæsar, Livie, etc., and to set them under severall Tytles, for the more ready finding them againe at their neede. Thus within a yeare or two they had gathered together a great volume, which (for the apt similitude betweene the good scholars and diligent Bees in gathering their wax and honey into their Hive) I called them their Alvearie both for a Memoriall by whom it was made, and also by this name to encourage others to the like diligence." This Dictionary, thus compiled for private use, became well known and Baret was besought to have it published for the "common profit" and "the public propagation of the Latin tongue." Reluctantly, he was induced to gather further "writers and workmen" to co-operate in making the work more complete. The instance of Baret is important in that "he had travelled in diverse countries beyond the seas, both for language and learning," and thus associated classical languages and the learning of modern languages, and boldly avowed the engagement of the help and services of collaborators (he names M. Chalmer and M. Claudius) as well as of his own students.

Interesting as Baret's *Alvearie* is in throwing light on the mode of construction of the 16th century dictionary, the greatest English names associated with the later Latin dictionaries, are Thomas Thomas, John Rider, and the Holyokes. In 1587 Thomas Thomas's *Dictionarium* was published at Cambridge, and with the 1615 edition was associated a supplement by the better-known Philemon Holland, an M.D. (of what University is unknown), whilst he was an M.A. of both Cambridge and Oxford. Bishop Rider's *Bibliotheca Scholastica* was published in 1589, and claims to include 4,000 more words than any previous dictionary issued in England. It contains an English-Latin, as well as Latin-English section. In 1617, Francis Holyoke, a schoolmaster, compiled a *Dictionarie Etymologicall*, annexed to Rider's Dictionary of that date. This was expanded and published in the latest form, as developed by Francis, in 1648. His son, Thomas Holyoke, still further increased the work, and in its final form, as embodying the investigations and compilations of three generations of the family, it was published in 1676–7 as *A Large Latin Dictionary*, claiming to contain 10,000 more words than any previous dictionary. English education owes much to the Holyokes, for in addition to the Dictionaries mentioned, the son of Thomas Holyoke, Henry, was elected in 1687 as Headmaster of Rugby School, and with Thomas James and Thomas Arnold may be regarded as one of the great builders of the reputation of Rugby. The principal Latin Dictionaries, after that of Holyoke, published in England, are by Robert Ainsworth 1736, revised by Morell, 1796; edited by Beatson and Morell, 1860; that of

Scheller, translated by Riddle, published at Oxford, 1835; that of Dr. William Smith, 1855 and 1870; and the Latin Dictionary produced in America, of Lewis and Short, issued at Oxford in 1879.

Without detailing the great Latin Dictionaries issued in foreign countries, mention must be made of the splendid undertaking still in progress of the *Thesaurus Linguæ Latinæ, Editus auctoritate et consilio Academiarum quinque Germanicarum Berolinensis Gottingensis Lipsiensis Monacensis Vindobonensis*, published by Teubner at Leipzig, of which the first volume was issued in 1900. The largeness of the scale may be judged by the fact that the first volume consists of 1016 large quarto pages—and only reaches from A to Am. The work is in progress and at the present time, late 1913, it has already required four volumes to conclude to the end of C. Apart from classical Latin, mediæval Latin has received its comprehensive lexicographer in the French work of Du Cange, *Glossarium*, first published in Paris in six folio volumes, 1733-36, and edited by Henschel, Paris, 1840–50, in seven volumes. Of Greek Dictionaries, in England, the greatest is that of Liddell and Scott, first published in 1843, still holding the premier position. Passing by the great modern dictionaries of foreign countries, it may be said the English dictionaries are marked, until quite recently, by the absence of organised effort.

Dr., now Sir James A. H. Murray in the Romanes Lecture for 1900, traced the "Evolution of English Lexicography." He goes back to the *glosses* on Latin writers, to be found in nearly all the Latin MSS of religious or practical subjects all through the Middle Ages, explaining what in later dictionaries were called "the hard" words. The glossing, he points out, was chiefly characteristic of Celtic and Teutonic rather than of Romanic peoples. Hence have been preserved a large store of Old English, Old Irish, Old German words, placed so as to show they were the equivalents of certain Latin words. A collection of glosses on words in MSS of all kinds of subjects, became known as a *glossarium*. Then followed Vocabularies, already described, arranged according to subjects. Then came arrangement of these according to "first letter" order. The other clearly marked source of the English dictionary was the Latin Dictionary, as published in England. Still, before a real English Dictionary was produced, the famous *Eclaircissement de la Langue Francoyse*, a grammar and vocabulary, was written by the Englishman John Palsgrave, in 1530, and this was the beginning of a series of dictionaries of foreign vernacular languages, culminating in the *Lexicon Tetraglotton, an English-French-Italian-Spanish Dictionary*, by James Howell, in 1660.

Of specifically English Dictionaries the first clearly marked differentiation is that of Robert Cawdrey, the Schoolmaster of Oakham Grammar School and of Coventry Grammar School, where we have noted Dr. Philemon Holland was a previous master, called *The Table Alphabeticall of Hard Words* (1604), followed by somewhat similar works by John Bullokar, a physician, called *The English Expositor* in 1616; and in 1623 Henry Cockeram definitely styled his work *The English Dictionarie*.

In the 17th century came the more comprehensive dictionaries,

embodying more technical terms, of Thomas Blount's *Glossographia*, in 1656; of Edward Phillips, John Milton's nephew, in 1658. After being a schoolmaster at Wolverhampton, Elisha Coles came to London, and for a time was a master at Merchant Taylor's School, teaching Latin to English youths and English to foreigners, and in 1675 published *An English Dictionary, explaining the difficult terms that are used in divinity, husbandry, physic, land, navigation, mathematics and other arts and sciences.* Coles also compiled a Latin Dictionary (Latin-English and English-Latin) issued in 1677—which was much used in schools. Edward Cocker is better known for his *Arithmetic*, but an *English Dictionary* was published as Cocker's work posthumously, in 1704, by John Hawkins, and this also was well used in the schools. In the 18th century we enter upon a period which was specially marked by collective works of Encyclopædias, and Dictionaries were carried in the current of the development. Another schoolmaster's name has to be mentioned, Nathaniel Bailey, who published his *Universal Etymological English Dictionary* in 1721, which he still further increased in 1730, aiming at the inclusion of words of all kinds, whether "hard" or not.

Then followed the great pioneer work of modern English dictionaries, described as *A Dictionary of the English Language, in which the words are deduced from their Originals, and illustrated in their different significations by Examples from the Best Writers*, by Samuel Johnson, in two folio volumes in 1755. The place of pronunciation in the Dictionary was developed from Bailey and Johnson (who both had marked the stress accent) and from William Kenrick, who in his *New Dictionary* in 1773 had supplied pronunciation until John Walker, in 1791, established standard provision for his age in this direction. Sir James Murray says: "Johnson's great work raised English lexicography altogether to a higher level; in his hands it became a department of literature." In 1818, Archdeacon Todd re-edited Johnson. In 1837 Dr. Charles Richardson attempted to illustrate the history of words by quoting authors along the line of English literary history.

Noah Webster was the first great dictionary maker in America. His *American Dictionary of the English Language* appeared in 1828. It claimed to contain 12,000 words not found in any previous work. The work has been revised and supplemented and brought into accordance with later lexicographical principles, first by Chauncey A. Goodrich (d. 1860), and afterwards by Noah Porter (d. 1892), and in 1909 Dr. W. T. Harris and Mr. Sturgis Allen edited the latest edition. In 1860 Joseph E. Worcester produced a work of high reputation in England, as well as in America, the second great American Dictionary.

The most colossal of English Dictionaries is that known as *The Oxford English Dictionary* or "*A new English Dictionary on Historical Principles, founded mainly on the materials collected by the Philological Society.*" Johnson had endeavoured to produce a Standard Dictionary of the English language, aiming at completeness. *The Oxford Dictionary* proposed not only to include every known English

word, whether in present or past use, its meaning and pronunciation, and also to present "a biography of each word, giving as nearly as possible the date of its birth or first known appearance . . . and its successive changes of form and developments of sense as derived from historical research, in every department of literature and knowledge." The suggestion of the idea is attributed to the late Archbishop Trench. The drawing up of the scheme, and its organisation, were undertaken by the Philological Society. The first volume was issued in 1888 *and the work is still in progress.* In 1900 it was stated that more than five millions of extracts had been made by two thousand volunteer readers, gathering their material by inductive and organised process from every period of English literature. The enormous scale may be judged by the fact that in the same letters of the work the words recorded are ten times as numerous, whilst the number of quotations sometimes are nearly twenty times as numerous as in Johnson's Dictionary. The work, however, is so massive, and necessarily so costly, *that its price places it beyond the reach of the ordinary person of moderate means*, except through a good public library.

In the same way that the Philological Society has directed its energies to the production of *The Oxford Dictionary*—so the English Dialect Society has encouraged and assisted Dr. Joseph Wright in the compilation of *The English Dialect Dictionary*, a work now happily completed in six large thick quarto volumes, together with a supplementary volume of additions, and an *English Dialect Grammar.* The aim has been to furnish a complete vocabulary of all dialect words still in use, or known to have been in use during the last two hundred years, founded on the publications of the English Dialect Society, and on a large amount of material never before printed. Here, again, the editor was assisted by several hundred voluntary readers of all kinds of literature, for the purpose of historical illustration.

The whole course of the history of Dictionaries discloses the growth of the principle of co-operation and organisation of great bodies of scholars in scholarly enterprises, which in the vast accumulation of literature and knowledge have grown far beyond the compass of individual lives to accomplish. One of the incidental points to note is the great contribution to lexicographical progress made by schoolmasters giving of the margin of their restricted leisure ; a relatively large number of workers ; and in former times, the physicians have been almost equally prominent. This spirit of co-operative effort, supposed to be distinctive especially of the best industrialism, is as clearly marked in modern scholarly enterprise, and is undoubtedly spreading in all directions of literature, history, as well as of science. It has received a considerable amount of its original impulse and of continued development from the scholarly production of the best dictionaries.

This present book is designed to fill the wants of *every-day* life. It is not bulky and unwieldy, like the great unabridged dictionaries necessarily must be ; yet it contains practically all words in common use except those more properly found in technical glossaries. It probably contains more of *the latest* words than does any similar dictionary of the English language now published.

THE ORIGIN AND DEVELOPMENT OF THE ENGLISH LANGUAGE.

By A. E. Turner, B.A.,

Formerly Major Scholar and Jeston Exhibitioner of Trinity College, Cambridge.

English belongs to the Teutonic branch of the Indo-European family of languages. Its closest relations among still living languages are Frisian, Dutch, Flemish, and the Low German dialects. The term English (*Englisc*) was originally used to denote the language spoken by the Engle or Angles; thence it was adopted as the name of the group of cognate dialects spoken by the Anglo-Saxon and Frisian tribes who settled in Britain in the fifth* and sixth centuries; and has continued to be applied to the language of their descendants and successors.

The relation of English to the other members of the Indo-European family may be best shown by the following table, in which the Teutonic group is given in greater detail as containing the closest relations of the English language:—

Table of Principal Indo-European Languages.

Indo-Iranian.	Hellenic.	Italic.	Celtic.	Balto-Slavonic.	Teutonic.
1. Sanskrit & modern Indian languages. 2. Old and modern Persian.	Old and modern Greek.	Latin and modern Romance languages.	Old Celtic dialects and modern survivals (Scotch and Irish Gaelic, Welsh, Breton, &c.).	1. Old Prussian (dead), Lithuanian, Lettish. 2. Russian & other Slav. languages.	1. Gothic, or East-Teutonic (dead). 2. Scandinavian, or North Teutonic (including old and modern Icelandic, Norwegian, Swedish and Danish). 3. Germanic, or West Teutonic, comprising:— (*a*) High German, old and modern (*b*) Low German (incl. old and modern Flemish, Dutch, Frisian, and English.)

So different in every way from the English of to-day was the English of those early settlers that it might well be classed as a separate language; and it is, in fact, often distinguished as "Anglo-Saxon:" but the continuity of name is worth preserving to remind us that

* These settlements *began* much earlier. Julius Cæsar found settlements on the coast of tribes who had crossed from Belgium, and a "*Litus Saxonicum*" existed in Britain at the end of the 4th century.

all these differences are the result of an organic growth in which the mightiest changes are accomplished by gradual processes, the individuality of the language being preserved through them all in much the same way as we recognise the personal identity of a human being through all the changes, bodily, mental and spiritual, which he may undergo between childhood and old age.

Among the principal ways in which this First-English differed from our modern speech may be enumerated :—

(i.) Its almost purely Teutonic vocabulary, the only exception being a few Latin words gathered from the Romans in their German wars, such as *esol* (ass., L. asellus), *strǽt* (street, L. strata via), *wall* (L. vallum), *port* (L. portus), *camp* (battle, L. campus). These Latin words of the First Period, as they are called are common to most of the Germanic languages; others were adopted from the Celtic population, such as *sacerd* (priest, L. sacerdos), and several which are found only in place names, as Lincoln (L. colonia), Colchester, Doncaster, Leicester, Exeter* (L. castra).

(ii.) Its inflexional variety, similar to, but greater than, that of modern German. Thus, in the various declensions of substantives, four cases (nominative, accusative, genitive, dative, besides traces of an instrumental) are distinguished by different terminations; adjectives and participles show by inflexion gender as well as case; the first and second personal pronouns, while not distinguishing gender, have a dual number as well as a singular and plural; the definitive article is inflected and is used both as a demonstrative and as a relative pronoun; while there are verbal inflections to mark the three persons and two numbers in the present and past tenses of the indicative and subjunctive moods.†

(iii.) Its greater freedom in the formation of new words by prefixes and suffixes, or by the welding together of existing words. This power also has been retained by modern German to a greater extent than by modern English.

(iv.) Its Runic alphabet. This, however, early gave way under Christian influence to a variety of the Roman alphabet, only the two runes *thorn* and *wen* being retained to represent the sounds now denoted by *th* and consonantal *w*.

(v.) Its metrical system, depending on alliteration, and a merely accentual correspondence in the length of lines (the number of unaccented syllables being disregarded). Two short passages are given from translations by Henry Morley, in which the original metre‡ (but with more regular rhythm) is preserved. The first is from the old epic of Beowulf, the original of which may date from before the English invasion; the second consists of a few lines from the "Seafarer," a poem in the Exeter Book, and possibly the work of Cynewulf :—

I. *B*efore all *B*eowulf
And some of the *b*ravest
*W*ent on the *w*ay,
*W*ise men,
To ex*pl*ore the *pl*ain,
Till, *pl*anted leaning
Over the *r*ough *r*ock,
He *r*eached suddenly
An un*w*insome *w*ood.
*W*ater stood under it
*G*hastly with *g*ore:
It was *g*rief for all Danes,
A *s*ight of *s*orrow
For the *S*cylding's friends
A *h*orror for *h*eroes
When the *h*ead of Æschere
Was *f*ound by the steep *f*lood
*F*loated ashore.

* Called "Excester" in Camden.

† There are, however, no inflexions to convey distinctions of voice.

‡ See also Tennyson's translation of the Battle of Brunanburh.

II. There is no *man* among us
So proud in his *mind*,
Nor so *good* in his *gifts*,
Nor so *gay* in his youth,
Nor so *daring* in *deeds*,
Nor so *dear* to his lord,
That his *soul* never *stirred*
At the thought of *seafaring*
Or what his great Master
Will do with him yet.

(vi.) Differences of orthography and of pronunciation, so great that there is scarcely any resemblance either to eye or ear between the old and modern forms of most words which have remained in the language from the seventh to the twentieth century.

In view of what has been said as to the organic growth of the language and of the fact that the various dialects composing it naturally developed at different rates and in somewhat different ways, it will be readily seen that it is only possible to distinguish definite periods in the history of that development by drawing boundaries of more than usually arbitrary character. Bearing this in mind, however, we may note three such periods: (1) First English, Old English or Anglo-Saxon, down to the end of the 11th century; (2) Middle English, from 1100 to 1500; (3) Modern English. But these periods must be regarded as divided not so much by a definite date as by "transition periods" corresponding to important events in the national history—between the first and second the Norman Conquest and gradual settlement of the people (1066–1150), and between the second and third the introduction of Printing, the Revival of Learning, and the beginnings of the Reformation (1485–1550).

In no respect has our language undergone more extensive modification than in regard to its vocabulary; and already during the first of our periods many words of foreign origin had been adopted. Modern dictionaries record something like half a million English words, but, if we exclude obsolete and provincial words, the number would be reduced to about 100,000. Nearly two-thirds of that number are either directly or indirectly of Classical* origin. Nevertheless, English is in no sense to be classed as a Romance language, even in its vocabulary; for nearly all the commonest words are of Teutonic origin, and such words in ordinary literary English form about five-sixths of the whole—in conversation probably a still larger proportion. Thus of pure English origin are most of the words used in earliest childhood and denoting family relationships, food and clothing, parts of the home, its furniture, and implements (*e.g., father, bread, cloth, hearth, kettle, plough*); the names of common objects of nature, such as the heavenly bodies, features of natural scenery, trees, plants and animals (*sun, field, oak, grass, horse*), the elements, the seasons, the weather, natural divisions of time (*fire, rain, spring, day, month*), parts of the body, bodily actions or functions, the emotions (*foot, neck, wing, sweat, sit, run, beckon, love, hate*); as also the articles, pronouns and demonstratives, the numerals, most prepositions and conjunctions, the commoner adverbs of time and place, the auxiliaries, and most other monosyllabic verbs and nouns.

* *i.e.*, Latin, for nearly all our Greek words have come through the Latin.

The war which the English invaders waged upon the Celtic population of Britain was one of expulsion rather than of conquest, and words of Celtic origin are less numerous than might be supposed. Celtic place names are common, as in *Aber-, Inver-, Ben-, Pen-, Dun-, Avon, Ouse, Esk* (*Exe, Usk*), *Dour* (*Duir*), *Stour;* but other Celtic words appear only gradually, *e.g., combe, crag, dun* (colour), some being introduced through Norman-French from the continental Gauls (*e.g., car, flannel, vassal*), and others again in still later times (*bard, brogue, clan, loch, shamrock, whiskey*).

The conversion of the English to Christianity in 596 led to the introduction of a number of Latin terms, principally ecclesiastical, and many of them borrowed from the Greek, *e.g., mæsse* (mass), *predician* (preach), *cleric* (clerk), *munuc* (monk), *biscop* (bishop), *candel* (candle) ; but also a number of names of animals, trees, plants and stones, as *leo* (lion), *truht* (trout), *pawa* (peacock), *meregrota* (pearl), *marma* (marble) ; and some articles of food, as *cese* (cheese), *butere* (butter), *lactuce* (lettuce), besides, of course, other smaller groups, or isolated words. These additions constitute the Latin of the second period.

The next additions to the English vocabulary came from contact with the Danes, a name applied to the Scandinavian Vikings of various tribes, who at the end of the eighth century began to ravage the English coasts, and by 878 were formally granted by Alfred the kingdoms of Northumbria, East Anglia and Mercia. The close relationship between the languages makes it difficult to distinguish Danish words from those of true Anglo-Saxon origin ; but it is certain that the influence was much smaller than the permanent lodgment of so large a body of invaders might have led us to expect : and it was only when some fusion of the two peoples occurred under the Danish dynasty (1013 to 1042) that Danish words began to creep into the literary dialect of the south. Some common words apparently of Danish origin which still survive are *arrow, call, law, knife, ill, dwell, earl, husband, take, until, bask* (the last interesting as a survival of an old Norse middle voice formed with the suffix *-st, -sk* = *sik*, self). Danish also are geographical names ending in *-by* (town), *-ford** or *firth* (creek, fiord), *-thwaite* (clearing). Other Danish words survive in provincial dialects or as poetic archaisms, *e.g., neaf, neave* (fist), a word which occurs in Shakespeare, but is now found only in northern dialects, *beck, thorp, tarn, garth, tine* (lose), *gar* (cause, make), *greet* (weep).

Thus by the end of our first period the purity of the English vocabulary had been affected by additions, though of no great magnitude, from the Celtic, Danish and Latin languages. Meanwhile English accidence was also developing. In the earliest English four dialects are recognisable, two Northern or Anglian—the Northumbrian and the Mercian—and two Southern—the Kentish and the West-Saxon. Into the distinctions which mark them we have not space to enter, but it is worth noting (i.) that it is from the Anglian north, the true home of *Englisc*, that the earliest literary remains have come down to us in the old epic poem of Beowulf, and the writings

* In the names of coast towns. In inland towns *-ford* indicates a passage across a river

of Caedmon, Bede, and Cynewulf; (ii.) that although, largely from political causes, the literary centre had by the end of the ninth century passed to the south, it was in the north that, partly through the unsettling influence of Danish forms, the greatest weakening of the inflexional system was visible. Thus we find the plural suffix *-as* replacing *-a* or *-u*; *-es* sometimes for *-e* in the genitive of feminine nouns; *-es* for *-eth* in the third pers. sing. present indicative; and a partial loss alike of the final *-n* of the infinitive and of the prefix *ge-* of the past participle. A similar but less marked tendency to pass from an inflexional to a synthetical structure had also made its appearance in the south, and it is highly probable that, apart from any extraneous influence, English, like most other Low German languages, would have simplified its grammatical forms much in the way that it has actually done.

The process, however, was greatly hastened by the Norman Conquest, which also exercised an enormous influence on the English vocabulary. The new words were introduced slowly at first, but during the thirteenth and fourteenth centuries they poured into the language in larger quantities than it was able to assimilate, and many such experimental borrowings have since become obsolete. Those which remain—and they are both numerous and important—are mostly connected either with the social position in which the conquerors established themselves or with their more advanced state of culture. They consist of words used in the administration of affairs of State and of the Church, titles, names of offices and dignities, terms appropriate to chivalry and the chase, to law, philosophy, and science, to luxury and the arts and handicrafts which minister to it. As an example of the dependence of our language on words of Latin origin in regard to such matters, it may be pointed out that nearly all the words used in the grouping of these terms in the immediately preceding sentence are derived from Latin through Norman-French (Latin of the third period). Many of these new Norman words ousted older native English words owing to the fact that positions allowing time for the cultivation of literature and the arts were largely monopolised by the conquerors.

In spite of the large influence exercised upon English literature in the time of Chaucer by the new Italian literature, it was not until later, under the closer intercourse set up between the two peoples by the revival of learning in this country, that a number of Italian words — *folio, madrigal, stanza, burlesque, sonnet, doge*, etc. — found their way into the English language. The number of Arabic words imported through the Romance languages also deserves mention; such are *almanac, azoth, azimuth, nadir, ottoman, amulet, talisman*.

During this Middle English period (1100–1500) three principal dialects are distinguished, the "thre maner speche" of Trevisa's translation of the Polychronicon. They are the Northern, spoken in the Lowlands of Scotland, in Northumberland, Durham and Yorkshire; the Midland, spoken in East Anglia and the Midlands, and penetrating in the west from Shropshire to Lancashire, Westmorland and Cumberland; and the Southern, spoken in all counties south of

the Thames, and extending in the west from Dorsetshire and Somersetshire to Herefordshire and Worcestershire. The most characteristic distinguishing feature is the plural of the present indicative, which in the Northern dialect ends in *-es*, or is found with no suffix at all (*we singes, we sing*) ; in the Midland in *-en* (*we singen*) ; and in the Southern in *-eth* (*we singeth*). The Northern, moreover, contained the largest number of Danish forms, and the Southern the least. The Midland dialect, prevailing over the greatest area, is divided into East Midland on the one hand (the parent of modern standard English), which in certain respects resembled the Southern ; and West Midland on the other, more akin to the Northern.

The chief effects of the Norman Conquest on English forms and inflexions are (i.) an assimilation of the vowel endings, and of the vowels of most inflexions to a uniform *-e*, doubtless representing an earlier assimilation in pronunciation—much in the same way as the modern cockney reduces all possible final syllables to a single indefinite vowel sound represented by *-e*. (ii.) Some Norman suffixes replace English ones, *e.g.*, the feminine termination *-ess* takes the place of the old English *-ster* (traces of which remain in *spinster, huckster, youngster*, etc.), or *-en* (surviving in *vixen* and in the proper name Minchin* = *munucen*, a nun). (iii.) The genitive is expressed by the preposition *of* more commonly than by inflexion, and the degrees of comparison sometimes by *more* and *most*. (iv.) There is great confusion of genders, words once masculine or feminine becoming neuter. (v.) Many gutturals are softened or become mute (*e.g.*, child for *cild* ; day for *daeg* ; I for *ic, ich*).

English prosody was not less affected. Rhyme had made tentative appearances even before the Conquest, partly under the influence of Celtic assonance, partly by adoption from early Latin hymns. Metre meantime becomes more regularly syllabic, until in the Ormulum (1215) we have a monotonously regular syllabic (but unrhymed) metre, of which a few lines are given as a specimen :—

I hav-e doon so som (just as) thou bad,
And forth-ed (furthered) thee thyn will-e ;
I hav-e wend (turned) intil English
Gospell-es holy lor-e,
After that litel wit that me
Myn Drighten (Lord) haveth len-ed (lent).

At length English metre is fixed under Italian influence by Chaucer, in whose works rhyme and syllabic correspondence are employed together—though the latter had been till recently lost sight of owing to the uncritical text which had become current, and to the failure to grasp the rules† as to the pronunciation of the final *-e*. William Langley, in his Vision concerning Piers Ploughman, and one or two contemporary imitators, used the old alliterative metre for the last time in the South‡ at the end of the fourteenth century. Incidentally,

* Cf Mincing Lane, Minchen Wood, etc.

† See Prof. Skeat's *The Chaucer Canon*.

‡ It survived much longer in the Northern dialect.

the same work shows the wide difference of vocabulary between the tongue of the common people and the courtly English of Chaucer.

The East-Midland dialect had now become the standard English of London and the south-eastern counties, thus causing a re-grouping of the English dialects. George Puttenham, writing in 1589, speaks of three dialects, a Northern, a Southern and a Western. The boundaries of the Northern remain unchanged, except that they must, on this division, be taken to include the north-western counties, where the West-Midland dialect had always included some characteristic features of Northern English; the Southern (formerly East-Midland) was the standard language of the Court, the metropolis and the neighbouring counties; while the Western, confined to the South-West counties, was the survival of the old "Southern."

The advent of the printing-press and the Revival of Learning hastened the transition to modern English. Not only did Caxton's books serve to fix the spelling and the grammatical forms of metropolitan English, but their diffusion throughout the country established it as the standard language of the cultured classes in all parts of the kingdom. The *spoken* language in the north and west retains to this day many of the peculiarities of vocabulary and grammar from the old dialects, in the so-called "Doric" of Lowland Scotch and in the "West Country" speech; but it seems probable that Burns and Barnes will prove to be the last to employ them for the purposes of literature that has more than a local appeal, except in so far as they are used to give local colour to dialogue, as in the novels of the "kail-yard" school, or those of Richard Blackmore.

Another effect of the printing press was the abolition of those characters which distinguished the English from the continental alphabet, viz., the two remaining runes, wen and thorn, and the old English form for *g*.

The Revival of Learning made the last considerable additions to the English vocabulary, viz., a large number of Latin words (known as Latin of the fourth period) and a few of Greek origin. It is characteristic of these Latin words of "learned" origin, that they keep closer to the original classical forms than the earlier words of "popular" origin, many of which, coming through the Norman-French, had been modified almost out of all recognition in the process. Hence the many Latin "doublets" in our language, as *poor, pauper*; *forge, fabric*; *surface, superficies*; *couch, collocate*; and a few Greek (generally through Latin), as *blame, blaspheme*; *story, history*; *balm, balsam*. The spelling of some words already adopted was classicised, as *adventure* for *aventure*; *debt* for *dette*; *throne* for *trone*; and in other cases, as in *rhyme* for *rime*, *Thames* for *Tames*, the alteration in spelling is based on a false etymology.

It is interesting to find Gill, in his Logonomia Anglica (1619), exclaiming, "O, harsh lips! I now hear all around me such words as *common, vices, envy, malice*; even *virtue, study, justice, pity, mercy, compassion, profit, commodity, colour, grace, favour, acceptance*"—every one of which words, it will be noticed, has survived to this day.

A large number of others introduced at this time have been less fortunate.

To the Revival of Learning is also to be attributed the more elaborate prose style which resulted from the admiration excited by the long and rounded periods of classical authors. Under the pressure, however, of journalistic necessities in the times of the Civil War signs of a return to a simpler and more direct style appeared; and the so-called "easy writing" of Defoe, Addison, Swift and their contemporaries gave the death-blow to the "grand" style.

Contact with Spain during the 16th and 17th centuries, both at home and in the newly-discovered continent of America, led to the introduction of a number of Spanish words (*tobacco, potato*—both from the Hayti through the Spanish—*armada, hidalgo, negro, cigar, tornado*, etc.); while the Dutch wars in the 17th century brought in some Dutch nautical terms and a few other words, as *boom, yacht, sloop, schooner, yawl, ruffle, wiseacre*. Indeed, the English language down to the present day continues to lay under contribution almost every language in the world, but these new words are now usually either borrowed to describe some foreign thing—natural or manufactured products, titles, etc.—as *calico, turban, kimono, canoe, boomerang, tea, cocoa, banana, gazelle, orang-outang, Khedive, Bey, Czar*, etc.; or are coined, usually from classical materials, to describe some new product or invention—*hydrogen, helium, telephone, phonograph, omnibus, cinematograph, automobile, aeroplane*.

Except for the additions referred to in the foregoing paragraph, the transition to modern English may be regarded as complete by the time of Shakespeare. It is true that we find in his works and those of his contemporaries many survivals of earlier forms and usages which are no longer employed (*vide* Abbott's Shakespeare Grammar, Introduction), but, broadly speaking, they are modern works alike in vocabulary, in grammar, and in style. The comparative smallness of the changes in our language between 1500 and 1900, as compared with those of the four preceding centuries, is due almost entirely to the printing press, which at once fixes and diffuses a uniform standard. The wide-spread influence of the great English Classics—our English Bible, Shakespeare, etc.—has only been rendered possible by the printing press, while even pronunciation is conservatively affected by the same means. Thus, at the end of the eighteenth century, the aspirate had, we are told, almost disappeared in the pronunciation of all classes; but continuing to be printed, and under the influence of the few who still pronounced it, it was gradually restored. The same thing, it may be hoped, will occur in regard to the pronunciation of the letter *r*, which at the present time has almost disappeared from the spoken language in the South of England except before a vowel. Increased means of communication, combined with the influence of the all-powerful printing press, will no doubt tend more and more to the obliteration of local peculiarities of pronunciation, vocabulary and grammar; and whether for good or evil, uniformity will continue to replace diversity in our English language, as in so many other departments of human affairs.

PRINCIPLES OF GRAMMAR.

GRAMMAR, (from the Greek *γράμμα* "a letter of the alphabet") is the art of speaking, reading, and writing correctly. It is comprised in four main divisions:

1. ORTHOGRAPHY, which treats of letters, syllables, separate words, and spelling.

2. ETYMOLOGY, which explains and describes the sources from which the words of our language come, together with their classes and modifications.

3. SYNTAX, which treats of the relation, agreement, government, and arrangement, of words in sentences.

4. PROSODY, which treats of the laws of poetry, of poetic prose, and in general of VERSIFICATION. The study of punctuation, manner of utterance, and poetical figures, is closely allied with Prosody.

I ORTHOGRAPHY

ORTHOGRAPHY (from Greek *ὀρθογραφία*, "correct writing") is the art of accurate and approved spelling (Anglo-Saxon, *spel*), and is of essential importance in the study of the English language. It cannot be acquired wholly by means of rules, for to keep in mind the requisite number of rules would be an impossible burden; nor is it a more practicable method to learn the spelling of a number of words by rote. A few general principles, however, easily remembered, and based upon custom and tradition, will prevent any person from writing in a way that calls attention to his carelessness in spelling. These principles are given below, and, if carefully studied, will be found more useful than a long treatise on the subject.

The following words ought to begin with capital letters:

The first word of every sentence.
The first word of every line of poetry.
All names, including pronouns, applied to God.
Proper pronouns.
Adjectives derived from proper nouns.
The names of the days of the week.
The names of holidays.
The names of the months.
The pronoun "I."
Any leading name which the author wishes to make emphatic.

When a word ending in silent *e* is increased or augmented by a suffix beginning with a vowel, the *e* is omitted; as, *give, giving; sense, sensible; fame, famous; cure, curable.* The *e* is changed into *i* before *fy* and *ty;* as, *pure, purity, purify; active, activity.* When the silent *e* is preceded by *v, c,* or *g* soft, it is usually retained before *able* and *ous;* as *peace, peaceable; courage, courageous.* The present tendency however is to drop the *e* in words where it is preceded by *v,* as *move, movable; love, lovable.* The *e* is also retained before *ful, less, ly, ment, ness, some, ty;* as, *peaceful, nameless, wisely, excitement, whiteness, wholesome, surety.*

It is an established rule in the English language that words which end with the vowel *e*, and lengthen the sound of a preceding vowel (as in *file, write, endure*), should drop the *e* on receiving a termination and becoming a derivative, if that termination began with a vowel (as *er, ed, ing, ance*). Thus file—*filer*, not *fileer, filing ;* endure, *enduring, endurance*, not *endureance*. But in cases where the *e* affects the sound of a preceding consonant it forms an exception ; as in a word with a soft *g*, or where, in juxtaposition with another *e*, it forms one long vowel ; thus, singe, sing*eing ;* see, see*ing*.

Monosyllabic words ending in a single consonant, not preceded by a long vowel, and words of more than one syllable ending in a single accented consonant, and of course not preceded by a long vowel, *double the final consonant* in all the derivatives which are formed by a termination beginning with a vowel ; as fit, fit*t*ed, fit*t*eth, fit*t*ing ; bar, bar*r*ed, bar*r*eth ; abet, abet*t*ed ; compel, compel*l*ed. Without this doubling of the final consonant, the vowel in the accented syllable of the primitive word (that is the *e* in *abet*) would be pronounced wrongly in the derivative (abetted, etc.), namely, with its long sound —fited, bared, abeted. Hence the reason why verbs having the long sound of a vowel do not double the last consonant ; as *feared, defiled, bloated.*

Words ending in a single consonant, but not having the accent on the last syllable do not double the final consonant in derivatives ; as limit, limi*t*ed ; civil, civi*l*ity ; enter, enter*e*d.

A word ending in *ll* usually drops one *l* on becoming part of a compound word ; as *all, always ; fill, fulfil ; full, fruitful ; till, until.* But there are some exceptions to this rule ; as *recall, refill, uphill ;* which retain the orthography of their monosyllabic roots.

Words ending in *y*, preceded by a consonant, change the *y* into *i* on receiving an augment ; as *holy, holier ; happy, happiness ; pity, pitied,* Exceptions—before *ing, ish,* and *s,* the *y* is retained ; as *flying, babyish,* for *pity's* sake ; also in *dryness, slyly, shyness.*

When the *y* is preceded by a vowel, it is retained ; as *boy, boyish; day, days ; joy, joyful.* Exceptions—*gaiety, said, paid, laid.*

II. ETYMOLOGY.

By Henry Cecil Kennedy Wyld, B.Litt. Oxon.,

Professor of English Language and Philology in the University of Liverpool.

¶1. *Meaning of the Term.*

At the present time, in scientific linguistic works, etymology means the history of words as regards both form and meaning. To trace the history of an English word implies that we show from what earlier forms it has developed, what are its precise relationships to other words with which it is connected in English and other languages, and what are the chief changes of meaning which it has undergone.

We distinguish, in English, as in all languages, between *Native* words, that is, words which belong to the original fabric of the language

from the earliest times, and *Loan-words*, that is, words which have passed into our language, from some other language, at various periods.

In tracing the etymology of *Native* words, it is our business (*a*) to show how they are connected with other related words in English itself; (*b*) what relation they bear to related words, in other cognate languages, more or less remote from English; (*c*) in this way to arrive at some conclusion as to the probable primitive form and meaning of the word we are considering. Thus, if we take Mod. Engl. *queen*, we should have to explain how it is related to the other word spelt *quean*, should point out that these two words went back respectively to O. E. *cwēn*, and *cwĕne*, that this difference is found also in other languages, nearly related to English, *e.g.*, Gothic *qēns*, and *qinō*. Further, we should cite forms from more remote languages, such as Sanscrit, *jāni* and *gnā*, "woman"; Gk., γυνή, βανά, "woman," μνάομαι "to marry"; O. Slav., *Zena*; O. Irish, *ben*, "woman," and so on. This is a comparatively simple business; the change of meaning shown by the various words is very slight. Again, if we had to give the etymology of English *Strawberry*, we should explain that in spite of the fact that the first element was *strēāw*, in O. E. it had not originally anything to do with "straw," but might be connected with Latin *frāgum*, "strawberry," with the Gk. ῥάξ, ῥᾶγός "a grape," and possibly with Sanscrit *sráj*, "a wreath." Thus it would appear that *straw* in the above compound originally meant "a vinous berry," and that more anciently still, it meant a "berry growing on a winding, twisting climbing plant;" earlier still, the plant itself.

¶2. *Position of English among Languages.*

As will be seen by reference to the article on THE ORIGIN AND DEVELOPMENT OF THE ENGLISH LANGUAGE the English language is not an isolated phenomenon among the languages of the earth. It has definite relationships, some close, some remote, to many other tongues. Among modern languages, a very superficial acquaintance with the subject is enough to show that in many ways a remarkable resemblance exists between English and Modern Dutch, Frisian, High German, Danish and Swedish. All these languages have innumerable points of agreement—in *Vocabulary*, extending often to whole classes of words, such as numerals and pronouns; in grammatical forms, involving similar ways of forming the plurals of nouns, the past tenses of verbs, formation suffixes of various kinds, and modes of forming compounds. These resemblances, in spite of numerous points of difference, are so close, and so numerous, that they cannot be the result of chance. If, instead of comparing the modern forms of the above languages, we compare the oldest forms of them, which are preserved in documents, with the oldest documentary form of English, the resemblances are closer still, and involve the whole structure of the language, including Syntax, or the building of sentences. We feel, almost, that we are in the presence, not of so many separate languages, but of various more or less differing

forms of a single tongue. This is indeed the truth. These languages are to be regarded simply as so many dialects which have all sprung from one and the same language. We refer to this language as *Primitive Germanic*, and we speak of its descendants as *Germanic Languages*.

Primitive Germanic no longer survives anywhere, except in its daughters, the Germanic Languages. The mother from which sprang so many dialects and languages split up at an early period into three distinct types, known respectively as *North Germanic*, *East Germanic*, and *West Germanic*. Each of these divisions subsequently split up again into other dialects and groups.

NORTH GERMANIC (The Scandinavian Group) { *Icelandic.* / *Swedish.* / *Danish.* / *Norwegian.*

We speak of *Primitive Norse*, meaning the starting-point of this group. Primitive Norse appears to have remained more or less undifferentiated till about the year 1000. There are inscriptions in the so-called Runic character which go back as far as the 3rd century of our era.

EAST GERMANIC {
- *Gothic*, preserved in documents of the end of 4th century.
- *Vandilic* (the language of the Vandals is known only from proper names on coins, and in the works of Latin and Greek written from 4th and 5th centuries onwards).
- *Burgundian.*

WEST GERMANIC {
- (1) *Anglo-Frisian* {
  - (*a*) Old English (earliest MS. late 7th century).
  - (*b*) Old Frisian (earliest MS. possibly 11th century).
- (2) *Nether German* {
  - (*a*) Nether Frankish (ancestor of Dutch. Oldest remains belong to 13th, 14th and 15th centuries).
  - (*b*) Low German Proper. (Chief dialect Old Saxon preserved in MS. of 9th and 10th centuries).
- (3) *High German* {
  - (*a*) Mid German.—East Thuringian, Upper Saxon, Schlerian (earliest MS. 9th century). West, Mid- Rhine-, and East Frankish (earliest MS. only 9th century).
  - (*b*) Upper German.—Bavarian (earliest documents from 8th century). Allemanic (earliest remains 8th and 9th century).

It appears, then, that English is the descendant of one of the many dialects of Germanic speech, that it belongs to the West Germanic Group, and that its nearest relatives are Old Frisian and the Low German Dialects.

¶3. *The Principles of Etymology.*

It may be said that there are four great principles which underlie modern etymological method. They are :—

(1) Changes take place in the *sounds* of words as *spoken*, not in the *Letters* with which they happen to be *written*.

(2) The Laws of Sound Change admit of no exceptions.

(3) In the main, the fundamental conditions under which language lives, and changes, were the same in the remote past as they are to-day.

(4) In addition to Sound Change, the principle of Analogy is at all times active in determining the form of words.

Each of these principles needs a few comments.

(1) *The Importance of Sounds.*

Language consists of sounds, not of letters. Languages may exist for thousands of years before they are written down. Letters are merely symbols, often very inadequate, which represent sounds. The spelling of a language is more or less arbitrary, though at some periods of their history the written symbols represent an attempt to record the actual sounds used. In dealing with past forms of language we have, of course, to rely upon the written symbol, but we endeavour to form as clear an idea as possible of what sounds the symbols stand for. Language changes on the lips of living speakers, there, and in the minds of the speakers, is the *Life* of language ; there, too, is its evolution and change. Thus a necessary preliminary to the study of the history of language, or of the etymology of words, is the study of phonetics, or the science of speech sounds. Many sound changes are incomprehensible without a knowledge of how sounds are formed by the organs of speech.

(2) *The Invariability of Sound Laws.*

The modern view on this point may be stated thus :— At a given time, in the same dialect, the same sound always tends to change in the same way, under the same conditions. This is another way of saying that the Laws of Sound Change admit of no exceptions. When an apparent "exception" occurs, a deeper investigation reveals one of the following :— (*a*) the Sound Law has been inadequately stated, and needs re-stating ; (*b*) the apparent exception is a loan from some other dialect for which the Sound Law does not hold good ; (*c*) the form in question is not the result of normal sound change, but is due to an association with some other form, which is itself quite normally developed. A good example of (*a*) is seen in what is now known as *Verner's Law*. Following the statement of the case made by Grimm, it was

known that Primitive Aryan *p, t, k* became in Germanic respectively *f, þ* (=*th* as in *think*), and *χ* (=the sound of *ch* in Scots *loch*). In a large proportion of Germanic words this was admittedly true—Gk. *πούς*—Gen. *ποδ-ός*, Lat. *pes*, Gothic *fōt-us*, O. E. *fōt*, etc.; Gk. *κλέπ-τω* "steal," Lat. *clepo*, Goth. *hlifan*, etc.; Lat. *tenuis*, "thin, slender," Gk. *τανύω*, "stretch," *τανύ-γλωσσος* "long-tongued," Scrt. *tanus*, "stretched, long," etc.; O. E. *þynne*, "thin," Icel. *þunno*; Lat. *verto*, "turn," Scrt. *vártate*, "turns," Goth. *wairþan*, "become"; O. E. *weorþan*, ib. vb.; Gk. *καρδία* "heart" Lat, *cord-is* (Gen.), Goth, *hairtō*, O. E. *heorte*, etc.; Latin *lucus*, "grove," place in forest into which light has been let—a clearing; Lith. *laukas*, "field, open country," E. O. *lēāh*, "field," etc. By the side of these, and dozens of other words in which the same sequence occurs, there are numerous forms in Germanic in which Pr. Aryan *p, t, k* are represented by *b̄, d̄, ǯ*, written *b, d, g* in Germanic. [These symbols represent "Voiced Open Consonants," the first, approximately, that of Spanish *b* in *Isabella*, the second the sound of Engl. *th* in *this*, and the third that of German *g* in *sagen*, etc.] These words, of which the classic case of Goth. *fadar*, O. E. *fæder*, "father," = Gk. *πατήρ* Lat. *pater*, etc., must serve as an example, puzzled Grimm himself, and a whole generation of scholars. They used to be included under a separate heading of "Exceptions to Grimm's Law" in the English Text-books. Not until 1877 was the explanation found, by Verner, whose Law may be formulated thus:—Idg. (Indo-Germanic or Aryan) *p, t, k* become in Germanic the corresponding Voiceless Open Consonants, *always*, init ally; and in other positions also, *when the accent in Idg fell upon the syllable immediately preceding them;* but if it fell upon *any other syllable*, the Germanic *f, þ, χ*, are *voiced* that is, become *b̄, d̄, ǯ*. The original accent is generally found in Greek and in Sanscrit. Thus Gk. *φράτηρ* = Goth. *brōþar*, but Gk. *πατήρ* = Goth. *fadar*. Here the law is re-stated, with the further conditions as to the place of the accent included. Not only was the explanation thus given, once for all, of a whole host of "exceptions," but a vitally important principle, and one of far-reaching possibilities for Comparative Philology, was discovered. It should be noticed that we distinguish between *Isolative* and *Combinative* Sound Change. The first class of changes arises spontaneously in a language, and is independent of the nature of the surrounding sounds. The second class is due to the influence of neighbouring sounds in the word or sentence, or to accent. See examples of both classes in Germanic and English below.

(3) *Analogy.*

Words tend to be associated in the mind in groups, according as there is affinity of meaning and of sound, or

because they fall into the same grammatical category. Such words as *father, mother, brother,* form an intimate association group, as belonging to a class of words expressing family relationship. There is again between these words, a further association of sound. *Mother* and *brother* have the same vowel in the first syllable, while the second syllable agrees both in vowel and consonant. *Father,* although it has a different vowel from the other two, in the first syllable, has the same second syllable. Thus there is a double basis association. As regards grammatical category, we associate, to some extent, all verbs together; more closely still those verbs which form their Preterites by a change of vowel, *sing—sang, write—wrote*; yet more closely still verbs which have identical vowels, and vowel changes, such as:

write	*wrote*	*written*	*sing*	*sang*	*sung*
ride	*rode*	*ridden*	*ring*	*rang*	*rung*

Here we have a double association—grammatical category, and sound. Similarly, we associate together the great majority of verbs in English as Weak Verbs. We may classify nouns in our minds according to the method of forming the Pl.—either by adding *-s,* or by changing the vowel, as in *mouse—mice.* Acting on this principle of association, we normally and naturally form constantly Plurals of Nouns, Preterites of Verbs, and so on, according to the pattern of a few models which exist in our minds. We associate certain suffixes, or vowel changes, with the ideas of Plurality, or Past tense, and so on.

It is a matter of common observation that children—"uneducated" persons often make mistakes—such, for example, as *mouses,* on the analogy of *houses,* or *flied,* on the analogy of *tried, cried,* etc.

This sort of thing used to be called "false analogy," because it led to "wrong" results. It should be observed, however, that the mental process itself is the same, and perfectly sound whether the results happen to be "right" or "wrong." In the most polite and civilized language, such as English, the Association groups of the majority of speakers vary somewhat from age to age, with the result that new formations are constantly getting currency in the language—forms, that is, which earlier generations would have called "mistakes."

This principle is active in living languages to-day, and it can be shown to have been so in the remote past. There are innumerable forms in all Aryan languages which have to be explained in this way. In fact, all composition, all inflection starts with the formation of a few types, according to the pattern of which the whole flectional system is gradually built up.

This is an ever-living principle in the development of language, and though with the formation of a standard of

speech, new formations are constantly rejected by the taste of the period, these are always being made by speakers, and in each age a certain number gain permanent footing, and oust the forms of earlier generations. Many forms which the older school of philologists regarded as "exceptions," can be quite easily explained as due to this process of Analogy. It is the business of the student to discover the starting point, or model, according to which the new form has been made.

¶4. *Sound Changes in Aryan : Ablaut or Gradation.*

There is an important group of sound changes, which took place, probably at different periods, in Primitive Aryan itself, classed together under the name of *Gradation* or *Ablaut*. According to the place of the accent, and also probably to the nature of it—including under accent both *Stress* and *Intonation*, the same original root, developed, in Primitive Aryan, various forms, each distinguished by a characteristic vowel. Traces of this principle are found surviving in all Aryan languages, hence we assume that it was operative in the ancestral language from which they are all derived.

A few examples must suffice. These changes are well seen in the so-called "strong" verbs of the Germanic languages, *write, wrote, written ; sit, sat ; sing, sang, sung ; fly, flew, flown ;* etc. etc. But the same kind of changes occur also in cognate words, other than the parts of verbs. Thus, not only are *sit* and *sat* connected, but also *seat*, and *soot*, belong to the same root. In Greek we may take the root φέρ "bear"; we have φέρω, φορά "a carrying, etc."; φώρ "thief, the one who bears something away"; δι-φρ-ος "a chariot board for two," lit. "a carrier." In the last example the original root φερ has dwindled down to φρ.

In Latin we may take *sed-* in *sedeo*, by the side of which we have *sĕd-i*, and in the word *nīdus*, "nest," from **ni-zd-os*, we have again *sed-* dwindled to *-sd-*, which becomes *-zd-* in Italic. The word *ne-st* in English has the same origin. The original meaning of the word is "a settling-down."

The importance of this principle in Etymology is obvious. Every root in every Aryan language may have had a considerable number of forms at one time, though, perhaps, only a few survive into the historical period. The possibilities are known, so that we can say, given a certain vowel, this may have such and such varieties—or, as we should put it, belongs to such and such a series. Thus *ĕ* in *sĕd-* has certain definite possibilities.

Idg.	.. ..	**sĕd*	**sēd*	**sŏd*	**sōd*	**sd*
Lat.	.. ..	*sĕdeo*	*sēd-i*			*nīdus* (from **ni-zd-*)
Greek	..	ἕζομαι = **sed-*				
Gmc.	Goth.	*jomai*	*sētum*	*săt*		
	O. E.	*sēten*	*sæt-on*	*sæt*	*sōt* "soot"	nest.

If we consider that the vowels in each of the forms may be altered still further, by Combinative changes in each of the derived families, and, further still, in each individual language, we see that the possibilities are almost endless. No one can hope to discover all the cognates of an English word, even in O. E., let alone in other Germanic tongues, and, further afield still, in the other families of speech, unless he is fully alive to the infinite possibilities of differentiation which arise from Ablaut.

Space is lacking here to develop this properly, and to discuss the theory of Ablaut. The phenomena of Ablaut are essentially Combinative Changes, due to the influence of Accent.

¶5. *History of English Pronunciation.*

(*a*) *Germanic and West Germanic Sounds in Old English.*

A rigid adherence to the laws of sound change, so far as we can ascertain them, is, as has been said, a fundamental necessity in modern Philological method. In asserting that a group of words from other Aryan languages are related to an English word, we must be careful to show that the form of all the words which we propose to connect is really in accordance with the known laws of sound change in the languages to which they severally belong.

But if it is necessary to know how, and by what process of development an Italic, a Greek, or a Germanic type has arisen from the form in Primitive Aryan, it is no less so, to know how the Germanic type has changed into its West Germanic, and thence into its Old English form. At this point its career as an English word begins, and the history of the form is part of the history of English.

At each period of English, there are characteristic sound changes which affect the form of words. It is our business to study these.

There is only one absolutely direct manner of knowing what a sound is like, and that is by having it uttered. Therefore we can only gain a knowledge of this kind with regard to the speech of our contemporaries.

For the sounds of earlier periods of English than our own we have to depend upon sources of information less direct than our own observation.

The best of these, and only less direct than personal observation, is the description of English sounds given by persons who lived in the earlier periods we are studying, of the pronunciation of themselves and their contemporaries. From the 16th century onwards, we have numerous descriptions of English pronunciation, some good, some bad, given by writers of the different periods. Another guide to the sounds of the past is Rhyme and Metre. From the former, we can at least learn which words had approximately the same sound ; from the latter we can learn something of the

nature of Accentuation, and of which syllables were pronounced. Thus, we know that Chaucer's contemporaries sometimes accentuated *natúre*, sometimes *nâture*, and that they pronounced *foules* "fowls, birds," with two syllables. A third guide, though it must be used warily, is spelling. Down to the invention of printing, and to some extent since, English spelling changed considerably, in many ways, from age to age. If we find the writers of one period always writing *a* in words like *hām* "home," *gāt* "goat," etc., and then the scribes of a later age writing *hom*, *got*, etc., with increasing consistency, we are justified in believing that a sound change of a considerable kind has taken place.

Lastly, there is the help given by Comparative Philology. In Modern English, *gh* in *right*, *sight*, etc., expresses no sound at all. But when we find that the cognates of these words in most other Germanic languages contain a certain kind of consonantal sound (in some cases that of German *ch* in *ich*, in others that of *ch* in German *acht*), it seems more likely that English has lost a sound which once it possessed, than that the other languages should have developed one out of nothing, and that they should have all done so independently. This is confirmed by the fact that Scotch and North of England dialects preserve a similar sound to this day in words of the class mentioned.

We have now to give a brief account of the principal sound changes which took place in English, mostly in the Pre-literary period, which will show the correspondence between the sounds of English and Germanic and West Germanic.

¶6. (A) *Isolative Changes.*

(1) Gmc. and W. Gmc. *au* became O. E. *ēā*, *ēā*: Goth. *augō*, "eye," O. H. G. *ouga*, O. E. *ēage*.

2) Gmc. and W. Gmc. *eu* became O. E. *ēō*: Goth. *kiusan*, "choose," O. E. *cēōsan*.

(3) Gmc. and W. Gmc. *ai* became O. E. *ā*: Goth *haims*, "home," O. H. G. *heim*, O. E. *hām*.

(4) Gmc. *ē*, W. Gmc. *ā* became O. E. *æ*: Goth. *sēþs*, "seed," O. H. G. *sāt*, O. E. *sæd*.

(5) Gmc. and West Gmc. *ă* became O. E. *æ*: Goth. *sat*, O. H. G. *saz*, O. E. *sæt* (Pret. Sing. "sat").

(6) W. Gmc. *iu* became *īē*, later *ȳ* in W.Sax., *ēō* in Mercian, *īō* in Northumbrian: W. Gmc. **kiusiþ*, "chooses," W.Sax. *cīēsþ*, Merc. *cēōseþ*, Northumb, *cīuseþ*.

[W. Gmc. *ē*, *e*, *ī*, *i*, *o*, *ō*, *ū*, *u* are preserved in O. E. unless affected by Combinative Sound Changes.]

(B) *Combinative Changes Affecting West Germanic Vowels.*

(1) *Denasalisation and Lengthening of West Germanic Nasalised Vowels in Old English.*

(*a*) Primitive O. E. inherited from W. Gmc. and Gmc. certain nasalised vowels (similar in character to the French *an* as in *sang*, etc., which, before the historical period, lost their nasality and became simply long vowels. These vowels arose in Gmc. in connection with the loss of nasal consonants, and forms which have lost the nasality generally occur, in O. E. and other Gmc. languages, by the side of other cognate forms, which retain the nasal consonants under other phonetic conditions, *e.g.*, O. E. **þūhte*, "seemed," from **þūhta* (Pret.), but *þyncan* (Inf.) "to seem." If the original vowel before the *n* was *a*, this is first nasalised to *ã*, which is rounded to *õ*, and becomes, in O. E., *ō*, on the loss of nasality, *e.g.*, *þōhte*, "thought" (Pret.), from **þōhta*, earlier **þãhta*, cf. H. G. *dachte*.

(*b*) There is also a group of long vowels in O. E. derived from earlier nasalised vowels which acquired the nasalisation in O. E. itself, in connection with the loss of nasal consonants. (For the conditions under which *n* and *m* were lost, cf. ¶ 7 (1) below). The cognates in Goth, O. H. G., etc., of words of this group preserve their nasal consonants.

O. E. *sīþ* "journey," from *sīþ*, from **sinþ*, Goth. *sinþs*.

Here again, if the vowel before the *n* was *a*, this appears as *ō* in O. E.: *gōs*, "goose," from **gōs*, from **gās*, from **gans*, cf. O. H. G. *gans*, O. E. *tōþ*, from Gmc. **tanþ*, cf. O. H. G. *zan(d)*.

(2) *Fracture before Consonant Groups.*

In Primitive O. E. the vowels *æ*, *e*, *i* are diphthongised to *ea*, *eo*, *io*, before *h*, *h* + another consonant; *æ* also before *ll*, *rr*, or *l*, and *r* + another consonant, but *e* and *i* only before *lc*, *lh*, and the *h* and *r* combinations. These diphthongs are typical of O. E., but exist to some slighter extent also in O. Fris.

O. E. *earm*, "poor," O. H. G. arm; O. E. *eall*, "all," O. H. G. *all*; O. E. *eahta*, O. H. G. *achto*; O. E. *seolh*, "seal," O. H. G. *sel(a)h*; O. E. *eorþe*, "earth," O. H. G. *erda*; O. E. *eoh*, "horse," O. H. G. *ehu*. This process is known as Fracture.

[Fracture of *æ* does not occur in the Anglian dialects, Mercian, and Northumbrian, before ll and l + consonants. The *æ* in Anglian under these conditions remains, and is

then retracted to *a*, which before *ld* is lengthened. Hence Anglian *all*, "all," *ăld*, "old," compared with W. Sax. *eald*, etc.]

(3) *Mutation of Vowels by following -i or -j.*

Early in the 7th century, probably, the vowels *ō*, *ā*, *ū*, *ŭ*, *ă*, *ŏ*, which, of course, were "back vowels," were "fronted" in all cases where they were followed in the next syllable by the vowel *i*, or by the consonant *j* (pronounced like Engl. *y* in *yes*). The result of this "fronting" process was that they appear henceforth as *œ* or *ē* (in W. Sax.), *ā̈*, *ȳ* (= sound of *u* in French *pure*), *y̆*, *ĕ*, and *æ* (or *ḗ*), respectively. A few examples must suffice. It will be seen that in O. E. itself the unmutated forms very often occur also, in those words, cases of nouns, tenses of verbs, etc., in which *i* or *j* did not follow.

O. E. *dōm*, "judgement," etc., but *dēman*, "to judge," "deem," from **dōmjan*.

O. E. *tāc-n*, "sign," *tāh-te*, "taught," but *tæcan*, "to teach," from **tāk-jan*.

O. E. *mūs*, "mouse," Pl. *mȳs*, from **mūsi*.

O. E. *dohter*, "daughter," but (in some texts) Dat. Sing. *dehter*, from **dohtri*.

The short *æ* when followed by *i*, *j* becomes *ĕ* : *settan*, "set," from **sættjan*, *mete*, "meat," from **mæti*.

This is a most important sound change, and a knowledge of it enables us to account for differences of form which occur in many roots in O. E., not only in the different inflections of the same word, but in identical roots which occur in several independent words. It is thus indispensable both in English Etymology and in English Grammar.

The Diphthongs *ēā*, *ēō*, (*īō*) are affected by this process, and become in West Saxon *īē* ; *hīēran*, to bear, from **haurjan*, Goth. *hausjan* ; *iermþu*, "misery," from **armiþu*, **earmiþu*, O. H. G. *armida*. This W. S. *īē* becomes in one part of the W. S. area *ī*, in another *ȳ*, in the late O. E. period. In non-W. S. dialects (the Mod. Engl. type) instead of *īē*, *ý*, we get simply *ē*, *ĕ*, *hēran*, *ermþu*.

¶7. *Combinative Changes Affecting Old English Consonants.* The chief are :—

(1) *Loss of nasal consonants* (*m* and *n*) before *s*, *f*, *þ* : *sīþ* from **sinþ* ; *hȳþ*, "booty," that which is seized, from **hunþi*. cf. Goth. *hinþan*, "to seize" ; (for relation of **hunþi* and *hinþan* cf. ¶ 4) ; *sōfte* "soft," O. H. G. *samfto* ; *nīþan*, "adventure," vb. from *nanþjan*. [The O. E. form has j-mutation of *ō* derived from *ā*, cf. ¶6 (3), cf. also Goth. *nanþjan*, and O. E. *nīþ*, "valour," common in Pers. Ns., such as *Byrhtnīþ*. The same element, probably in a Gothic form, occurs in *Ferdi-nand*.

O. E. *ōs*, " divinity," O. H. G. *ans*.

[The loss of *n*, *m* before *h* is a Gmc. process. cf. ¶ 6, B. 1. (a.)]

(2) *Fronting of Old English c (k) and g.*

Initial O. E. *c* and *g* were " fronted " before all original front vowels (*i*, *e*, *æ*, *ea*, etc.), *c* in this position developed into a sound not unlike our " ch " in " *chin*," etc., and this is the origin of this sound in native English words. O. E. *ceaf*, " chaff," *cin*, " chin," *ceaster*, " city," originally " camp," cf. *Chester*, etc. In the middle of words this fronting of *c* only took place before *i* and *j*—*rīce*, " kingdom," from **rīki-*, *tæcan*, " teach," from **tāk-jan*, cf. *tācn*, " token, sign."

Initial O. E. *g* before front vowels was pronounced like Mod. Engl. *y*—*giefan*, " give," In the middle of words, the same thing happened before *i*, non-W. S. *bygest*, from **bugis(t)*, " thou buyest," etc. Before *j*, *g* became a sound (front stop) not unlike Modern " dge." It is always written *cg*. *bycgan*, " to buy," from *bug-jan*, *brycg*, " bridge," from *brugjō*. This is the origin of the final sounds in Modern *ridge*, *bridge*, etc. With a few possible exceptions in some of the Dialects, the sound here, and in the French *judge*, etc., never occurs *initially* in words of English origin.

¶8. *The Treatment of Old English Sounds in Middle English.*

To give a complete account of M. E. phonology would involve an account of the various dialectal pecularities as revealed in a large number of texts. We are only able here to enumerate the chief characteristics of the leading Midland type, with a few references to other dialects in cases when the characteristics of these appear sporadically in the Literary Dialect.

(*A*) *Changes in Quantity of Vowels.*

(1) *Lengthening of Short Vowels.*

(*a*) The vowels *ă*, *ĕ*, *ŏ* in open syllables, that is, in words of two syllables, when the first ends in a vowel, and the second begins with one consonant, are lengthened in M. E., *e.g.*, O. E. *hŏ-pu*, " hope," M. E. *hō-pe* ; O. E. *mĕ-te*, " meat," M. E. *mē-te* ; O. E. *bă-can*, " to bake," M. E. *bā-ken*. [cf. under (B) 5 and 6 below, for pronunciation of these vowels.] The vowels *i* and *u* in open syllables, were apparently lengthened and lowered to *ē* and *ō* respectively, *e.g.*, O. E. *wi-cu*, " week," M. E. *wēke* ; O. E. *wu-du*, " wood," M. E. *wō-de*.

(*b*) Before certain combinations of consonants, such as *ld*, *nd*, *mb*, short vowels were lengthened, apparently already in Late O. E. : O. E. *cild*, " child," becomes *cīld*, written *child* in M. E. ; O. E. (Mercian) *scĕld* becomes *scēld*, written in M. E. *scheld*, " shield," ; O. E. *hund*, " dog," becomes *hūnd*, written *hound* in M. E., etc.

(2) *Shortening of Original Long Vowels.*

(*a*) O. E. long vowels are shortened in M. E., before most combinations of two consonants other than those mentioned in 1 (*b*) above :—O. E. *wīfmann*, " woman" M. E. *wimman* ; O. E. *gāstlice*, " ghostly, spiritual," M. E. *gāstly, gastliche* ; O. E. *brād*, " broad," M. E. *Brādlei* (place name).

(*b*) If the combinations *-ld, nd*, etc., are followed in compounds by a suffix, or second element beginning with another consonant, the vowel immediately preceding *-ld* is not lengthened in M. E., or, if already long, is shortened :—O. E. *cīld*, Pl. *cĭldru*, M. E. *chīld—chĭldre* ; O. E. *frēond*, " friend," M. E. *frēnd*, but *frĕndschipe*, " friendship."

(*c*) In words of three syllables, with the chief stress or accent on the first syllable, the vowel of this, if long, is shortened, if originally short, is not lengthened, even if it occur in an open syllable :—O. E. *hwītæcer*, M. E. *Whĭtaker* (Mod. Engl. Whitacre, Pl. N.) ; Early M. E. *hŏlidai*, later *hŏlidai*, " holiday,"

(*d*) Long vowels are shortened when they occur in unstressed syllables :—cf. the Modern Pl. Ns. *Kingston, Loftus, Abram*. The second elements in these are O. E. *tūn*, " enclosure," *hūs*, " house," and *hām*, " homestead," respectively—the last being from *Eadburgehām*, " the home of (a lady) *Eadburg*."

(*B*) *Changes in Quality of Vowels in Middle English.*

(1) O. E. *æ* becomes *ă*, first in North and Midlands, and these the *ă* forms very soon spread to the South as well :—O. E. *bæc*, " back," M. E. *băk* ; O. E. *bær* (Pret. Sing.) " bore," M. E. *băr*, etc.

(2) O. E. *ǣ* became *ē* :—*hǣr*, " hair," M. E. *hēr*, O. E. *dǣlan*, " to divide," M. E. *dēlen*. [cf. under (6) below for pronunciation.]

(3) O. E. *ā* became *ō* in South and Midlands :—O. E. *hāl*, M. E. *hōl*, " whole," " sound " ; O. E. *wrāt*, Pret. Sing., " wrote," M. E. *wrōt*. In North England and Scotch O. E. *ā* became *æ* and then *ē*, cf. pronunciation of Scotch *hame*. O. E. *cāld*, (Anglian), " cold," M. E. *cōld*. [cf. under (5) below for pronunciation.]

(4) O. E. *ý*, the mutation of *u* (cf. ¶ 6. B. b. (3) above) remains as a rounded vowel (written *u, ui*) in the whole West and Central Midland area, and to a great extent in the South West :—O. E. *hyll*, M. E. *hull* ; O. E. *brýsan*, M. E. *bruisen*, " bruise." The O. E. *ý* sounds of this origin were unrounded to *ī* in the North and the East Midland (Lincoln, Norfolk, and to some extent in Suffolk), *hill, bridge* (O. E. *brycg*), *brīd*, " bride," O. E. *brýd*. In Kent,

already in O.E., *y* & *ý* had become *e* & *ē*—*senn*, " sin," *ſēr*, " fire," compared with *synn*, *ſýr* in other dialects. This *ē* survives in M. E. in Kent, but the area where it is found now includes also part of Sussex, Essex, and Suffolk, and probably part of Cambridgeshire. Many words of this type, *e.g.*, *knell*, from Kent. *cnellan*, where other dialects have *cnyllan*, exist in Modern Standard and Literary English.

(5) O. E. *ō* survives unaltered in the spelling, except that it is often doubled, but the sound had approached nearer to that of *ū*. O. E. *bōt*, " benefit," M. E. *bot*, *boot*, O. E. *gōd*, M. E. *god*, *good*. [It is important to note that this M. E. *ō* was quite different in sound from the other *ō* (*B* (3)), which had, together with *ō* in A 1 (*a*) the sound, probably of the vowel in Mod. *not*, lengthened.]

(6) O. E. *ē* remains as a long, clear, " tense " vowel, as in *mētan*, " to meet," *tēþ*, " teeth," *hēr*, " here," etc. [This *ē* must be carefully distinguished in pronunciation from the *ē* in *B* (2) above, and from that of *mēte*, etc. (A 1 (*a*)), and in (7) below. The former had the sound, though long, of French *dé*, etc., the latter that of French *ê* in *tête*, etc.]

(7) *The O. E. Diphthongs became monophthongs in M. E.* O. E. *ēā* became *æ* probably in O. E. itself, and this *ē* in M. E. :—O. E. *rēād*, " rid," M. E. *rēde*, O. E. *hēāfod*, " head," M. E. *hēved*, O. E. *cēās*, " chose," M. E. *chēs*. [The sound of this *ē* was that of the *ē* in *mēte*, " meat," on which see (6) above.]

O. E. *ĕă* in *hearm*, " harm," *eart*, " art," first became *æ*, and then *ĕ* in M. E., *herm*, *ert*. These generally appear later as *harm*, *art*, where *ă* can be explained either as due to the Midland development from *ært*, etc., or by the influence of *r*, whereby *er* becomes *ar*. In some dialects, however, the *er* survives, and is seen in the spelling to-day, cf. *Derby*, *clerk*, *hearth*, etc, though all these words have " *ar* " in pronunciation.

O. E. *eo*, *ēō* became *e*, *ē* in the London Dialect :—O. E. *eorþe*, M. E. *erþe*, O. E. *dēōp*, " deep," M. E. *dēpe*.

O. E. *īē* (cf. ¶ 6 *B* (3) above) was confined to W. Sax. This either became *ī* in O. E., in which case it is treated like ordinary *ī*, or became *ý* in Late W. S. The latter sound is only found in the S. West dialects of M. E. where it is written *ui* as in *huiren*, O. E. *hýran*, " hear."

All other dialects have *ē* in O. E., which survives unaltered in M. E., *hēren*, etc. [see (8) below on treatment of *ē*.]

(8) O. E. *ī*, *ē*, *i*, *e*, *ĭ*, *u*, *ŏ*, remained unchanged in M. E., apart from the cases when some of them underwent the Combinative Changes mentioned above.

III. SYNTAX.

By Ritchie Girvan, M.A.

In charge of the Department of English and Teutonic Philology, and Lecturer on English Language), University of Glasgow.

Syntax is that part of Grammar which deals with words in combination, as giving expression to connected thought. Occasionally the word is used in a somewhat restricted sense. Thus, when we make a complete logical analysis of a sentence, we define the interrelation of clause with clause, phrase with phrase, and word with word. This we call *Regimen*, employing the word in a sense somewhat wider than usual, and to this the name Syntax is not seldom appropriated. It embraces what is otherwise described as the "syntax of the sentence" on the one hand, and the "syntax of the parts of speech" on the other. Under this head fall all questions of concord and government (including discussions of gender, number, person, and case), the relation of moods and tenses, and the connection of the various parts, whether by co-ordination (*parataxis*), or subordination (*hypotaxis*), together with the nature and function of the various connective particles. For a full treatment of Syntax however, there must be added a consideration of *Arrangement*, or *Word-order*, *Stress* or *Accent*, and *Intonation* or *Pitch*, for these two influence the meaning, sometimes determine it altogether. Speech is something to which expression is given by the living voice of man: it is not the imperfect image thereof which we symbolise on the written or printed page. In other departments of grammar this fact has for long been adequately appreciated, but in formal treatises on Syntax it has often been forgotten, and too exclusive recourse made to written records. Syntax, too, must primarily take account of spoken speech.

A full investigation of Syntax would require a large volume, for it would have to deal with a vast mass of highly complex detail. A brief account must content itself with an indication of some of the more important principles and tendencies which make themselves manifest.

Everyone is familiar with the four-fold division of grammar into *Phonology*, *Morphology*, *Composition* or *Word-formation*, and *Syntax*. A distinction so rigid as is suggested by these class-names is, however, in a logical consideration of grammar, profitless or even impossible. Much of that which is traditionally treated under other departments belongs really to an investigation of Syntax. Most obvious is the connexion with Morphology. Morphology may indicate the changes which words undergo in inflexion, but logically it ought to be confined to a bare register of these forms. When we assign a meaning or function to any form, we stray into the field of Syntax, because discrimination of that kind involves the conception of other words, other elements, to which the given form is related. We may go further, and assert that the *word*, with which Morphology is concerned, is an abstraction, isolated by a conscious process of thought from the environment in which it occurs. Men speak in sentences, in groups

of sounds, containing some complete conception of the mind, and the separation of these groups into parts (which we call *words*) is arbitrary —traditional and occasionally illogical. On this side Syntax touches closely Phonology and Composition. The sentence has a phonetic of its own, and the *word* is not independent, but may have its form determined by its surroundings, by the construction of the sentence, by stress, and the like. We may point to examples like the French *il a* beside *a-t-il*, German *hie* and *hier*, *da* and *dar*, and Modern English expressions like *the law-r-of-the-land*, *idea-r-of*, *Australia-r- is a large island*. From these English examples there may arise either a new set of forms, *idear*, *lawr*, and the like, or else a new syntactic rule in English touching the treatment of hiatus. Words like *newt*, *nuncle*, *orange*, *t'other*, established, or once established, in English are illustrations of the same tendency. Reduction, quantitative variation, and other changes due to lack of stress, are equally the result of syntactic combination acting on the form of the individual word, and producing permanent change. Finally, the division between simple word and compound is frequently determinable by syntactic considerations alone. The boundary between the two is often indefinite. We say *indeed* is one word, but *to be sure* is not so, but the distinction is merely traditional. Historically considered, many words we regard as simple are compounds, and commonly the result of syntactical juxtaposition. Thus we have Latin *ilico*, *denuo*, German *heute*, and many more. We may add as examples of a different kind of syntactical compound the following :—Διόσκουροι, Θηβαιγενής, *paterfamilias*, *jurisconsultus*, *decemviri*, *respublica*, *England*, *ladyday*, *Newcastle*, *Newfoundland*. Enough has been said to show the influence of Syntax on other departments of grammar, which are, as a rule, dealt with in complete separation from it.

Speech is an activity of the mind, but it does not issue in words as conceived, except rarely, *e.g.*, in the case of imperatives like *Come*, *Go*. An artificial order is the normal, one which has regard rather to the hearer than the speaker. This order has crystallised into types, and on them we base our grouping, *i.e.*, on the analogy of common usage. The psychical processes nevertheless, remain prominent, and often intrude, transgressing the rules of this typical arrangement, and the result is *anacoluthon*, *solecism*, or other impropriety. Thus in the expression *I am great friends with your uncle*, the use of the plural *friends* is an anacoluthon in the structure, and is to be explained only by the prominence of the plural idea in the mind of the speaker. The ideas *I* and *your uncle* are simultaneously present in the mind and determine the formal inflexion in *friends*. Variation may occur in expression, because the analogical types are many, and since these occasionally cross, error may arise by the mixture of two. Thus a statement may be begun in accordance with one form, and ended in accordance with another. Such variations from the usual are equally psychical in origin. The only logic by which the mind proceeds is the dominant analogical group of the moment. They are the logical, and so the correct, speakers, who by mental training and equipment are able to isolate and control one type out

of the many alternative types which the mind presents in turn. More complicated speech-groups like English show other sources of variation, *e.g.*, dialectal. In such cases the error against idiom is due to adherence to a different idiom. The misuse of *shall* and *will* in Scotch and Irish is due to a different distinction or to an absence of distinction in those dialects. They did not share in the characteristic development which took place in Standard English. Yet neither there nor elsewhere do logical or historical considerations play any part in discriminating between the admissible and the inadmissible in speech. Language does not proceed on such lines. Historical Syntax may be useful in explaining the exceptional: modern usage disregards the explanation. The mind invents new explanations, new distinctions, continually forms new groups and bases new analogues upon them. With each change in language Syntax must ever fit itself to new demands, satisfy new needs.

The most important event for the development of Modern English Syntax was the break down of the English inflexional system. Distinctions were in large measure obliterated not only within a group, *e.g.*, case-distinctions and modal distinctions, but also between one group and another. To put it otherwise words tended to assume an absolute form without determinant of class or group. The word *black* may be noun, verb, adjective, or even adverb. The form of the word does not tell anything about its class or function. Similarly *end* may be noun or verb, and the same may be postulated of a great number of others. Distinction between the various groups and classes has in large measure disappeared in consequence. The transference of a word from one to the other is easy. It is characteristic of English that verb may pass into noun, and noun into verb very easily, and this power has been developed on the analogy of that very large class which had an identical form for each. Examples are *end, sorrow, command, demand.* The consequence is that English Syntax tends to throw on to associated words, such as prepositions or auxiliaries, or on to the context, the work of determining the meaning in each case. The character and arrangement of the sentence is charged with a new requirement. The sentence and not the end becomes the unit of understanding.

We may consider this point more closely in connection with inflexional endings. In highly inflexional languages, including the older stages of English, the case relation of the word was expressed in its own form—in the case ending. Thus men said *gladio interfectus, sweordum aswefede,* expressing the instrumental relation by the ending *-o* in *gladio,* by *-um* in *sweordum.* After the obliteration of case distinctions in English other means had to be found. Putting aside the genitive or possessive form in *'s,* we have in English no noun cases; we have instead an *absolute* form, and the case relation is transferred to an accompanying determinant: *with, to, by, in, on, of, from, at,* and the like. These determinants, though of similar force to inflexion, are yet not inflexions because they maintain an independent existence. When no determinant is used, arrangement takes the place of case. In such a language as Latin we find great freedom of ar-

rangement. Old English retained some of that freedom, but Modern English lost it with the case distinctions. We may say in Latin *Caesarem Brutus interfecit*, and whatever the order, the relation between the words is still determined by the form of each. We may alter the centre of gravity (so to speak) by varying the order, but the content remains the same. In English we must put the words in a fixed order: *Brutus killed Caesar*. The meaning varies with varying order. Take the absolute form *boy* and *man* in English. *The boy saw the man, the man saw the boy, the boy the man saw*: in each example a different arrangement of the absolute form gives a different sense to the whole. English substitutes a positional for a morphological distinction. Again, if I say, *I gave the boy a book*, or *I wrote your sister a letter*, we may call *boy* and *sister* dative case, but we do so merely on historical grounds. We cannot tell from them what they are. Here, too, the positional relation is present. We cannot say *I gave a book the boy, I wrote a letter your sister*, but only, if that arrangement be employed, *to the boy, to your sister*. Even where there is more excuse for claiming a case distinction —in the pronoun—the same rule applies: *I gave him the prize* or else *I gave the prize to him*.

In the noun the genitive maintains a case-form in *'s*, but the idea of case is somewhat diminished in Modern English, and we ought to look upon it, too, as rather a case determinant than a case inflexion. This view is supported by the following considerations. The use of this form becomes more and more restricted. It is almost a rule to avoid applying it to inanimate objects. We avoid saying *the house's front looks west*, substituting rather *the front of the house*, or else commonly an appositional relation *the house front*. The position which forms with *'s* may adopt in the sentence is more or less rigid. We say *John's horse, your father's name*, but not *horse John's, name your father's*. It is evident that the position has something to do with the relation of the words. Finally the determinant itself has developed a great freedom in position. It is removable to a great distance from the word to which historically it belongs, and may be attached to a whole connected phrase or clause. In older English men said *the King's sister of England, the King's sister Henry*; now we say *the King of England's sister. King Henry's sister*, or *the sister of King Henry*. On the analogy of such an expression as *the man's arrival was belated*, we say colloquially *the man whom we looked for's arrival*. It is clear that we are not dealing with any real *inflexion* in such cases.

In the pronoun the matter is more complicated. We meet three forms in Modern English which, from the historical point of view, represent a Nominative, Genitive, and Dative-Accusative: *he, his, him; she her, her; they, their, them; who, whose, whom*, etc. The genitive forms (*my, our, his, her, your, their*) maintain themselves, but the tendency to dissociation is plain. Hence come forms like *yours, ours, theirs, hers*, and the vulgar *mines*. This can only be due to the loss of the case idea in *your, our, their, her, mine*, which become more and more mere adjectival attributes. *This is John's book and*

that is yours : ours is different. The origin of the *s* is not obscure. *Whose* and *his* are preserved by their form. *Whose* stands to *who* as *man's* to *man*, and by the same analogy is now-a-days largely restricted to the personal use (like *who*), yielding place to the form *of which* in other relations.

In regard to the other pronominal inflexions, the tendency is to abandon the distinction between Nominative and Accusative in favour of a distinction between an introductory form and an absolute form. Thus arises the use of *who* instead of *whom*, (which in the dialects has indeed died out altogether). *Who hath he left behind him general? Who would'st thou serve? Who has he come for? Who are you speaking to?* and the like. It is the position of *who* at the beginning which determines its form. Similarly, and aided, no doubt, in all cases by the analogy of *you*, we have *It's me, Be thou me, impetuous one, Heedless of grammar, they all cried, that's him.* In dependent clauses if the introductory force is felt, the same rule applies, but if ellipsis of the verb occurs the tendency grows to use an absolute form. Thus *The nations not so blest as thee*, and the still vulgar usage like *I'm every bit as good as him*, or else *as he is*. The same holds true after comparative adjectives and adverbs. We find in vulgar and colloquial use, *I work harder than him*, beside *harder than he does*. In the normal usage, *I play better than you*, beside *better than you do*, we have in fact the same variation. The use of *do* shows plainly that the relation between *play* and *you* has disappeared from consciousness, and this is still more marked when numbers or persons differ, as in *He plays better than you* or *better than you do, John and James work harder than he does*. From that analogy springs in vulgar speech the variation, *he works as hard as I do, he works as hard as me*. This view is confirmed by the modern development of *like* (which is already widely spread in educated use) : *He thinks like me*, whence *He thinks like I do*. There is a transference of function in *like, than, as*, but that is the kind of thing which happens daily in language. In one case a difference of sense keeps a distinction alive. It may be illustrated by the sentences, *you like him better than I* and *you like him better than me*. Too much has been made of this point. It is worthy of remark that English has to dispense with the distinction in the case of *you* and of all nouns. So there might be an ambiguity in *I like him more than you, You consider your ease more than your friend*. We depend on other means, *e.g.*, on stress variation to avoid the ambiguity in such cases, and it is undoubtedly the tendency of modern Syntax to supply the verb invariably whenever the parallelism of subject is felt.

Tendencies of a similar nature may be detected in the Syntax of the verb. English maintains tense distinctions, and to a limited extent distinctions of person and number, but in the main has adopted an absolute form (like the noun), and depends on the use of auxiliaries, or the arrangement of the sentence, for syntactical discrimination. Thus in *walked* we may say *I walked a mile* or *I have walked a mile* without variation of form. Other words determine the sense : there is nothing in the form of *walked* to indicate whether it is subjunctive

or indicative, finite or participial. If we say *let me see your face.* it is possible to call *see* an infinitive, but it is only so from the point of view of historical Syntax. In any case, we cannot tell apart from the sentence what it is : so far as form goes, it is merely the absolute form of the verb. The same lack of distinctive form is evident in the majority of verbs. Only a minority shows variation, *e.g., seen* and *saw ; ridden* and *rode ; lain* and *lay ;* and the tendency of language is now, and has been in the past, to reduce the number still further. As in the nouns, the necessity for new methods of expression arose with the obliteration of inflexional distinctions.

We may consider the question briefly as it affects the moods. In the Greek expression ὦ παῖ γένοιο παιρὸς εὐτυχέστερος, or in Latin *fiat justitia, cedant arma togae,* even in German *hätte ich eine Braut,* the modal idea is expressed in the verb form. In English we must employ a periphrasis, because the distinction between the moods has been lost. At the same time, the feeling for the subjunctive in sentence structure has in large measure disappeared. For example, we no longer retain its Old English use in indirect statement. There is a distinction of form preserved in the third singular and it is used in the literary language, and occasionally in speech, but, except in phrases like *God help us, God punish you, please God, come what may, try as I would,* it is hardly in living colloquial use. The phrases quoted are really tags with a phrasal unity in them, and even in them the modal idea is no longer felt. In other cases where the subjunctive form is introduced by *if, unless, though, whether,* the stress of the idea has shifted to the conjunction, and the normal usage is to substitute the indicative form. *If he come I shall see him* now-a-days is commonly *if he comes.* So too, we say *whether he wins or loses, unless he tells me I shan't hear,* not *win, lose,* and *tell.* In the substantive verb, owing to the marked diversity of form, the distinction lingers longer, but it, too, is dying. *If he be guilty* and such expressions are still in colloquial use, but only among careful speakers. Those who use language more carelessly say simply *if he is guilty* ; and, if some prominence is given to the doubt, emphasise the particle more strongly. The transference of the sense of doubt to the particle is more evident still in the propensity shared by many, to indicate it (especially in reply) by the use of the particle alone with strong stress upon it : *Well, I shall see him if he's there. Yes ! If ! Were,* used to express unreal hypothesis, is frequent in educated speech ; elsewhere its existence is precarious.

We may conclude our investigation of these forms by repeating that everywhere the tendency is growing to reduce conceptual words to an absolute form, modified in one direction or another by functional determinants outside and independent of them. The boundary, however, between the two groups is fleeting and indefinite (as for instance in the words *have* and *do,* which may belong to either group), and there is accordingly no probability that a future grammar of English will be built on a distinction between conceptual and functional. It may be added that tense in the verb and number in the noun show no sign of yielding.

The treatment of number in English illustrates chiefly the principle of shedding needless repetition of the same distinction, or needless subtlety of indication. Modern English retains two numbers, singular and plural. There are relics of a dual in Old English, and these lingered down to the 13th century. It was an unnecessary form, and is obsolescent in most languages from very early times. The adjective lost its number when it dropped its inflexional endings at the close of the 14th century: the noun, pronoun and verb retain a distinction between singular and plural. The reduction has been gain, for there is no obvious advantage in the continued repetition of the same notion, and yet, so long as the adjective had a singular and a plural form, the concord of number had to be maintained too. In such an Old English sentence as *ealla othra cristina thioda sumne dæl hiora. . . wendon* = *all other Christian peoples translated a portion of them*, the plural is repeated five times, while the Modern English translation renders it only once. The modern repetition in *these good men* is due to the necessity for a plural in the independent use of the pronoun, and the need for the distinction is shown by its introduction (amongst the vulgar) into those pronouns which have it not, *e.g.*, *yous* or *yez* beside *you*. The 18th century *you was* beside *you were*, though it miscarried, was an indication of the same need. The verb has a separate form only in the third person singular of the present, and vulgar usage moves in the direction of restricting its employment. From a psychological point of view, it is, perhaps, valueless, but it is impossible to prophesy that the future will see its disappearance.

In the noun the notion of plurality inheres partly in the form—in the plural inflexion—and partly in the psychical concept, especially in the case of collectives and the like. In the former case the concord of noun and verb is not broken in educated speech. In the latter case we find fluctuation, but the plural prevails; the idea of totality is less prominent than that of multiplicity. From early times collectives have tended to take a plural verb, the more commonly the more distant the verb from its subject. Thus we have the common construction of such words as *foe*, *enemy*, *committee*, *Senate*, *House of Commons*, with a verb in the plural. *None* and (less markedly) *neither*, *each*, *many a* partake in a sense of plurality; wherefore they are occasionally construed as plurals. This is very common in the case of *none*. It has been divorced from *no one* and from the negative sense, and has acquired a positive value on the analogy of, and in contrast to, *all*. Its continued use as singular seems to be due to an artificial recollection of its origin. In the apparently false concords *these kind of men*, *these sort of people*, *kind of man*, *sort of people* are phrasal compounds which have shifted the stress of the idea to *man* and *people* respectively.

The simplification due to loss of gender hardly calls for remark. The variations *he*, *she*; *his*, *him*, *her* are scarcely gender distinctions at all, but rather sex forms designed to indicate other relations than grammatical. The lack of a common form in the singular has led to the colloquial use of the plural *they* and *their* For instance, *each*

candidate must write in his or her book the number of the table at which he or she sits would yield to *their book, they sit* in colloquial speech. More careful speakers avoid the difficulty by employing a different form of sentence. The attribution (often fanciful) of a generic sex to certain classes of animals, as *dog* and *cat*, is not a matter of gender, for it necessitates no grammatical concord ; no more is that species of personification by which sex (occasionally in contradiction of the historical gender) is applied to various inanimate objects, or abstract conceptions.

Other points of syntactical development may be dismissed in a few words. *Stress* (as noted from time to time in the foregoing part) is largely developed in English as a means of syntactical discrimination, to indicate emphasis, contrast, and the like. Differing incidence of stress may alter very greatly the meaning of a sentence. We may pronounce the words *I sold that book* with four different positions of the chief stress, and with each variation we extract a different value. In literary use, inversion or exceptional order sometimes takes the place of stress, but more often the two are combined, and in spoken English we commonly rely on stress alone. Similarly variations in pitch may determine the meaning without regard to the order or government of the words employed. This may be illustrated by the expression *he is your friend*, which may be either assertion or question according to the intonation, or by the varying shades of meaning to be extracted from the particles *yes* and *no*, according to the intonation with which they are uttered. A complete account of stress and pitch as elements in the sentence would require a separate treatise : enough has been said to indicate their importance.

IV. PUNCTUATION.

Punctuation or Pointing is the indication of certain natural divisions in a written or printed composition. Its aim is, by marking off these divisions, to facilitate understanding, and the divisions themselves are effected by means of certain symbols which are employed in a fixed value, and called punctuation marks or marks of punctuation. In one sense any indication of division may be included under the term Punctuation. Thus in a volume the separation of Book, Part, or Chapter by breaking the page, of Section or Paragraph by breaking the line or by spacing, or by the employment of symbols (such as ¶ or § which are common in more or less scientific works) may be called Punctuation ; no less may the capitals at the beginning of a new sentence in prose or of a new line in poetry. But the name is usually employed in a narrower sense, and confined to those symbols employed to separate one sentence from another, and, within the sentence, to distinguish the different parts. So used it includes the *Period, Colon, Semicolon, Comma, Parenthesis,* and *Dash.* These serve merely to indicate varying degrees of separation, and strictly speaking these are the only punctuation marks. It is usual, however, to add two more : the *Interrogation mark* and the *Exclamation mark.*

These are not primarily marks of separation or division. They exercise a function in the sentence; they add, however, needlessly, to the sense of the words to which they are subjoined. Hence their significance is rather rhetorical. The *Dash* is occasionally employed in a rhetorical sense.

Three kinds of punctuation have been in use at various times, a rhetorical, a grammatical, and a logical method. The first has reference more to delivery, and takes into account the natural pauses, and the natural fall of the voice. The second is ordered according to the construction, and isolates by points what is grammatically related. The third proceeds according to the sense, the meaning. The three methods are not mutually exclusive. Not seldom it happens that the pause or division falls at the same point in each, but it is not necessary that this should be so. Modern English punctuation is to a considerable extent a compromise between the three, but it is based mainly on the last. The tendency towards a logical method has been greatly accelerated by the simplification in the structure of English sentences. It has been said that the better is the composition, the less it needs punctuation; and certainly the habit of our time is to employ marks of punctuation as sparingly as possible, and mostly only when the sense demands their aid. With this habit is connected the virtual neglect of the *colon*, to some extent even of the *semicolon* in modern writing, and the greater dependence shown on *period* and *comma*.

The marks of punctuation proceed on a scale from greater to less. The heavier the point used the longer the pause between the parts, or the greater the contrast or separation between them. Normally the length of pause, and the degree of separation coincide, as may be seen by comparing such an expression as *he came, and I left* (also without the *comma*) and *he came; and I left*.

Stress is not indicated in modern punctuation except by implication. In printing, a sparing use is made of italics, of capitals, and of spaced or leaded type, to call attention to some word or phrase specially emphasised; yet without principle, and better writers avoid the habit.

In the following the more important uses of the points used in English are briefly summarised. A full discussion of the uses of each could be carried through only by the citation of a vast multitude of examples.

The *Period* or *full stop* (.) is used to indicate the close of a sentence. In these days it is constantly employed when earlier generations would have written a *colon* or even a *semicolon*. The *period* is not written after sentences which are provided with points of interrogation or exclamation. A *period* is also written after abbreviations, *e.g.*, U.S.A., K.G., LL.D., P.M., A.D., Mass., *etc.*, *et sqq.* and the like.

The *colon* (:) marks a pause less complete than the *period*. In these days its chief uses are two, to introduce a lengthy quotation, or something almost equivalent to a quotation, a summing up, or a conclusion, and to introduce an ennumeration of examples. In the latter case it is often followed by the *dash* (:—).

The *semicolon* (;) makes a more emphatic break in sense or structure than the *comma*. Especially it separates co-ordinate clauses contrasted with one another. In two parallel clauses with omitted conjunction the *semicolon* is proper; if the conjunctions be expressed a *comma* may suffice.

The *comma* (,) has a great variety of uses, but it is used a good deal more sparingly than formerly. It separates words, phrases, or clauses in co-ordinate or appositional relation. It is employed to mark off a parenthetical clause or phrase which interrupts the construction, and sometimes when it is necessary to avoid ambiguity, or to distinguish between the restrictive and non-restrictive use of a pronoun. Compare the following examples: *The prisoner said the witness had lied* and the same with *commas* after *prisoner* and *witness*; *go to the hotel where you are known* compared with *go to the hotel, where you are known*. In the second example the limiting force is removed by the *comma*. The *comma* is also used after a vocative when the sentence is not complete at that point.

The *parenthesis*, indicated by a round bracket ( ) or by a double dash, marks out an explanatory or interpolated comment. It is independent of the construction of the rest of the sentence.

The *dash* (—) is used to indicate a break off or suspension of the sense or construction, to show hesitation, or doubt, also sometimes to point an antithesis, an epigram, or the like. The mark (. . . .) is used occasionally instead, but not in the last sense. Compare *It is not a revolt—it is a revolution.*

The *mark of exclamation* or *admiration* (!) is used to indicate exclamations or interrogations, also to direct special attention to some passage or word, usually with a view to ridicule.

The *point* or *mark* or *note of interrogation* (?) is used after direct questions whether they are in inverted order, *e.g.*, *are you he?* or otherwise expressed *you are he?* It is not used in declamatory statements put in the form of a question. Added to single words, as a rule between brackets, it expresses doubt or disbelief.

The following are not punctuation marks, but they may be conveniently added in this place. *Quotation marks* or *Inverted commas* (" ") are employed to denote that the words enclosed are the actual words of some speaker or writer. A quotation within a quotati n is marked sometimes by the use of the single pair of *inverted commas* (' '). In addition these marks are used in the various senses of *italics* indicated below, which conversely can be substituted for the quotation marks.

Italics are used to denote foreign words or words not completely naturalised, words used in an unusual sense, and in the titles of books, names of ships, and the like.

Other forms which occur in writing or printing are these :—

i. Marks of grammatical relation (*a*) the *apostrophe* to indicate an omitted letter, and the genitival *'s*.; (*b*) the *hyphen* to indicate compounds still felt as such, and to show connection when a word is broken at the end of a line.

ii. Marks of pronounciation and quantity (*a*) *diæresis* (¨) placed over the second of two adjoining vowels to indicate their separate

pronounciation; (*b*) the *breve* (˘) *macron* (–), and circumflex (ˆ ˆ), which indicate quantity in vowels (the first shortness, the others length) and chiefly occur in discussions of prosody.

iii. A series of symbols which call attention to remarkable or defective passages or words. These are used without any system, or uniformity of meaning. The more usual are the *asterisk* (*) and the *obelus* or *dagger* (†). The *caret* (ˆ) used in MSS. to denote that something has been omitted and should be inserted in that place may be mentioned along with these.

iv. Brackets of various form are used to indicate that the word or words so enclosed are to be omitted, or inserted, or supplied to complete or explain the sense.

V. VERSIFICATION AND PROSODY.

By Professor George Saintsbury, M.A., LL.D., D.Litt.
Professor of Rhetoric and English Literature, University of Edinburgh.

An ear of ordinary quickness and sensitiveness, when it hears a passage of what is called verse, and one of what is called prose, read or recited, with no special graces of elocution, but in the ordinary fashion, cannot fail to recognise a certain difference between them. It may, or may not, require some amount of training to enable it to recognise, further, that this difference is less a matter of *opposition* than of *degree*—that both verse and prose possess something in common, but that verse possesses it much more *eminently*, and, above all, much more *regularly*, than prose. This something will again, soon, by intuition or teaching, be seen to be connected with the sound-order of the words. This sound-order is called in both rhythm (" flow "). The special regularisation and systematisation of it in verse is called metre (" measure "). And the rules, systems, and principles of the construction of metre are collectively called versification, or prosody.

So, again, no direction will be required in some cases, very little in any of the more intelligent, to enable the ear to recognise further that the basis of rhythm in both prose and verse, of metre in verse, is a difference in the sound of adjacent syllables, which may be least controversially described by the mathematical terms *plus* and *minus*. If every syllable in a passage of whatever length were pronounced with absolute monotony as to all the qualities of speech—loudness, duration, stress, pitch, and what not—there would be no rhythm, properly so called, and no metre at all. But in actual life—save for some very rare and special purpose—there always is such a difference. Exactly what causes it, and in what terms it is to be spoken of, in the case of rhythm and metre, are questions, unluckily, of a most controversial character. It should be an undeniable fact, though it is impossible to prevent denial of it—that the answers to these questions are of no real importance to the study of prosody. The fact of the differences, and the way in which they are arranged, are the only points of such importance, and these are not affected, whether the *plus* syllables be technically " long," " strong," " high,"

" accented," or " stressed," on the one hand, or whether the *minus* be " short," " weak," " low," " unaccented," or " unstressed," on the other. Always there remains to the ear the difference between the pairs, and the way in which the different individuals are grouped for rhythmical and metrical purposes.

The classical poets had a very perfect and stable system of versification, based on the recognition of these two facts. They thought (perhaps rightly in their own case) that the cause of the difference was actual duration in the *time* of speaking, and so they called the two kinds of pronounced syllables " long " and " short "—terms which, until very recently, have been adopted without cavil for the corresponding difference in English. In the last two centuries, however, scruples have arisen as to the propriety of the use of these terms—owing to a dispute about the correct application of their general meanings. " Accent," and not duration of utterance, is said to be the deciding cause of the difference with us. As a matter of fact, it is only one such cause, though no doubt one of the most frequent. But we have nothing, at the stage at which verse (and, indeed, prose) is constituted, to do with these causes. We only want appellations for their results : and for these " long " and " short " will do rather better than any others, if they are taken as strictly " proper," or " technical," terms. As a matter of fact, again, a syllable, accented in ordinary pronunciation, is not very unfrequently " short " in English verse, and a syllable unaccented in such pronunciation is very often, in fact quite frequently " long." " Commonness," or the faculty of being either " long " or " short " at pleasure, was by no means unknown in Latin, and even more frequent in Greek ; but it is very much more frequent in English than in either. Its presence in the classical languages shows that it is no bar to a " foot " system composed of the two values.

In the grouping, indeed, of these two values, and in the recognition of the fact that " short " syllables play as necessary, though not as prominent, a part as " long "—lies the whole business of versification, or prosody. It is one of the weaknesses of the accentual system that it tends to a neglect of the so-called " unaccented " syllables, so much so, that some of its advocates have described these unfortunates as " left to take care of themselves." In a really scientific and artistic system of prosody, no syllable is left to take care of itself ; though a very few " tickets-of-leave " are occasionally given on definite principles.

The main point—the grouping of syllables of the two, *plus* and *minus*, " long " and " short," values—is, of course, subject to the universal laws of mathematical permutation. To resume the time-honoured symbols for this special form of *plus*-ness and *minus*-ity—— for long and ˘ for short—you can, of course, have the following obvious arrangements in groups of two and three to begin with :—

All these combinations were actually used in Greek-Latin prosody, and names, sometimes fanciful, sometimes strictly accurate as to meaning, were attached to the resulting "feet," as they were called, from the line being supposed to "run" on them. These names, corresponding to the symbols above, were :—

Iamb.	Tribrach.	Amphibrach.
Trochee.	Molossus.	Cretic *or* Amphimacer.
Spondee.	Dactyl.	Antibacchic.
Pyrrhic.	Anapæst.	Bacchic.

A new objection of prudery, corresponding to that mentioned above, has been raised recently to the use of these terms in and for English. This objection is even less well-founded than the other; for the names are still more strictly *appellative*, and are only used as such for the corresponding combinations.

Nor, as a matter of fact, are all these combinations commonly found with us, though practically the whole of our poetry is composed of some of them. The iamb, the trochee, and the anapæst are the commonest; and hardly any others supply the base-stuff of our ordinary metres. The dactyl and spondee are found, but not very commonly, and the combination of them—a very staple in Greek and Latin—is very questionably admissible in English, though people have been trying to write English "hexameters" for some 400 years. The tribrach occurs, especially in modern verse, but it is doubtful whether any one of the others, as an actual "foot," is necessary or desirable with us. Examples :—

Pure iambic:

Whĭch ŏft | wās thoūght | bŭt ne-ĕr | sŏ wēll | ĕxprēssed.

Pure trochaic:

Pūrple | gaūzĕs | goldĕn | hāzĕs | līquĭd | māzes.

Pure anapæstic:

And hĭs cō | hŏrts wĕre gleām | ĭng ĭn pūr | plĕ and gōld.

Lines of this kind can be *combined* in almost endless variety—in *couplets* (the famous "Heroic" of two five-foot iambics being the best known), *triplets*, such as Tennyson's *Two Voices*, quatrains (Gray's *Elegy*), and innumerable *stanzas* of all kinds and shapes, from the familiar *ballad*, or *common* measure of four lines, alternately rhymed and composed of four and three, four and three, iambics, to the elaborate rhyme-royal (7 lines), Spenserian (9), Sonnet (14 variously arranged), and even groups of a score or more lines varied by line-length and rhyme-arrangement at the pleasure of the poet and for that of the reader (examples innumerable from Spenser's *Epithalamion* and *Prothalamion*, through Milton's *Lycidas*, and the choruses of *Samson Agonistes*, to the masterpieces of Tennyson and Swinburne).

If, however, when the poet had once chosen his base-foot, and fixed on the combination of it, he were then strictly bound to that foot and none other, to that combination in its strictest form, a very dreary monotony would result. Something of this kind was actually thought orthodox in the eighteenth century, with results certainly prejudicial to the pleasure-giving qualities and the lasting fame of its

poetry. This arose, however, from the neglect of a great principle which had been (no doubt without deliberation) constantly used in English verse, and which, for the last 100 or 120 years, though never universally recognised and often partially grumbled at, has been restored, with the acknowledgment of some and the practice of almost all of the great poets of the generation of 1798–1830, of their followers, headed by Tennyson and Browning, and of all the best of the major poets of the last quarter of a century.

This principle, the most important by far in English prosody, and, in fact, its very soul and constituting difference, is that of a wide and liberal, but not indiscriminate, *substitution* of *equivalent* feet in the line. This same principle existed, but only partially, and subject to rather arbitrary laws, in classical versification; it is entirely absent from regular French poetry; it is questionably present in Italian and Spanish; more undeniably so, but, still, not very largely in German; ubiquitous—save during the 18th century—omnipotent, and all-beneficial in English.

Its admission, however, does not imply that of a disorderly hodge-podge, or huddle, of feet. Every foot is not admissible in the place of every other; nor does every metre allow the same substitution of even strictly equivalent feet. There is no space to deal with all the minutiæ of the process here; but a few examples, and some general inductions, will suffice for the purpose.

The great staple line of English poetry is, as has been said, the iambic five-foot (*not* "pentameter," which would mean five *double* feet), or, as it sometimes called, from its lowest possible terms—the "decasyllable." But an unbroken succession of such lines as that famous one of Pope's, given above, would be intolerably monotonous. In all good English verse, therefore (except in some written deliberately and arbitrarily without them), there will be found exceptions to the number of syllables, and still more important exceptions to the arrangement of "long" and "short" syllables. In other words, trochees (— ⏑) and anapæsts (⏑ ⏑ —) make their appearance beyond all reasonable dispute; spondees (— —) beyond much; tribrachs (⏑ ⏑ ⏑) with fair possibility of argumentative support; other feet very dubiously. Thus in Tennyson's

In twelve | great bat | tles ru | *ining o* | ver thrown,

the fourth foot is an anapæst, and in Milton's

Doing | or suff | ering,

the first is a trochee. It is difficult to see how a famous passage in *Paradise Lost*

Both stood
Both turned

is to be scanned except by spondees, and so in other cases.

Strange objections have, however, been taken to this simple and yet widely applicable system. At one time people tried to escape the anapæst by slurring or jamming syllables together ("elision") and making such sounds as "om'nous," "vi'let," nay, even suppressing long syllables like the preposition "by," or necessarily independent ones like the second of "riot," and suggesting ludicrous things like 's'oft" for "so oft." The use of the trochee some of them regarded

as an actual crime, others as a license, to be winked at occasionally, but disapproved in principle. All this is mere mistake. The unbroken testimony of English verse, since it became fully English in the 13th century, confirms the admissibility of the trisyllabic foot.

It was by use of this license, joined to that of another, that Shakespeare succeeded in turning the fine but rather monotonous blank verse of his immediate predecessors into the wonderful vehicle of his own middle and later plays; and by it that he fashioned the still more wonderful lyrics, which still remain the constantly followed, but rarely approached, patterns of the greatest English poets. The other "license" above referred to concerned the "pause," or break in the run of the verse, not necessarily or even preferably found at the end of a foot. This pause, or, as the Romans called it, *cæsura*, has been in some cases, and still is, to some extent, in French, restricted to certain places of the line; and during part of the history of English poetry, there was an idea that it ought to be so with us. Here, also, Shakespeare came, and was thereafter always ready to come, to the rescue, showing that magnificent verse could be produced, and its production positively helped, by allowing this pause to occur at any syllable of the line, or nowhere at all. In this respect (as also, according to preferable opinion, in the other), Milton followed him; and, indeed, it may be said that from and in Milton and Shakespeare almost every sound principle of English prosody may be discovered and exemplified, though, of course, even the two together have not left examples of every particular form in the practically endless arrangements of line and rhythm-combination in English.

"Blank verse," though seemingly the simplest of these combinations, is by no means the oldest; in fact, it did not make its appearance until the 16th century, and was then copied from Italian. But the very oldest English versification had been of the "blank" (that is to say, rhymeless) kind, the rhythm of Anglo-Saxon or Old English having no rhyme, and being divided into groups, not properly to be called "feet," but consisting of clusters of unaccented and unalliterated syllables, attached to syllables alliterated and accented. A little rhyme came into it later, probably from Latin, and when what is called Middle English arose in the late 12th century by the blending of Anglo-Saxon with "Romance" (Franco-Latin) elements, rhyme as a regular thing, and a new rhythm which became more and more metrical, made their appearance. The commonest metres (all of which were iambic in general use, but with anapæstic equivalence) were first a rough metricising of the Old English stave which gradually became a line of 14 syllables ("fourteener") or seven feet; while this in turn broke up into the famous ballad or common measure of "eights and sixes." Next (whether taken directly from the French or not, but most probably so), came the octosyllabic couplet, or rhymed pair of four-foot iambics—an immensely popular form, which has been the most continuously cultivated of any in English poetry. A third, very largely used for the English romances (whence it is sometimes called the "Romance-six") was a measure of six lines (eight, eight, six—eight,

eight, six) rhymed *a a b a a b*. It was originally termed in Latin *versus caudatus*, in Fr. *rime couée*, "tailed" verse, the short lines 3 and 6 playing the part of "tail" to the longer. But the ingenuity of poets, and the immense stock of Latin, French and Provençal models, supplied many other forms, the well-known stanza long after to be called "Burns's," being one of them.

At an uncertain time in the 14th century, however, alliterative metre reappeared and made a strong bid for a share, if not more, of what we may call the "custom" of English poets. Some good work was done in it, especially by William Langland, the author of *The Vision of Piers Plowman*, but it was monotonous in artistic effect, and ill-suited to any but a very few subjects. Fortunately—a little later than Langland, but contemporary with him for the larger part of their lives—arose the first great English poet, Geoffrey Chaucer, who caught up everything that was good in the work of his English predecessors, took fresh hints from France and Italy, elaborated a poetic diction of extraordinary finish, ease, flexibility and (at need) splendour; and fashioned English metre as it never had been fashioned before, though it is a vulgar error to suppose that he introduced either rhyme or stanza, the former being, probably 400 and the latter 200 years older. His two chief forms were both possibly taken from French, though neither of them had been practised there long or much. The first was the very beautiful stanza of seven decasyllabic lines, called rhyme-royal (*a b a b b c c*), the last two lines of which rhyme in couplet. Having thus practised this couplet largely, though in combination, in his *Troilus and Creseide*, he proceeded (perhaps with the instigation of French examples) to use it alone in the *Legend of Good Women* and *The Canterbury Tales*. This decasyllabic couplet had appeared in English long before sporadically, and, as it were, accidentally. But Chaucer *re*-made it, in ways quite different from his possible originals, English and French, and made it into one of the very greatest of English metres, discovering at once with a wonderful artistic instinct, its two forms—that in which the sense and sound both come to a sort of end with the second rhyme-word, and that in which both overflow into the following line or lines.

His successors, however, though they fervently admired and sedulously aped him, were entirely unable to walk in his circle, and during the 15th century English prosody fell into an extraordinary state of discord and disarray. This was of the less importance owing to its cause—the rapid and constant changes in the language itself and its pronunciation, which would, in any case, have necessitated revaluation for prosodic purposes. This revaluation was effected neither too soon nor too late, by the earlier "Elizabethan" poets from Wyatt to Spenser; and the latter played anew, but on a more permanent instrument, the part of Chaucer. He may be said to have created modern English poetic diction, and in various forms—especially the great Spenserian stanza of nine lines, eight of them of five feet and the ninth of six, rhymed *ababbcbcc*, of which there is no previous example—he re-settled the principles of versification almost as importantly. The outburst of drama which followed

established blank verse; and during the middle of the so-called "major" Elizabethan period, from Wyatt to Vaughan, lyric was cultivated in myriad forms of varied charm. Meanwhile, dramatic blank verse and the looser couplet (see above) had become disorderly, and readers had tired of stanzas for long poems. Towards the end of the reign of James I. a fancy for the other form of couplet came in, which prevailed more and more, till it established itself as the staple form of verse for easy poems, until the end of the 18th century. Milton, in the middle of the 17th, had entirely and permanently reconstructed blank verse for non-dramatic purposes; but it was not much used till the second quarter of the 18th. Lyric fell soon after the Restoration into a second-rate condition, but the gigantic strength of Dryden maintained almost all forms of verse (except the longer stanzas) from 1660–1700. The prosodic aspect of the 18th century has already been touched upon—the stopped couplet, polished and perfected by Pope, as the reigning metre; a certain amount of blank verse, imitated with less judgment than zeal from Milton; light octosyllabics retained in public favour by the great authority of Prior and Swift; and a few poems of chiefly light lyric, largely using the anapæst, but varied by heavy "Pindaric" odes. At last, in the final years of the century, study of older writers helped the great flood-tide of the "Romantic" movement to burst the dykes which had been intruded for some 150 years. Southey distinctly defended and Coleridge (though he seems not fully to have understood them in theory) employed magnificently in practice, the principles of equivalence and substitution; and these, spreading through all forms of verse, under the influence first of Scott, Byron, Shelley, and Keats; then of Tennyson, Browning, and their lesser contemporaries; have restored English poetry to all—and far more than all—its ancient privileges and prerogatives of form, with the result of such a body of verse as no century in any country has ever seen before.

A few explanations of technicalities and illustrations of detail may properly conclude this brief notice of a large matter. An *acephalous* ("headless") line is one lacking the first syllable of the first foot—a proceeding attempted by Chaucer and even Milton in the decasyllabic line with dubious success, but almost universally practised in the octosyllabic, with the best results. A *catalectic* ("leaving off") line, on the other hand, is one which has its last syllable dropped. A *redundant* line has an extra syllable or syllables, while *anacrusis* ("push off"), which it has been proposed to call in English "catch," is a syllable *prefixed* to a line, sometimes with very important effects. Whether liberties of this kind can be taken at any other place than the end and the beginning is very doubtful, but some would also license them at the *cæsura* or pause. The extreme accentualists or stressites of a recent type permit them anywhere, with the result that when the line is not unmelodious, it can be reduced to ordinary equivalence by a sort of slur; and that when it cannot be so reduced, it is mere "patter-verse," or else sheer prose.

Equivalence itself must be used in such a manner that the general basis of the line is not disturbed, and that the ear is not offended by

the substitution of a wrong foot. Thus, in the octosyllabic couplet, anapæsts are most freely employable for iambs; but, if whole couplets entirely composed of anapæsts are indulged in, a mistake is committed. So, again, though the anapæst will replace the iamb, the dactyl will not.

"The Assyrian came down *savagely* on the fold."

either requires a ridiculous pronounciation of "săvăgelēē" or else upsets the line. The dactyl, in fact, can never be substituted for the anapæst, the rhythmical effects of the two feet being irreconcilable, though English "hexameters" with the base shifted by *anacrusis* will make capital anapæstics. On the other hand, the dactyl is the proper substitute for the trochee when that is the base.

A singular idea—part of the evidence of the extreme accentualists' mistake—prevails among them that "two accents must not come together, except in monosyllables." There is no antecedent reason in the nature of things, and no testimony of experience in human speaking or hearing, why this should be.

"Assonance" is rhyme imperfect; the vowels being the same but the final consonants different, as in "howl" and "town." It is allowed in some languages, but not in English.

To finish as we began, there may be said to be four kinds of rhythm in human speech and in the corresponding literature. First the rhythm (or, rather, the absence of any regular rhythm) in ordinary conversation. Second, the rhythm of prose literature which, at the lowest little marked, ascends through many stages to the elaborate harmonies, still not metrical, of Browne and Taylor, of De Quincey and Landor and some later writers. Third, certain attempts at a vehicle between prose and poetry, of which *Ossian*, Blake's "Prophetic" books, Walt. Whitman's works, or most of them, and a good many recent and actually contemporary experiments are examples. Fourth, and last, regular metre or poetic rhythm, the chief principles whereof in English have been set forth above.

A HISTORY OF ENGLISH SPELLING.

By Professor Walter Rippmann, M.A.,
Chief Inspector of Schools to the University of London.

The air of reverence, almost amounting to sanctity, with which many invest our spelling would be an evident obstacle in the path of any reform. They do not realize that it was fixed in its present form barely 160 years ago, and that it is by no means the production of literary men and scholars, but rather of printers. The works of our great writers are generally read in the spelling of our day, not of theirs; it requires an effort to remember that Shakespeare's works and Milton's were not spelt in the way in which they are usually presented to us, and we find it hard to believe that if Shakespeare and Milton came to life again, they could read our books quite easily (apart from recently adopted words), but would find considerable difficulty in understanding our spoken language.

As the ordinary handbooks on the English language do not deal adequately with the history of the spelling, it may be well to attempt a brief account of it; those who have access to Professor Skeat's "Principles of English Etymology" will find a more detailed account in Chapter 16 of that admirable work. This article is much indebted to it; slight as it is, it represents the least amount of knowledge on the subject that anyone should possess if inclined to express an opinion on spelling reform.

When in our country men first attempted to represent their speech by means of many signs, they used the letters of the Latin alphabet, with the values they assigned to them when pronouncing Latin. They were slightly modified in form here and there. The Teutonic invaders adopted this alphabet. A few signs were added; one for *w* and two for *th*. The latter were þ and ð, used indiscriminately for the initial sounds of "this" and "thin."

Many of the consonant signs had the same value as they have now. *C* was, first, always pronounced as in "cat"; *k* was introduced later, and became common especially before *e* and *i*, when the pronunciation of *c* was changed before these vowels. *F* was used for *v* as well as *f*, and *s* for *z* as well as *s*. *R* was strongly trilled. *H*, except initially, had a value like that of German *ch* in *ich* or *ach*.

Old English was very rich in vowel sounds. It had, in addition to the sounds also found in Latin, the long and short *y* (pronounced like French *u*) and the long and short diphthongs *ea*, *eo*, *æ* (equivalent to the *a* of southern English "cat.").

From the strictly phonetic point of view, there are some defects in this alphabet, but on the whole it served fairly well to represent the sounds. Fortunately nothing more was expected of it. Every man recorded the sounds of his own speech, without attempting at the same time to convey etymological information or writing in con-

formity with a standard. No standard existed; there was no such thing as a generally recognized "correct spelling." As a consequence, we are able to tell from the spelling when and where the writer lived; for not only did the sounds vary according to the dialect, but they gradually underwent change.

Thus, between 1150 and 1300, we find the sounds of *i* and *y* are no longer distinguished, and, as a consequence, the letters are often used indiscriminately; *y* also receives consonantal value initially. The French scribes who were accustomed to give *c* the value of *s* before *e* and *i* prefer *k* for the hard sound in these positions. *Gh* comes to be used for the older *h* with the value of German *ch*. *U* is used for *v*, especially between vowels of which the second is usually *e*; *v* takes the place of *u*, especially at the beginning of words. The old sign for *w* yields to *uu* and then to *w*. *C* and *sc* become *ch* and *sch*. The older *cw* yields to *kw* and then to *qu* (a French symbol). *Hw* is written *wh*. The diphthong *ea*, *eo*, and *æ* (replaced by *e* or *a*) disappear.

During this period the spelling still serves no other purpose than to represent the sounds; no etymologizing bias is to be seen. But there is one important influence at work: the language is now enriched from French sources. The words introduced lent themselves easily to adaptation, for the French vowel sounds did not differ materially from the English. Now the Anglo-French scribes were accustomed to represent the sounds in a way that often differed from the English conventions; and when they wrote English words they naturally spelt them according to their French habits. This explains the introduction of *qu*, the use of *c* with the value of *s* (cp. English "city" and French "cité"), the spelling of the sound *u* (as in "truth") by means of *ou* (cp. French "tout"), which changed the older "hus" into "hous" (pronounced to rhyme with modern "loose"), the use of *i* with the value of *j* (as in "ioie").

Some further changes took place in the fourteenth century, by the end of which we have a spelling which, as Professor Skeat says, does not essentially differ from that of the present day, in spite of the vast changes that have come over our pronunciation. The principal difference is due to the loss of the final *e* in the spoken word. The following specimen from Chaucer's "Tale of the Man of Law" shows the spelling about 1400:—

In Surrye whilom dwelt a compaignye
Of chapmen riche | and therto sadde and trewe
That wyde where | senden hir spicerye
Clothes of gold | and satyns riche of hewe
Hir chaffare | was so thrifty and so newe
That euery wight | hath deyntee to chaffare
With hem | and eek | to sellen hem hir ware.

In comparing this spelling with ours, we must make allowance for grammatical differences and for the dropped final *e*. Of features to be ascribed to Anglo-French influence, we may note the *ey* in "deyntee," and the *ai* in "compaignye." The double *e* in "deyntee" and "eek" denotes the length of the vowel; similarly we find *aa*

and *oo* to indicate long vowels, in the fourteenth century. The *y* in "satyns" has the same value as *i* in "in."

In the fifteenth century the final *e* ceased to be pronounced. As is usually the case, the spelling did not at once indicate the change, and (as was not unnatural) people soon became uncertain where the letter *e* should be written, as the pronunciation no longer afforded any guidance. In certain cases the addition of a mute *e* came to be regarded as a means of showing that the vowel of the preceding syllable was long (*e.g.*, "bone," older "boon," from "bàn"). When this feeling became common, it affected the spelling of such words as "manere," "coper," "biter;" to show that the first vowel was not lengthened by the following *e*, the consonant was doubled, whence "manner," "copper," "bitter." Where an *e* does not follow, we keep the single consonant still, *e.g.*, in "metal," "canon."

Many words borrowed from French also contained an *e* that became silent; "age," "chance," "nice," "dame," each had two syllables at one time. Though the *e* has long been silent, we still retain it. We have even acquired a rooted objection to final *j*, and use *ce* for final *s* even in purely English words, such as "mice," "twice."

The following passage is taken from Caxton's prologue to his "Recuyell of the Historyes of Troye," printed by him in 1471:—

Whan I remembryd myſelf of my fymplenes and vnperfightnes that I had in both langages, that is to wete in Frenſhe and in Engliſſh, for in France was I neuer, and was born and lerned myn Engliſſh in Kente in the Weeld, where I doubte not is ſpoken as brode and rude Engliſſh as is in ony place of Englond, and haue contynued by the ſpace of xxx yere for the most part in the contres of Braband, Flandres, Holand, and Zeland, and thus whan alle thyſe thynges cam to fore me, after that I had made and wretyn a five or six quayers, I fyll in diſpayre of thys werke, and purposyd no more to haue contynuyd therin, and the quayers leyd a-part, and in two yere aftyr laboured no more in thys werke, & was fully in wyll to haue lefte hyt.

It shows instances of final *e* retained where it was no longer pronounced in the fifteenth century. The use of *y* for *i* is common; it was not restricted till the end of the sixteenth century.

In some other respects the spelling had become faulty when printing was invented; but on the whole the underlying idea was still to record the sounds of the spoken language. In the above extract, however, we notice the spelling "doubte," and this affords an instance of a new influence; the conscious attempt to make English words resemble more closely the Latin words with which they were connected. Words belonging to an older stratum of the language were not affected; but the later stock suffered very severely. Contemporary French words were affected in the same way; thus, "doute" was for a time written "doubte" and "set" became "sept." French dropped the *b* of "doubte," we have retained it. French, for a time, had "faulte," and we wrote "fault"; in neither language was the *l* pronounced. In the days of Pope the *l* was still unpronounced; he rhymes the word with "ought" and "taught."

Now "doubt" is ultimately derived from Latin "dubitare,"

and " fault " is connected with " fallere " ; but there are many cases in which the would-be etymologists went wrong. We owe to their mistaken ingenuity the *y* of " sylvan " and " rhyme," for they thought these words were derived from Greek. They wrote " science " and hence " scent," although it is connected with Latin " sentire." They wrote " posthumous," because they derived it from " post human " (instead of " postumus "). They added *ue* to " tongue," because French " langue " ended in *ue*.

These few examples must suffice to show that they introduced a new principle into the spelling, but had not the knowledge required for carrying it through consistently ; and, as has been pointed out, they only touched one section of our vocabulary. We must be grateful that they did no more harm ; as it is, they did a good deal.

This, then, is the spelling of the sixteenth century ; the following passage from Hugh Latimer's " Sermon on the Ploughers " (1549) may serve as an example :—

They [the preachers] haue great laboures, and therefore they ought to haue good liuinges, that they maye comodiouſly feade theyr flocke, for the preachynge of the worde of God vnto the people is called meate, ſcripture calleth it meat. Not strauberies,that come but once a yeare and tary not longe, but are ſone gone : but it is meat. It is no deyntie. The people muſte haue meate that muſte be familier and continuall, and dayly geuen vnto them to fede vpon.

There is no material change when we turn to Shakespeare. From the First Folio edition of his plays (1623) we select the following passage :—

Fie, fie, unknit that threatening vnkinde brow,
And dart not ſcornefull glances from thoſe eies,
To wound thy Lord, thy King, thy Governour.
It blots thy beautie, as frofts doe bite the Meads,
Confounds thy fame, as whirlewinds ſhake faire budds,
And in no fence is meete or amiable.
A woman mou'd is like a fountaine troubled,
Muddie, ill ſeeming, thicke, bereft of beautie,
And while it is ſoe, none ſo dry or thirſtie
Will daigne to ſip, or touch one drop of it.

We have given up the use of initial *v* for *u* (" vnkinde "), and of *u* for *v* (" mou'd ") ; we have cut off the unnecessary final *e* in some words (" vnkinde, doe, meete," etc.) ; we have given up the long *ſ*. But the printers, who are the responsible parties, have not been consistent. They might, at least, have dropped the *e* in " have, give, live, dove." They have reduced " ſcornefull " to " scornful " ; they might have adopted " ful " instead of " full." They have substituted simple letters for double ones in " dog, bad," but have retained final *ff*, except in " if, of " ; and in " of " the *ſ* represents *v* !

It is the printers who brought about a certain degree of uniformity. The authors, with few exceptions, seem to have cared little about spelling. The spoken form, the sound of their creations was their chief concern. The printers, on the other hand, were concerned with the printed form ; and it was natural that they should gradually adopt certain conventions. This they did in a quite un-

methodical way; there was no concerted action. As a result, there was no real uniformity until a recognized authority appeared.

It was Dr. Johnson's dictionary, issued in 1755, that sanctioned certain spellings and condemned others. His reputation as a literary man gave prestige to his work as a lexicographer.

Now Dr. Johnson was not in the least anxious to represent the spoken language of his day, nor did he realize how much it differed from the language of the sixteenth century. The changes which the pronunciation had undergone were remarkable, as will be clear to anyone who has heard a passage from Shakespeare read with the Elizabethan pronunciation, a task of which any English scholar should be capable. The spelling had so long ceased to represent the sounds that its original function was quite obscured. Indeed, Dr. Johnson had neither the knowledge of the history of the language nor the phonetic training requisite in a reformer of the spelling. He was content to take the spelling as it was, merely making a choice (and not always a wise one) where a word was spelt in different ways.

Since his day there has been little change in the printed form of words. One no longer spells "musick," "cloathes," or "tyger," as he did; but *in the main* we spell as Dr. Johnson spelt. The pronunciation, however, has continued to change, becoming more remote from the spelling in some cases; in others, tending to be influenced by it. We no longer pronounce "oblige" with the *i* of "machine"; we have learnt to pronounce the *l* of "fault," and some even give to the first vowel of "English" the sound of *e* in "end."

We spell our words with letters and diagraphs that served, rather roughly, to represent the Elizabethan pronunciation of our words; letters and diagraphs mainly due to Anglo-French writers who strove to record the sounds after the French manner. The spelling is rendered worse by the misguided efforts of the sixteenth century pedants, who wished to display their knowledge of Latin. The printers brought about a certain uniformity, on which Dr. Johnson based his dictionary. This, to all intents and purposes, is still the standard of correct spelling.

It may be well to add that the forms with which we are familiar are not always those preferred by our great poets. Shakespeare has "els, maner, tung, tel, dasht, stopt, carvd, sadnes"; Milton, "Suspens, gladsom, falshood, dred, labord, farewel, sented, sovran"; Dryden, "dropt, confest"; Tennyson was an Honorary Vice-President of the English Spelling Reform Association, and, in spite of the strong feeling for "correct spelling" in his day, he did not hesitate to spell "dipt, drest, lapt, dropt," etc. But the great writers have not determined our spelling, with the solitary exception of Dr. Johnson; and, as we have seen, he regularized what he found—he did not reform.

GREAT ENGLISH WRITERS.

By Sir Arthur Quiller-Couch

King Edward VII. Professor of English Literature in the University of Cambridge.

All our earliest Anglo-Saxon, or "Old English," literature is in verse, and all the very earliest is anonymous. The Baltic invaders would seem to have brought the famous epic of *Beowulf* from over-sea (for its scenery is Scandinavian) to be re-touched later and "Christianised" as it is in the version which survives for us; and this process applied to a single poem illustrates the trend of Anglo-Saxon writing. The first fragments, which deal with seafaring, land-travel, fighting, are soon drowned in a very moderate deluge of Christian and pietistic verse, from the general anonymity of which two names emerge—Caedmon and Cynewulf. Caedmon (the legend goes) was a Northumbrian cattle-tender, who, when the harp went round, would rise from his seat in the hall and run to the byres for shame, because he had no gift of song. One night, when he had thus fled, a Vision came to the stable commanding "Sing me something." "I cannot sing, and therefore I am here." "But sing thou must." "What then, shall I sing?" "Sing the Creation of all things." Forthwith "excellent verses" came to the herdman's lips, and specimens of it have come down to us in the shape of metrical paraphrases of Genesis, Exodus, Daniel, and other Biblical stories. Cynewulf, author of many poems including *Crist*, *Elene*, certain *Riddles*, and (probably) *The Dream of the Rood*, is the only other Anglo-Saxon poet whose name has survived. He, too, would seem to have belonged to Northumbria, where the Church kindled and cherished for a while—until the Danes extinguished it—a sacred fire of learning which threw its light over the thick darkness encompassing it, and was hailed from the continent of Europe as a portent. The saintly Bede penned his *Ecclesiastical History* in the Cloisters of Jarrow, and from York *Alcuin* travelled to become the most honoured teacher of Charlemagne's Court. But these scholars wrote in Latin, the "Universal Language"; and although *Bede* realised the value of translations in the vernacular, and died while translating St. John's Gospel to his pupils gathered around his bed, the beginning of English prose dates, after the devastation of Northumbria, from the rise of Wessex under King Alfred. Alfred's most notable translations were of Bede's *Ecclesiastical History*, the *Consolation* of Boethius and the *History and Geography* of Orosius; Boethius being the great spokesman of philosophy in the Dark Ages, as Orosius of encyclopædic knowledge. But we must respect these attempts rather as part of a wise king's policy than for their actual success. Alfred throughout his reign sought to build up his nation in self-respect; and he rightly believed in enlightenment as one of his best auxiliaries. But in truth the Anglo-Saxon language was in itself no stock for putting forth a robust literature. Its prose, never reaching maturity, continued until the reign of Stephen to put forth leaf in the *Anglo-Saxon Chronicle*—a name we give to a series

of monkish annals kept successively at Winchester, Canterbury, Worcester, Abingdon, Peterborough. Its verse had to be fertilised from another, more vital plant, and to die back close to the root before blossoming into that poetry which is the pride of the English race. Anglo-Saxon literature, in short, was not killed by the Norman Conquest: it was effete, or at least moribund, some while before 1066. For a good two centuries from that date such literature as emerged was written in Latin (*e.g.*, by ANSELM in theology, and ROGER BACON in philosophy; by GEOFFREY OF MONMOUTH in his *Historia Britonum*, circa 1132; by WALTER MAP and by MATTHEW PARIS), or in Norman French (*e.g.*, WACE'S *Brut d' Algleterre*, founded on Geoffrey's History). Slowly, "the Norman yeast working on the Anglo-Saxon home-baked loaf" English writing began to revive in LAYAMON'S *Brut*, (1205), yet another version of Geoffrey and Wace; the *Ormulum* a metrical compound of Scripture story and homily by one ORM, a Cheshire priest; *The Owl and the Nightingale*, a poem of unknown authorship in the Dorsetshire dialect; the *Proverbs of Hendyng*: the *Land of Cokayne* (satirical, c. 1250), *Havelock* and the *Geste of King Horn* (both before 1300). The late 13th and early 14th centuries, indeed, found a large number of English writers busy with the vernacular; and, a little later, Scotland took the field with JOHN BARBOUR'S *Bruce*. But more important than any of these, as heralding the real dawn, were a few fugitive lyrics such as *Alisoun*; *Blou, Northern Wind*; *Wynter wakeneth al my care*; which showed that our poetry was casting off its Anglo-Saxon swaddling clothes of alliteration and dull beat of accent, and going to school to learn rhyme, with a new prosody, from the Latin hymnals and the sweet singers of Provence. More important, too, was the gradual change in matter as well as manner, substance as well as form, most remarkable in the preoccupation of the poets with native subjects King Arthur and the Arthurian Court or Robin Hood and heroes "the Arthur of the common folk." The subject grew to be England or Britain in some aspect; her social conditions, her achievements, present or past. The form, still English, shaped itself after the French. The change is well typified in LAURENCE MINOT (1300?-1352 an Englishman of the Midlands, but pretty certainly of Norman extraction, who followed Edward III. to the wars and celebrated his victories in such verse as:—

> God that schape both se and land
> Save Edward, King of England,
> Both body, saul and life,
> And grant him joy withouten strif.

Meanwhile, in 1321, had appeared Dante's *Divina Commedia*. The now flourishing Universities of Oxford and Cambridge, and their commerce with the great University of Paris (to which Scottish scholars also flocked) had laid a train for the intellectual fire to travel, and Dante's great poem, with the stories of Boccaccio, lit up in GEOFFERY CHAUCER (1340—1400) a flame of poetry which to this day has never shown a sign of dying out. Chaucer was a thorough Englishman with a happy and thoroughly English genius for compromise. He borrowed or "conveyed" his themes from right and left; for his form or forms of verse he took what he

would of French (the rhyme and fixed syllables), discarded what he would (the old alliteration) and retained what he would (the native accent, or stress) of English ; all with the cheerful unboastful mastery of a man who, perceiving that a something needs to be done, saunters in and does it. Nor did he revolutionise the form only, or the form and language only, of English verse. Into the *Canterbury Tales*, his greatest work, though he took their subjects ready-made from Boccaccio and others, he breathed a spirit which we all recognise and take for granted as purely English, whereas it may well be mooted how much of that spirit Chaucer found extant in his contemporary England, and how much of it he derived from his own singularly happy nature and imposed upon us, through his writings, as a national characteristic. At any rate, he made the new poetry and placed it above competition. WILLIAM LANGLAND'S *Vision of Piers the Plowman* (1362—1392) may be reckoned the last expiring effort of the old Anglo-Saxon versification, "produced by reflex action of the muscles, after death." In Scotland, Chaucer's example raised up a host of "makers" (poets), among whom must be mentioned three men of genius, ROBERT HENRYSON (1430 ?—1506 ?), GAVIN DOUGLAS (1474—1522), and WILLIAM DUNBAR (1465 ?—1530 ?). In England his imitators and followers—such as "moral" JOHN GOWER (1325—1408), author of the *Confessio Amantis*, THOMAS HOCCLEVE (1370 ?—1450 ?), JOHN LYDGATE (1370 ?—1451 ?)—were dull poets, but serviceable in that, taking up their master's traditions of metre and scansion, they applied these to our language during the interval when it was shedding its inflections, and so built a bridge of recognised usage across from Chaucer to the next great poetical age. It is usual to dismiss the 15th Century as a barren one in poetry. As a matter of fact, poetry remained very much alive ; only, forsaking the Court and the academical writers, it had taken refuge with the common folk of England. To this age may be assigned, with fair confidence, scores of wonderful Ballads—such as *Clerk Saunders*, *Hynd Horn*, *Little Musgrave*, *The Nut-Brown Mayd*—which, though they have reached us in garbled forms, bear witness to a genius for song alive, and perhaps widely disseminated, in a class of men who composed and sang professionally, but had no means of publishing save by their voices, and for the rest trusted to their hearers' memory, which preserved songs after a fashion but let fade the names of the singers.

Meanwhile the English language had been admitted (1362) in the Law Courts ; and English prose had begun to take shape in the *Travailes* of SIR JOHN MANDEVILLE (d. 1372) and a version of the Bible by JOHN WYCLIF (d. 1384), schoolman and great religious reformer. The invention of printing (c. 1450) made all things possible for the spread of literature, and in 1476 WILLIAM CAXTON set up his press at Westminster. In 1485 he printed an edition of SIR THOMAS MALORY'S *Morte d'Arthur*, a book which exhibits English prose as already capable of winning diction and a certain charm of melody. But we are here at the dawn of the great Revival of Learning. In 1453 (almost coincidently with the discovery of the printing press) the Turks under Mahomet II. had overwhelmed Constanti-

nople after a long siege, and the scholars resident there, in that capital of the later Roman Empire, had been dispersed along the southern cities of Europe with their learning and their priceless Greek and Latin manuscripts. As sparks from under the heel treading down the altar, these escaped and carried a fire to kindle, wherever they alighted, the husks of the Middle Ages. Everywhere revived and sprang up a passion for the old learning, or (as it was called) the "humanities." The almost simultaneous discoveries of Columbus, Cabot, Ojeda, Vespucci and others, added the promise of a New World to the rediscovered wisdom of the Old. In England the study of Greek sprang up as the study of a new Gospel; preached by GROCYN and LINACRE at Oxford; by CHEEKE and SMITH at Cambridge; by COLET in London; all encouraged by visits from the great Dutchman, DESIDERUS ERASMUS. SIR THOMAS MORE (1478—1535) a personal friend of Erasmus, hailed the new advent in his *Utopia*—sketch of an imaginary and perfect commonwealth on the Platonic model. WILLIAM TYNDALE (d. 1536) and MILES COVERDALE (1488—1568) translated the Bible into rhythmical English which laid a base for the present *Authorised Version*, in due time so gloriously to follow. In the midst of this ferment, as was natural, English prose could not for some time decide its course. LORD BERNERS (1467—1533) in his translation of *Froissart's Chronicles* follows the *Morte d'Arthur* in perfecting an English style of a simple and limited range. On the other hand ROGER ASCHAM (1515—1568), author of *Toxophilus* and *The Scholemaster*, was all for breaking away from vernacular English and building a new prose on the Latin model. Upon these intruded JOHN LYLY (1554 ?—1606) with his *Euphues* and an affected semi-classical style, full of epigram, alliteration, antithesis, which for a time captured the fashion. The final shape of our prose lay, as yet, at the mercy of the gods. Naturally enough the new movement, enlisting the enthusiasm of young men, wrought upon poetry a vivification even more startling than its effect upon prose. Already, and without help of any Renaissance, readers had learnt to yawn over the long-winded Lydgate, the interminable Hawes: and JOHN SKELTON (1460—1529), poet of Henry VII.'s court, and "laureate" of the two Universities, had started to reform English verse without well knowing how to set about it. The true reformation came with SIR THOMAS WYAT (1503—1542), who for his models went to Italy and to France, where the Petrarchan sonnet and other lyrical forms were being eagerly practised by the famous "Pleiad"—Rensard, du Bellay, and the rest. Wyat passed on his enthusiasm, with much of his skill, to the young HENRY HOWARD, by courtesy EARL OF SURREY (1517—1547), and a thin volume generally known as *Tottel's Miscellany*, containing the lyrics of these two, with others by NICHOLAS GRIMALD, published in 1557, is one of the landmarks of our literature. Two years later appeared the *Mirror for Magistrates*, by THOMAS SACKVILLE, EARL OF DORSET (1536—1608), and in December, 1579, with the publication of *The Shepheard's Calendar* the star of EDMUND SPENSER (1552 ?—1599) rose on the horizon. Early next spring he began upon his great allegorical epic *The Faery Queene*, wielding a

stanza that in itself, as well as in the manner of wielding, was a new extension of the landmarks. But the literary glory of the Elizabethan age culminated in its Drama. The old rude Mysteries, Miracle Plays, Morality Plays, presented on holy-days under direction of the Clergy or at the expense of the Trade Guilds, would probably have tended, in any event, to pass into the hands of professional players. But with the Guilds breaking up under process of political and economic forces, and the Church desperately busy with fighting for or against the Reformed Religion, this process was greatly accelerated, and the drama soon gave evidence that it had passed into secular hands. It, too, had begun to feel the breath of the New (which was the Old) Learning. The comedies of Plautus supplied the model for *Ralph Roister Doister*, written in 1541 by NICHOLAS UDALL, headmaster of Eton : the tragedies of Seneca that for Sackville and Norton's *Ferrex and Porrex*, or *Gorboduc* (1561). These plays gave appetite for more. Theatres sprang up in London, as companies of " licensed players " sought prominent houses to which their patrons might resort : and as theatre-going increased its vogue, the young scholars and " wits " of Oxford and Cambridge fell to writing plays for presentation in their College halls. Many of these youths, on leaving the University, passed on to London and its not too reputable theatrical *milieu*, too often to the wreck of their lives. Such were JOHN LYLY (1554 ?—1606), GEORGE PEELE (1558 ?—1597 ?), ROBERT GREENE (1560 ?—1592), CHRISTOPHER MARLOWE (1564—1593): and to Marlowe—who perished at twenty-nine, in a pothouse brawl—belongs the distinction of fathering, in his *Tamburlaine*, the English blank verse line in which all the great plays of that great age were written. GEORGE CHAPMAN (1559 ?—1634), also, and BEN JONSON (1573 ?—1637) were scholars as well as dramatists. Chapman translated Homer, and Jonson throughout his life waged war for the " classical " note in drama and poetry. WILLIAM SHAKESPEARE (1564—1616) belonged to the group that learned the art of play-writing by humble practice on the boards, and he had to pass through some contemptuous and also jealous criticism by the University " wits," between whom and the actor-dramatists there was a running feud. It is unnecessary to say more of this wonderful man,—in magnitude the first star of our literature—than that by natural sweetness of disposition as well as by a pre-eminence of genius he won the respect, almost the idolatry of his contemporaries, in the galaxy of whose talent he reigns for posterity unchallenged. Other famous stars of that galaxy were THOMAS KYD (1537—1595), THOMAS NASHE (1567—1601), THOMAS DEKKER (1570—1641), JOHN FLETCHER (1579—1625), who conjointly with FRANCIS BEAUMONT (1584—1616), wrote a series of plays extraordinarily popular with the Court and the polite critics ; JOHN WEBSTER (1570—1625), JOHN FORD (d. 1758), CYRIL TOURNEUR (1575—1626), JAMES SHIRLEY (1596—1686), PHILIP MASSINGER (1583—1640). Many of these wrought at lyrical poetry, and especially the sonnet, as well as at the drama; and SIR PHILIP SIDNEY (1554—1586), the paragon of his age, SAMUEL DANIEL (1562—1619), THOMAS CAMPION (d. 1619), MICHAEL DRAYTON (1563—1631), WILLIAM DRUMMOND, of Hawth-

crnden (1585—1649), with a host of musicians and lutanists, carried on the traditions of Wyat and Spenser; as in prose, Greene, Lodge and Nashe, following the line of Malory, gave us our first Novels. But the great innovator in prose was JOHN LYLY (see above), whose *Euphues* started a trick of antithetical affected writing which for a generation influenced all his contemporaries. A nobler and more serious style, however, was evolved through the *Voyages* of RICHARD HAKLUYT (1552—1616), SIR WALTER RALEIGH'S (1552—1618) *History of the World*, RICHARD HOOKER'S (1554—1600) *Ecclesiastical Polity*, and the English writings of FRANCIS BACON, VISCOUNT ST. ALBANS, the founder of the inductive method in philosophy. Finally the prose of the period reared itself that most splendid monument, the *Authorised Version of the Bible* (1611).

In the reign of James I. the drama reached its zenith, declined, and fell into eclipse—an eclipse largely due to the state laws against players. Almost coincidently the fresh impulse of the Elizabethan lyrist died out and was superseded by a new school of "metaphysical" poets, full of difficult images and "conceits," deriving their inspiration from DR. JOHN DONNE (1573—1631). To his lineage belong the sacred poets, GEORGE HERBERT (1593—1633), HENRY VAUGHAN (1622—1695), RICHARD CRASHAW (1613—1649), FRANCIS QUARLES (1592—1644); and from him, on another side derive the Cavalier lyrists, ROBERT HERRICK (1591—1674), SIR JOHN SUCKLING (1608—1649), THOMAS CAREW (1595—1639). The far greater name of JOHN MILTON stands more solitary, not alone by eminence. From his undergraduate days at Cambridge he had trained himself to be a poet, studying, with a sure instinct, in the Italian school; and *Comus* (a "masque," or Court play, of a species brought near to perfection by Ben Jonson and others with the scenic aid of Inigo Jones), *Lycidas* (an elegy for a dead friend) and some minor poems gave promise of the great achievement which the outbreak of the Civil War delayed for twenty stormy years. Milton, appointed Latin Secretary under the Commonwealth, applied his pen during that period to prose and the writing of tracts. A few sonnets only attest that he was searching for a form to reproduce the Horatian style in English, as his fellow-secretary, ANDREW MARVELL (1621—1678) sought to reproduce it in his *Horatian Ode to the Lord Protector*. It was only when old, blind and in political disgrace that Milton recovered the inward vision of his youth and dictated *Paradise Lost*, that greatest of English Epics. ABRAHAM COWLEY (1618—1667), whose verse and prose abound in scattered charms, mingled these in a compost of "conceited" writing which—as it carried the tradition of Donne to its zenith and so to flagrancy—provoked the reaction, which came quickly as EDMUND WALLER (1606—1687) taught a new generation of poets to practise neatness, elegance, accuracy, in place of clever extravagance, and JOHN DRYDEN (1631—1700) impregnated it with masculine common sense. It may be held that Dryden, great poet though he was, did even better service to letters as a critic. The *Introductions* to his various works, taken together, form a compendium of sound judgment and advice about poetical writing.

The prose of the Seventeenth century on its main lines ran parallel with its verse; though the influence of the Authorised Version kept two notable writers to a simple and nervous diction. These were Isaak Walton (1593—1683), author of *The Compleat Angler*, and John Bunyan (1628—1688), whose *Pilgrim's Progress* shares with it an immortality of charm. But the mass of writers—even the best, such as Robert Burton (1577—1640), author of *The Anatomie of Melancholy*, Thomas Fuller (1608—1661), Jeremy Taylor (1613—1667)—sought after odd "conceits" and quaint ornamentation. The trick of antithesis, of conveying thought in prettily balanced epigram, may be traced back to Lyly's *Euphues*. It took a new form in the vogue of "Character-writing" after the model of Theophrastus; and of this fashionable literary amusement (though none of them equalled the Frenchman, La Bruyère), Sir Thomas Overbury (1581—1613), John Earle (1601—1665), the Cambridge Platonist, with Fuller and Butler, may be mentioned as devotees. The fashion, in somewhat altered form, was perpetuated by Edward Hyde, Earl of Clarendon, in the character sketches which adorn his *History of the Rebellion*. But Clarendon, like most of the more serious writers—*e.g.*, the political philosopher, Thomas Hobbes (1598—1679)—eschewed the *staccato* epigram and sought to write in rolling Ciceronian periods. This drove them perforce to cultivate Latin phrases, and of the great Latinists, Sir Thomas Browne (1605—1682), author of *Religio Medici* and *Hydriotaphia*, most nearly reaches perfection. His style is patently and at times extravagantly artificial; but at its best is capable of a solemn music which transcends the artifice and, indeed, all imitation.

Thus, in verse and prose, our writers for more than a hundred years had been using the *themes* of classical literature and striving after its *diction*, when the Restoration, introducing French taste, introduced with it the classical *form*. Hitherto Englishmen had availed themselves of Greek and Latin themes for their plays and poems; they had assiduously studied to mould the verse, the sentence, the paragraph, the page, on an Athenian or Roman model. Henceforth for a century they sought to obey rather the informing *taste* and spirit of classicism (mainly of Latin classicism)—its studious moderation, its love of rule, its abhorrence of the grotesque, the extravagant, the enthusiastic, its preference for clear outline above violent colour, for reason, science, definite thought, criticism, above religion, romance, mystery, invention. There was a "matter-of-factness" about the eighteenth century, of which we may see a premonition in the familiar style of the two diarists, John Evelyn (1626—1706) and Samuel Pepys (1633—1703), and of the essayist Sir William Temple (1628—1699). The Essay, indeed—the view of a man-of-the-world, whether on religion, politics, or art—sets the keynote of the following age, the famous "Augustan Age" of Queen Anne. The Essay itself is predominant as a literary form, and the Essay, pretending to be serious, takes the name of Tract or of Pamphlet. In *The Spectator*, which professes to be a news-sheet, Joseph Addison (1672—1712) and Sir Richard Steele (1672—1729) perfect the Essay. Daniel Defoe (1661—1731) and Jonathan Swift (1667—1745) use and

exploit its form for their political tracts and pamphlets. When these two men turn to fiction, as Defoe in *Robinson Crusoe* and Swift in *Gulliver's Travels*, though their purpose be didactic or satirical, they indulge in romance only so far as romance keeps close to the details of common life. It is significant, too, that the first poet of this Augustan Age, ALEXANDER POPE (1688—1744), chose the title *An Essay on Man*, for his most ambitious attempt to mate philosophy with poetry. He admired Homer, as he was in duty bound to admire the great classical poet, but his translation of Homer regularises the force of the original and reduces it to elegance. The age had its drama, too; but a drama "revived" (if the word be permissible) to be formal in rule as it was licentious in subject. Dryden himself, SIR JOHN VANBURGH (1664—1726), SIR GEORGE ETHEREGE (1635—1671), WILLIAM WYCHERLEY (1640—1716), and even WILLIAM CONGREVE (1670—1729)—the wittiest of them all—can only plead, in excuse for the libertinage of their plays, that they presented a view of society, frankly artificial, in which the common rules of morality had no force. They kept close to the ground, if not to earth in its true meaning; and so did the witty lyrists of the time, MATTHEW PRIOR (1664—1721) and JOHN GAY (1685—1732). These men "rationalised" life, on its lighter, more social side, no more and no less sincerely than did its philosophers and theologians—JOHN LOCKE (1632—1704), in his *Essay Concerning Human Understanding*, GEORGE BERKELEY (1685—1753), in his *Treatise Concerning the Principles of Human Understanding*, and JOSEPH BUTLER (1692—1752), in his *Analogy of Religion*. The spirit of the eighteenth century—polite, rational, sure of itself, somewhat distrustful of everything and of everyone else, honestly distrustful of everything it could not touch or see, may be studied (as well as anywhere) in the familiar *Letters* of HORACE WALPOLE (1717—1797), typical man-of-the-world, dilettante, and Whig of the inner circle which had controlled politics since the Revolution. In such an atmosphere poetry could not flourish. It survived, biding its time, in *The Seasons* of JAMES THOMSON (1700—1748) and the thin but exquisite work of THOMAS GRAY (1716—1771) and WILLIAM COLLINS (1721—1759). A strain of lively human feeling, too, runs through all that OLIVER GOLDSMITH (1728—1774) wrote, be it poem (*The Deserted Village*), play (*She Stoops to Conquer*), or novel (*The Vicar of Wakefield*), and passionate feeling vivifies, if it sometimes obscures, the reasoning of EDMUND BURKE (1729—1797), great publicist and chief of British orators. Burke and Goldsmith were men of genius and imagination; but beside them, dominating the world of letters during his lifetime, towers the great figure of SAMUEL JOHNSON (1709—1784), whose *Life*, written by his assiduous admirer, JAMES BOSWELL (1740—1795), remains unchallenged as the most delightful biography in the language. While Johnson continued arbiter, if not dictator of English style, the sway of the balanced sentence, the monumental Latin word, was paramount and obeyed by the historians—EDWARD GIBBON (1737—1794), WILLIAM ROBERTSON (1721—1793)—as by political writers and philosophers—THOMAS PAINE (1737—1809), author of the *Rights of Man*; DAVID HUME

(1711—1776), author of *A Treatise of Human Nature*, and ADAM SMITH, whose *Wealth of Nations* founded the science of Political Economy. Meanwhile SAMUEL RICHARDSON (1689—1761), HENRY FIELDING (1707—1754), TOBIAS SMOLLETT (1721—1771), and FRANCES BURNEY, MADAME D'ARBLAY (1752—1840), were shaping the English novel, while HORACE WALPOLE'S Gothic romance, *The Castle of Otranto* (1764), heralded, somewhat luridly, the romantic revival in fiction.

It was in poetry, however, that the real dawn appeared, and the first signs of it were the publication of BISHOP PERCY'S *Reliques of English Poetry* (1765), which revived men's interest in the old Ballads; the so-called "Ossianic" poems of JAMES MACPHERSON, and the "Rowley" poems of the ill fated THOMAS CHATTERTON (1752—(1770). WILLIAM COWPER (1731—1800) and GEORGE CRABBE (1754—(1832)—each a poet of strong individuality—stand in the twilight between the two eras. But the new day is unmistakeable in the lyrical writings of WILLIAM BLAKE (1759—1827) and ROBERT BURNS (1759—1796), and its advent was militantly proc'aimed in 1798, when appeared the famous *Lyrical Ballads* composed by two young men who had caught the spirit of liberty from the French Revolution, SAMUEL TAYLOR COLERIDGE (1772—1834) and WILLIAM WORDSWORTH (1770—1850). With them, as pioneers, must be named ROBERT SOUTHEY (1774—1843) and the two exquisite critics, CHARLES LAMB (1775—1834), most delightful of essayists, and WILLIAM HAZLITT (1778—1830), THOMAS DE QUINCEY (1785—1859). The pugnacious note of the *Lyrical Ballads*, the abiding glamour of Coleridge's *Ancient Mariner*, the subsequent achievements of Wordsworth, incline us to forget, however, that it was SIR WALTER SCOTT (1771—1832) who not only first won the public ear for romantic poetry with his *Lay of the Last Minstrel* (1805) and *The Lady of the Lake* (1810), but repeated his triumph in the realm of prose fiction when, in 1814, he launched *Waverley*, the first of that long series of prose romances to which it has given its name. The fervour of the revival lit and fostered in LORD BYRON (1788—1824), PERCY BYSSHE SHELLEY (1792—1822), JOHN KEATS (1795—1821), a blaze of poetical genius before which the poetical fame of Scott has faded. Men are apt to rank him nowadays as a poet only a little higher than his contemporaries, LEIGH HUNT (1784—1859) and THOMAS CAMPBELL (1777—1844). But in the great romantic movement he stands as chief, his fame challenged only by Byron's. His romantic novels for a while eclipsed the minuter and more domestic tales of JANE AUSTEN (1775—1817), MARIA EDGEWORTH (1767—1849), and others. The former, however, by virtue of a workmanship perfect within its scope, is now secure among the "classics."

After the deaths (all premature) of Keats, Shelley, Byron, English poetry fell upon a languid interval, during which the voice of SAMUEL ROGERS (1763—1855) is, perhaps, the most typical, as that of WALTER SAVAGE LANDOR (1775—1864) is by far the most notable. But in 1833—a year after the death of Scott, a year before the death of Coleridge—a new and strong race of masters spring forward to carry on the torch. Thus 1833 sees the publication of *Sartor Resartus*,

by THOMAS CARLYLE (1795—1881); of *Pauline*, by ROBERT BROWNING (1812—1859); of *Prometheus Bound*, by his wife, ELIZABETH BARRETT BROWNING (1806—1861), and coincidently ALFRED TENNYSON (1809—1892), who has just had his earlier "Poems" abused by the critics, is busy upon *In Memoriam*. 1836 ushers in *The Pickwick Papers*, by CHARLES DICKENS (1812—1872); 1843 the first volume of *Modern Painters*, by JOHN RUSKIN (1819—1900), and the famous *Essays* of THOMAS BABINGTON MACAULAY, LORD MACAULAY (1800—1859). In 1847 three great novelists follow Dickens on to the scene—WILLIAM MAKEPEACE THACKERAY (1811—1863), with *Vanity Fair*; CHARLOTTE BRONTË (1816—1855), with *Jane Eyre and* ANTHONY TROLLOPE (1815-1882) with a first novel, that scarcely gives promise of *The Warden* (1855) and *Barchester Towers* (1857). The stream of poetry has been constant in England. In America, where WASHINGTON IRVING, HENRY DAVID THOREAU, RALPH WALDO EMERSON, NATHANIEL HAWTHORNE, in prose, and in poetry WILLIAM CULLEN BRYANT, NATHANIEL PARKER WILLIS, JOHN GREENLEAF WHITTIER, HENRY WADSWORTH LONGFELLOW, EDGAR ALLEN POE, made a very noble start, the literary inspiration dies down, and JAMES RUSSELL LOWELL, OLIVER WENDELL HOLMES, scarcely carry the breeze forward to WALT WHITMAN, who revives it in a new and strange fashion. But in these islands the names of great writers follow one another in a strong, steady stream—THOMAS HOOD (1798—1845), WILLIAM BARNES (1801—1886), CARDINAL NEWMAN (1801—1890), JAMES CLARENCE MANGAN (1803—1849), GEORGE BORROW (1803—1881), BENJAMIN DISRAELI, EARL OF BEACONSFIELD (1804—1881), EDWARD FITZGERALD (1809—1883), JOHN STUART MILL (1806—1873), ALEXANDER WILLIAM KINGLAKE (1809—1891), SIR SAMUEL FERGUSON (1810—1886), WILLIAM EDMONSTOUNE AYTOUN (1813—1865), JAMES ANTHONY FROUDE (1818—1894), EMILY BRONTË (1819—1848), "GEORGE ELIOT" (1819—1880), ARTHUR HUGH CLOUGH (1819—1861), MATTHEW ARNOLD (1822—1888), a critic to be ranked with Dryden and Coleridge; COVENTRY PATMORE (1823—1896), SYDNEY DOBELL (1824—1874); the Pre-Raphaelites, DANTE GABRIEL ROSSETTI (1828—1882), WILLIAM MORRIS (1831—1897), ALGERNON CHARLES SWINBURNE (1837—1909), with CHRISTINA ROSSETTI (1830—1894). Add to these the names of GEORGE MEREDITH (1828—1909), of ROBERT LOUIS STEVENSON (1850—1894), of WILLIAM ERNEST HENLEY (1849—1905), of FRANCIS THOMPSON (1859—1907), with those of LORD MORLEY and THOMAS HARDY (happily yet alive), and a long and imperfect list is very gloriously closed. It omits to speak of many great men of science and political thinkers—BENTHAM, BUCKLE, LECKY, DARWIN, HUXLEY, TYNDALL, HERBERT SPENCER, SAMUEL BUTLER, and others whose writings may appear to some to ornament the nineteenth century beyond any that have been named; as it omits to speak of our living Poet Laureate, ROBERT BRIDGES and of others—and of living writers, WILLIAM WATSON, RUDYARD KIPLING, SIR JAMES BARRIE, BERNARD SHAW, and a host of younger men who, having conquered fame in fiction, live to conquer more.

By Sir James Yoxall, M.A., M.P.,
Secretary of the National Union of Teachers; Editor of "The Schoolmaster."

Within arm's reach at this moment are two encyclopædias, five dictionaries, one thesaurus, and a dozen other books of reference; such I suppose, is the usual equipment of a writer's room; but how seldom is even a dictionary ready to the hand of the every-day man in all walks of life, or the elder scholar in the ordinary school The hours of private study, the essay, the letter, and other vehicles of self-expression and self-education are obtaining more and more vogue in schools, and the home-lesson system has always been such a mode and call for self-education; yet I daresay a good dictionary is hardly more often available for use during home-lessons than in the class-room, for other scholars than those in upper forms at public and other efficient secondary schools. Classes are often set to pass half-an-hour in "silent reading:" is a dictionary for each child always at hand then? Yet if the children are left to puzzle out the meaning of an unfamiliar word from the context they must often be misled. Surely a compact, sufficing dictionary such as this ought to travel to and fro in the book-bag of every school-child more than eight ears old.

A good dictionary is not a school-book only, however; in the extended education of after-life it ought to bear a part, and not for the student, author, or journalist only, but for everybody—for the clerk, the housewife, the shopman, the merchant, as much as the teacher, the preacher, the lawyer, and the public speaker. Great writers have not disdained the daily or even hourly use of the dictionary; Macaulay was said to have known his almost off by heart. Indeed, without frequent reference and verification even the possessor of a large vocabulary, gained from much reading, will use words incorrectly. Small books of synonyms are published; but, rightly, there are no synonyms; it is almost as true of the English language as it is of the French, that there is one word for each idea, and only one word. Exactitude of expression is a quality which can only be gained from a regular and systematic use of dictionaries, therefore; no thesaurus or any book of antonyms and synonyms can provide the equivalent of that. The value of exactitude of expression to the business man, the public speaker, the preacher, the stenographer. the clerk, and others needs no showing; and the school-child should be put in the way of using words with exactness and fitness from the first.

Most children go to school from homes where books of any importance are few; where the vocabulary used at table and in other domestic opportunities for conversation is restricted to a few hundred words. Most children go to school without much knowledge of verbal meanings or practice in shades of expression; these statements are true even yet. In too many secondary schools, even, it is assumed that home culture and atmosphere have rendered instruction in the proper use of the English language, the reading of it and the writing of it, needless; and in the primary schools too much stress on the mere grammar of the language is still laid. Seldom in public and other secondary schools do lads hunt in English dictionaries as they do in Greek and Latin lexicons, though for the most part the English language is almost as much unknown to them, or as vague. Yet a good, concise, compact English dictionary is one of the most interesting of works to study. The mythical person who is said to have said that the chapters in the dictionary were full of interest but too short and disconnected, expressed the obverse side of a great truth. As a factor in education, a dictionary ought not to be a book of casual reference, *but a constant, handy, frequently scanned guide.* One of the best ways of improving one's French or German is to carry a pocket dictionary of the language when travelling, and constantly to look up any unfamiliar word heard in talk, or seen upon an advertisement, or read in a newspaper; and such is one of the best ways of improving one's English, too.

The very brevity of the "chapters" and the disconnectedness due to the alphabetical arrangement of a dictionary may be helps to the acquisition of a stock of words exactly understood. Contexts often mislead; a *word* should be studied, learned, and known in its own dimensions and its own light. Daily use of a dictionary, by any one, even for a few minutes, brings a vast harvest in a few years; study three new words each day for a decade, and you will come to possess more words than Milton did and almost as many as Shakespeare used. Excellence in the use of language only arises from patient and even laborious study of words, but to what mental and material advantage excellence in the use of language may be put! The power of public speech is still the first passport to success in public life; the power of excellent, easy expression is of much pecuniary value to a clerk, as well as to a young journalist. People who mark examination papers, almost unconsciously attach at least as much value to the wording of the answers as to the contents of them. A dictionary is a tool, a weapon, a ladder, and *an implement of commercial success.*

In using it one should aim first of all at acquiring *precision*—the use of the fittest word for each occasion or meaning. How Flaubert toiled to do that is well known in the history of literature and literary style, but this does not apply to authorship only. In answering examination-paper questions it tells; it tells in teaching; it tells even in the listening to teaching; it tells in all the work of a school or private study; *it tells in business, politics, and all through life.* Whately said that the right sort of copiousness, even, depends on precise use of words. "It should be remembered that there is no real copiousness

in a multitude of synonyms and circumlocutions. A house will not be the better furnished for being stored with ten times as many of some kinds of articles as are needed, while it is perhaps destitute of those required for other purposes ; nor was Lucullus' wardrobe, which, according to Horace, boasted five thousand mantles, neccessarily well-stocked if other articles of dress were wanting. The completeness of a library does not consist in the number of volumes, especially if many of them are duplicates ; but in its containing copies of each of the most valuable works." And in like manner the copiousness of language consists in having at command, as far as possible, a suitable expression for *each* different modification of thought. This, consequently, will often save much circumlocution ; so that the greater command of language, the more concisely we shall be able to write or talk.

I do not suppose that any later age can be so fit a period for learning many words and the right use of them as the school age is, when memory is more plastic and will therefore be the more retentive ; so that fitness, exactitude, and copiousness in the use of one's native tongue ought to be objects of solicitude at schools. School may, therefore, be the most suitable place of all for the study of a dictionary, though I fear it is at present the English place where English dictionaries are least used. Teachers warn against tautology, redundancy, circumlocution, ambiguity, verbosity, but prevention is better than cure ; all these five faults in expression—and how often does not one suffer from them, as a listener, not only in hearing public speeches or reading articles, but in common conversation !—arise from ignorance of *exact* meanings and neglect of books such as this. There is, of course, a dryness, a stiffness, a constipation of expression obvious in some writers and many speakers, and these are faults ; but there is no need to run to the extreme of George Sand's *style coulant* for an opposite and a cure :

Words are like leaves, and where they most abound
Much fruit of sense beneath is rarely found.

The man, and even the lad, familiar with the dictionary will not be likely to use words or phrases which merely repeat an idea already expressed, or to use superfluous words, or to be roundabout in using necessary words, or to state a proposition with ambiguity ; at the same time, he will know that he must not leave out any needful word for the mere sake of being brief. True brevity of expression was defined by Schopenhauer as "saying only what is worth saying, and avoiding tedious detail." The definitions in a dictionary are usually models of that.

A dictionary instils not only the use of proper words but the avoidance of the others. Slang words, foreign words, words unduly long, obsolete words, very unusual words, and words which extravagantly express a simple thing are to be avoided. The omissions from a dictionary teach us much. After a number of years a slang word, an often-used and adopted foreign word, and a technical expression which persist come to be included in a dictionary as parts of the King's English ; but meantime they are to be avoided ; as a rule, words

too old, that have become obsolete, fall out of all but the vastest dictionaries in time, so that omission teaches here again. The use of quaint, exotic, affected, or archaic language is an error, which a good, practical, concise dictionary will not authorise by retaining or adopting words which are quaint, exotic, affected, or archaic. Brougham said that "The English writers who really unlock the treasures of the language are those who flourished from the end of Elizabeth's to the end of Queen Anne's reign; who used a good Saxon dialect with ease, but with correctness and perspicuity—learned in the ancient classics, but only enriching their mother tongue when the Attic could supply its defects—not overlaying it with a pedantic coinage of words." The omissions from a dictionary are, therefore, instructive, and help to enforce the hint which Goethe gave, that "not the words in themselves and independently are accurate, vigorous, clear, or graceful, but the spirit which the words embody," and slang, for instance, often embodies something too new and raw, just as archaisms embody something too old and fusty, for use to-day.

School slang itself is probably one result of insufficient use of the dictionary at schools; "ripping" and "awfully," "beastly" and "topping" convey their own condemnation to the ear of the lad who knows what these words should really mean. What are called barbarisms and solecisms similarly fail to pass muster with the dictionary student, and so do contractions and initials, in place of seemly and suitable full words.

But it is important not to use a dictionary for the words in it only or mainly; we must *understand* and *exercise* as well as *apprehend* the words. The meaning is more important than its mere expression, the context is more weighty than the form. Pride in the use of dictionary language may betray a school boy into an unreal scholarship. In the "Grammar of Assent," Newman pointed out that "a clever schoolboy, from a thorough grammatical knowledge of both languages, might turn into English a French treatise on national wealth, produce, consumption, labour, profits, measures of value, public debt, and the circulating medium, with an *apprehension* of what it was that his author was stating, while he had not the faintest *conception* himself what the treatise which he was translating really determined. The man uses language as the vehicle of *things*, and the boy, of *abstractions*." Milton would not "praise a fugitive and cloistered virtue," such as the use of words for words' sake, "unexercised and unbreathed, that never sallies out and sees her adversary," the facts.

The very concision of the definitions in a dictionary teaches something; how to begin and when to leave off. In all expression the beginning is very important, but more people can begin well than end well. The use of a dictionary teaches to be sufficient, and that only; so that when the work has been done the words end, as mine do now.

A MODERN DICTIONARY

OF THE

ENGLISH LANGUAGE.

A, ā or a, *indef. art.* or *adj.* (contr. of an), one, or any; used before consonants, semi-vowels, and most words beginning with h [see also An]: *prep.* used with verbal nouns in -ing, beginning with a consonant.

A1, the term in *Lloyd's Register* of British and foreign shipping which denotes vessels of the highest class; first-class; first-rate.

Aam, âm, *n.* a liquid measure for oils and wine in use in Holland and certain other European countries.

Aaron's Rod, a'-ronz rod, *n.* an architectural ornament representing a serpent entwined round a rod.

Aback, à-bak', *adv.* to the back, behind, caught by the wind, and pressed backwards against the mast; said of sails; suddenly surprised.

Abacus, ab'à-kus, *n.*; *pl.* E. Abacuses, -ez, L. Abaci, -sī, a contrivance of beads or balls strung upon wires, formerly used for arithmetical computation; the slab crowning a column or pillar.

Abaft, à-bäft', *adv.* & *prep.* at, towards, or in the direction of the stern of a ship; astern.

Abalienate, ab-ā'li-en-āt, *v. t.* to transfer the title of property from one person to another.

Abandon, à-ban'dun, *v.t.* to give up; desert or forsake utterly; reject; yield oneself; give up all claim to: *n.* unrestraint; freedom of manner.

Abandoned, à-ban'dund, *p. adj.* forsaken or deserted; left to destruction; shamelessly profligate.

Abandonee, à-ban-dun-ē', *n.* one to whom anything is relinquished.

Abandonment, à-ban'dun-ment, *n.* the act of abandoning; the state of being abandoned; freedom from constraint; abandon.

À bas, à-bä', down with (Fr.)

Abase, à-bās', *v.t.* to humble or degrade; debase morally; dishonour.

Abasement, à-bās'ment, *n.* the act of abasing or humiliating; state of degradation or depression.

Abash, à-bash', *v.t.* to put to confusion; confound or make ashamed by consciousness of guilt or error.

Abashment, à-bāsh'ment, *n.* the act of abashing; the state of being abashed.

Abatable, à-bā'ta-bl, *adj.* that which is capable of being abated.

Abate, à-bāt', *v.t.* to decrease; lessen or diminish in strength or violence; to stop an action, as by death or marriage of one of the parties to the suit.

Abatement, à-bāt'ment, *n.* the act of abating; the state of being abated; diminution; decrease; the amount by which a sum or quantity is reduced.

Abatis, **Abattis**, ä-bä-tē', *n.* a mark of dishonour attached to a coat of arms; a fence or barricade composed of felled trees with the branches pointing outward.

Abat-jour, ä-bä-zhōōr', *n.* a skylight.

Abattoir, ä-bä-twär', *n.*; *pl.* Abattoirs, a public slaughter-house for cattle.

A battuta, ä bat-tōō'tà, in strict time; a musical direction.

Abat-voix, ä-bä-vwä', *n.* sounding-board over a pulpit.

Abb, ab, *n.* the yarn of the warp in weaving.

Abba, ab'bà & äb'bä, *n.* father; a title of a bishop in the Syriac, Coptic, and Ethiopic Churches.

Abbacy, ab'bà-si, *n.*; *pl.* Abbacies, -siz, the office, rights, privileges, and jurisdiction of an abbot.

Abbatial, **Abbatical**, ab-bā'shal, ab-bat'i-kal, *adj.* pertaining to an abbot or an abbey.

Abbé, ab-bā', *n.*, a title given to French students of theology who, prior to the Revolution, held, by permission of the Pope, certain rights in the abbeys, but exercised no monastic control. As a class the Ab-

were distinguished for their literary attainments.

Abbess, ab'bes, *n.* the lady-superior of a convent or nunnery.

Abbey, ab'bē, *n.* ; *pl.* Abbeys, -iz, an establishment for religious devotees of either sex, renounced to celibacy and seclusion from the world.

Abbot, ab'but, *n.* the superior or head of an abbey.

Abbot of Misrule, *n.* -of mis'rūl, in mediæval times the master of revels.

Abbreviate, ab-brē'vi-āt, *v.t.* to shorten, as by contraction of a word, or the omission of words in a sentence ; reduce a quantity to its lowest terms.

Abbreviation, ab-brē-vi-ā'shun, *n.* the act of shortening or abbreviating ; the state of being abbreviated ; the word, phrase, or title so contracted, as M.D. for Doctor of Medicine.

Abbreviator, ab-brē-vi-ā-tor, *n.* one who shortens or abbreviates.

Abbreviatory, ab-brē'vi-ā-tō-ri, *adj.* abbreviating or contracting.

Abbreviature, ab-brē'vi-ā-tūr, *n.* the sign, letter, or character used for contraction ; a compendium or abridgment.

Abdicant, ab'di-kant, *adj.* renouncing ; abdicating : *n.* one who renounces or abdicates.

Abdicate, ab'di-kāt, *v.t.* renounce, give up, or withdraw from ; to relinquish the crown in favour of a successor.

Abdication, ab-di-kā'shun, *n.* the act of relinquishment or resignation.

Abdicator, ab-di-kā-tor, *n.* one who abdicates or resigns.

Abdomen, ab'dō-men, *n.* the belly ; the cavity containing the digestive apparatus or viscera ; the posterior segment or third division of the body of an insect.

Abdominal, ab-dom'i-nal, *adj.* pertaining to the abdomen.

Abdominoscopy, ab-dom-i-nos'kō-pē, *n.* an inspection of the abdomen to detect disease.

Abdominous, ab-dom'i-nus, *adj.* relating to the abdomen ; large-bellied.

Abduce, ab-dūs', *v.t.* to draw away by persuasion or argument ; draw aside by an abductor muscle.

Abducent, ab-dū'sent, *n.* that which abducts : *adj.* pulling away from a common centre.

Abduct, ab-dukt', *v.t.* to carry off by stealth or force ; kidnap.

Abduction, ab-duk'shun, *n.* the act of abducting or kidnapping.

Abductor, ab-duk'tor, *n.* one who, or that which, abducts ; a muscle moving certain parts from the axis of a limb.

Abeam, a-bēm', *adv.* at right angles to the keel of a ship.

Abear, a-bār', *v.t.* to bear, tolerate.

Abecedarian, ā-bē-sē-dā'ri-an, *adj.* belonging to the alphabet : *n.* one teaching or learning the alphabet.

Abecedary, ā-bē-sē-dā'ri, *adj.* belonging to the alphabet : *n.* one teaching or learning the alphabet.

Abed, a-bed', *adv.* in bed ; to bed,

Abele, Abel-tree, a-bēl', ā'bel-trē, *n.* the white poplar.

Abelmosk, Abelmusk, ā'bel-mosk, ā'bel-musk, see Hibiscus.

Aberglaube, ä-bèr-glou'bèr, *n.* belief which cannot be verified ; superstition.

Aberrance, Aberrancy, ab-er'ans, —'ans-i, *n.* a deviation from the right way.

Aberrant, ab-er'ant, *adj.* departing from the usual path, type, or standard.

Aberration, ab-er-rā'shun, *n.* the act of departing from the usual path, type, or standard ; mental derangement ; the unequal refraction of rays of light from a lens so that they do not converge to a single point.

Aberuncator, ab-ē-rung'kā-tor, *n.* an instrument for weeding, and for pruning trees.

Abet, a-bet', *v.t.*, *pret.* & *p.p.* abetted, *p.pr.* abetting, to encourage ; to aid or assist in the performance of an act, usually of a criminal nature ; to incite or instigate.

Abetment, a-bet'ment, *n.* the act of abetting or instigating to action or crime.

Abetter, Abettor, a-bet'er, —'or, *n.* one who aids or abets in the commission of a crime ; one who protects a criminal or assists him to escape from justice.

Abevacuation, ab-ē-vak-ū-ā'shun, *n.* the evacuation of morbid humours.

Abeyance, a-bā'ans, *n.* held or kept back ; held over ; a state of suspension.

Abhal, ab'hal, *n.* the juniper berry.

Abhor, ab-hôr', *v.t.*, *pret.* & *p.p.* abhorred, *p.pr.* abhorring, to hate, loathe, execrate, abominate ; be strongly adverse to ; shrink or recoil from with horror, dread, or disgust.

Abhorrence, ab-hor'rens, *n.* detestation ; extreme hatred ; that which excites a feeling of strong repugnance.

Abhorrent, ab-hor'rent, *adj.* detestable, hateful, repulsive.

Abhorrer, ab-hôr'rèr, *n.* one who abhors or detests.

Abhorring, ab-hôr'ring, *n.* the feeling of abhorrence ; the object of abhorrence.

Abide, ą-bīd, *pret.* & *p.p.* abode, *p.pr.* abiding, *v.t.* to await, endure, withstand, stand firm; *v.i.* to dwell, reside, continue, tolerate.

Abiding, ą-bī'ding, *p. adj.* remaining; staying; steadfast, in faith or in purpose.

Abies, ab'i-ēz, *n.* a genus of coniferous trees containing the silver firs, cedars, &c.

Abietin, ab'i-ē-tin, *n.* a resin derived from the turpentinous products of some species of fir.

Abigail, ab'i-gāl, *n.* a waiting-maid so called from A., "thine handmaid" (1 Sam. xxv. 2-43).

Ability, ą-bil'i-ti, *n.*; *pl.* Abilities, -tiz, power to perform; skill to achieve; capability for carrying out; capacity to devise, receive, retain, or make use of; physical or moral strength; talents or gifts, in a special or general degree; wealth; means.

Abintestate, ab-in-tes'tāt, *adj.* succeeding to the estate of a person dying without a will.

Abiogenesis, ab-i-ō-jen'e-sis, *n.* spontaneous generation.

Abiogenous, ab-i-oj'en-us, *adj.* resulting from spontaneous generation.

Abject, ab-jekt, *adj.* worthless; mean; low; despicable; in a sunken or degraded condition.

Abjection, ab'jek'shun, *n.* the act of being cast down; cast away; degradation.

Abjuration, ab-jū-rā'shun, *n.* an oath of renunciation, as of allegiance; the act of renouncing.

Abjure, ab-jūr', *v.t.* to renounce upon oath; forswear allegiance to; repudiate or recant.

Ablactation, ab-lak-tā'shun, *n.* the act of weaning a child from the breast.

Ablation, ab-lā'shun, *n.* the act of removal or carrying away.

Ablatitious, ab-lą-tish'us, *adj.* having the quality of carrying away.

Ablative, ab'lą-tiv, *n.* one of the cases of Latin nouns, expressing chiefly separation and instrumentality and sometimes place.

Ablative Absolute, ab'sō-lut, *n.* a particular construction in Latin of a noun and a participle in the A. case, agreeing in gender and number, and forming a clause by themselves, but unconnected grammatically with the rest of the sentence.

Ablaut, ăp'lout, *n.* the change of vowel in the base of a word, as *do, did.*

Ablaze, ą-blāz', *adv.* on fire; well alight; in a blaze; eager; inflamed with desire; resplendent.

Able, ābl, *adj.* possessed of power, means, or ability; qualified, competent; bodily or mentally strong; legally authorised or entitled.

Able-bodied, bod'ed, *n.* possessed of physical strength; capable or efficient for duty.

Ablegate, ab'lē-gāt, *n.* the envoy sent by the Pope with insignia, &c., to newly-appointed cardinals.

Abloom, ą-blōōm', *adv.* in bloom.

Abluent, ab'lū-ent, *adj.* cleansing; *n.* that which cleanses; a substance which purifies the blood.

Ablution, ab-lū'shun, *n.* a washing or cleansing of the body by water; moral purification.

Ablutionary, ab-lū'shun-ā-ri, *adj.* pertaining to cleansing.

Abnegate, ab'nē-gāt, *v.t.* to refuse or deny to oneself.

Abnormal, ab-nôr'mal, *adj.* irregular; deformed; unnatural; departing from a type, standard, or rule; exceptional; out of the common.

Abnormality, ab-nôr-mal'i-ti, *n.*; *pl.* abnormalities, -tiz, the state or condition of being abnormal or irregular; difference or departure from a regular type or rule.

Abnormally, -li, *adv.* in an abnormal manner.

Abnormity, ab-nôr'mi-ti, *n.*; *pl.* Abnormities, -tiz, deformity; irregularity.

Aboard, ą-bôrd', *adv.* on or within a vessel: *prep.* into a ship.

Abode, ą-bōd', *n.* a place of continued residence; a dwelling; a habitation; residence generally.

Abolish, ą-bol'ish, *v.t.* to efface; do away with; put an end to.

Abolition, ab-ō-lish'un, *n.* the act of abolishing; the state of being abolished; the annulment or abrogation of decrees, rites, customs, &c.

Abolitionism, ab-ō-lish'un-izm, *n.* the doctrine or principles of those advocating the abolition of certain laws or customs, as the traffic in drink, slaves, &c.

Abolitionist, ab-ō-lish'un-ist, *n.* one who is in favour of the repeal or abolition of some existing law or custom, as the slave trade or drink traffic.

Aboma, ą-bō'mą, *n.* the name of a large species of boa or anaconda of tropical America.

Abominable, ą-bom'i-ną-bl, *adj.* hateful; odious; offensive; unclean.

Abominate, ą-bom'i-nāt, *v.t.* to abhor; regard with feelings of disgust or hatred.

Abomination, ą-bom-i-nā'shun, *n.* excessive hatred; the act of abominating; the thing abominated; defilement; pollution.

Aboriginal, ab-ō-rij'i-nal, *adj.* original; primitive; existing from the beginning: *n.* the species of animals or plants presumed to have originated within a given area.

Aborigines, ab-ō-rij'i-nēz, *n.pl.* the first or primitive inhabitants of a country; the native or indigenous animals or plants of any geographical area.

Abort, a-bôrt', *v.i.* to miscarry in birth; to remain undeveloped.

Aborted, a-bôr'ted, *p.adj.* prematurely born; checked or arrested in development; functionally imperfect.

Abortion, a-bôr'shun, *n.* untimely birth; miscarriage; an imperfect fœtus; a monster; that which falls short of maturity by arrest of development.

Abortionist, a-bôr'shun-ist, *n.* one who is guilty of the crime of procuring a criminal abortion, or who induces abortion.

Abortive, a-bôr-tiv, *adj.* born imperfect; arrested in development; without issue or result.

Abound, a-bound', *v.i.* to have in plenty or abundance; to exist in great numbers or quantity (followed by *in* or *with*).

About, a-bout', *adv.* around; on every side; circuitously; near to; intending: *prep.* concerned in; relating to.

About-sledge, -slej, *n.* a large hammer used by blacksmiths.

Above, a-buv', *adv.* in a higher place; overhead; in heaven; before; besides: *prep.* superior; beyond; in excess of.

Above-board, -bord', *n.* without trickery; in open sight.

Above-cited, -si-ted, *adj.* aforesaid.

Above-deck, -dek, *adj.* on deck; honestly.

Abradant, ab-rād'ant, *adj.* having the property of rubbing away: *n.* substance employed for abrading or scouring.

Abrade, ab-rād', *v.t.* to wear or rub away; to remove as by friction or abrasion; to corrode, as by acids.

Abrahamic, a'brā-ham'ik, *adj.* pertaining to the patriarch Abraham, or the A. dispensation.

Abranchia, Abranchiata, {a-brang'ki-ā, a-brang'ki-ā-tā,} *n.pl.* animals devoid of gills.

Abrasion, ab-rā'zhun, *n.* the act of wearing or rubbing away; a chafe.

Abreast, a-brest', *adv.* side by side; in line with; opposite to; at the same level.

Abreption, ab-rep'shun, *n.* carrying or snatching away; the state of being separated by force.

Abridge, a-brij', *v.t.* to curtail, shorten, condense, epitomise.

Abridgment, a-brij'ment, *n.* the state of being contracted or curtailed; an epitome.

Abroach, a-brōch', *adv.* & *adj.* letting out; placed in position for yielding the contents.

Abroad, a-brôd', *adv.* widely; expansively; beyond the limits of house or country; wide of the mark.

Abrogate, ab'rō-gāt, *v.t.* to abolish, annul, or repeal by authority.

Abrogation, ab-rō-ga'shun, *n.* the act of abrogating; the repeal or annulling of a law.

Abrogator, ab'rō-gā-tor, *n.* one who repeals by authority.

Abrupt, ab-rupt', *adj.* broken; terminating suddenly; steep; precipitous; rough, unceremonious.

Abrupted, ab-rupt'ed, *p. adj.* broken off with suddenness; torn off or asunder.

Abruption, ab-rup'shun, *n.* a separation with violence; a sudden or abrupt termination.

Abscess, ab'ses, *n.*; *pl.* Abscesses, -ez, a collection of morbid matter or pus in the tissues of the body.

Abscission, ab-sizh'un, *n.* the act of severance; the breaking off in a sentence, leaving the rest to be implied.

Abscond, ab-skond' *v.i.* to flee or retire in haste from the place of one's residence or post of duty; quit the country in secret.

Absence, ab'sens, *n.* the state of being absent; the period of being absent.

Absent, ab'sent, *adj.* not present; away; wanting; regardless; abstracted.

Absent, ab-sent', *v.t.* to retire or keep away from.

Absentee, ab-sen-tē' *n.* one who is absent or absents himself purposely from home or duty; a landlord [or landowner] who resides in a country other than that in which his estate is situate.

Absenteeism, ab-sen-tē'izm, *n.* the state or custom of living away from one's country or estate.

Absently, ab'sent-li, *adv.* in an abstracted manner.

Absinthe, E. ab'sinth, Fr. äb'sangt, *n.* wormwood; a bitter aromatic liqueur compounded of brandy and wormwood, largely drunk in France.

Absinthial, Absinthian, Absinthic, {ab-sin'thi-al, ab-sin'thi-an, ab-sin'thik,} *adj.* of or pertaining to or derived from, wormwood.

Absinthiate, ab-sin'thi-āt, *v.t.* to embitter or impregnate with wormwood.

Absinthin, ab-sin'thin, *n.* the bitter principle of wormwood.

Absolute, ab'sō-lūt, *adj.* free as to condition; perfect in itself; unlimited in power; fixed; irrevocable; despotic; positive: *n.* the will or power of the Almighty.

Absolution, ab-sō-lū'shun, *n.* the act of absolving from the consequences of sin.

Absolution Day, -dā, the Tuesday before Good Friday.

Absolutism, ab'sō-lū-tizm, *n.* the state of being absolute; the principle or system of absolute government.

Absolutist, ab'sō-lūt-ist, *n.* a supporter or advocate of despotic or absolute government.

Absolutory, ab-sol'ū-tō-ri, *adj.* absolving; capable of absolving.

Absolvatory, ab-sol'vȧ-tō-ri, *adj.* containing or conferring absolution; having power to pardon or absolve.

Absolve, ab-solv', *v.t.* to release or set free; clear of crime or guilt; to forgive or remit.

Absolver, ab-solv'ėr, *n.* one who absolves, or pronounces absolution.

Anachronistic, an-ak-ron-is'tik, *adj.* out of date.

Anaclastic, an-a-klas'tik, *adj.* pertaining to, or produced by, refraction ; dioptric.

Anaclastics, an-ȧ-klas'tiks, *n.* that part of optics which treats of refraction ; dioptrics.

Anacoluthon, an-ak-ō-lū'thon, *n.* want of grammatical sequence, one part of the sentence belonging to a different construction from the other.

Anaconda, an-ȧ-kon'dȧ, *n.* the specific name of a large South American boa, and loosely applied to any large snake which crushes its prey.

Anacreontic, an-ak-rē-on'tik, *adj.* after the manner of Anacreon, the Greek poet (6th cent. B.C.) : *n.* a poem in praise of love and wine ; erotic.

Anadromous, ȧ-nad'rō-mus, *adj.* ascending from the sea to fresh-water rivers to deposit spawn, as the salmon, &c. ; tending upwards : said of ferns.

Anæmia, **Anemia,** ȧ-nē'mi-ȧ, *n.* deficiency or low condition of the blood.

Anæsthesia, **Anesthesia,** an-es-thē'si-ȧ, *n.* a condition of insensibility to pain, combined with loss of the sense of touch, produced by anæsthetics.

Anæsthetic. See Anesthetic.

Anaglyph, an'ȧ-glif, *n.* a work of art carved in relief, as distinguished from intaglio.

Anaglyphic, **Anaglyptic,** an-ȧ-glif'ik, *adj.* relating to anaglyphs, or the art of decoration in relief.

Anaglyphy, an-ag'li-fi, *n.* the art of producing sculpture, or ornamentation, in relief.

Anaglyptograph, an-ȧ-glip'tō-graf, *n.* an instrument by which a medallion-engraving of any object in relief can be made.

Anaglyptographic, an-ȧ-glip'tō-graf'ic, *adj.* relating to the production of engravings in relief.

Anaglyptography, an-ȧ-glip-tog'rȧ-fi, *n.* the art of reproducing relief-work on paper.

Anagram, an'ȧ-gram, *n.* a word or a sentence constructed out of another by the transposition of the letters contained in the second ; a word obtained by reading the letters of another word backwards.

Anagrammatic, **Anagrammatical,** an-ȧ-gram-mat'ik, —'i-kȧl, *adj.* relating to, or forming an anagram.

Anagrammatically, -li, *adv.* in the style of an anagram.

Anagrammatise, **Anagrammatize,** an-ȧ-gram'mȧ-tīz, *v.t.* to make into an anagram ; *v.i.* to construct anagrams.

Anal, ā'nal, *adj.* relating to the anus ; situated near to the anal orifice.

Analect, an'ȧ-lekt, *n.* ; *pl.* Analects, -lēkts, & Anelecta, -tȧ, a passage, or extract from a published work : *pl.* a collection of such extracts from different authors.

Analectic, an-ȧ-lek'tik, *adj.* pertaining to, or composed of, selections from other works.

Analgesia, an-al-jē'si-ȧ, *n.* the insensibility to pain in any part of the body. Called also Analgia.

Analgetic, an-al-jet'ik, *adj.* pertaining to analgesia ; insensibility to pain ; painless.

Anallantoic, an-al-an-tō'ik, *adj.* not having an allantois.

Analogical, an-ȧ-loj'i-kal, *adj.* bearing reference ; having relation or resemblance.

Analogically, -li, *adv.* by way of analogy.

Analogise, **Analogize,** ȧ-nal'ō-jīz, *v.t.* to reason or expound by reference to analogy : *v.i.* to treat or investigate by use of analogy.

Analogism, ȧ-nal'ō-jism, *n.* a reasoning from the cause to the effect ; study and examination of matters and things by reference to their analogies.

Analogist, ȧ-nal'ō-jist, *n.* one who reasons from the standpoint of analogy.

Analogous, ȧ-nal'ō-gus, *adj.* possessing points of analogy ; linked by resemblance ; similar.

Analogue, an'ȧ-log, *n.* an object which bears analogy to something else ; a part which corresponds with another in structure, function, or other relations.

Analogy, ȧ-nal'ō-ji, *n.* ; *pl.* Analogies, -jiz, agreement, resemblance, or correspondence in relations between different objects ; the inference as to general agreement which is derived from similarity in certain essential particulars ; equality of mathematical ratios ; conformity of its parts to the general rules and structures of a language,

Analysable, } an'ā-lī-zā-bl, { *adj.* capable of being resolved by, or that may be subjected to, analysis.
Analyzable, }

Analyse, } an'ā-līz, { *v.t.* to separate or resolve; determine the nature of a compound by resolution of its constituent parts.
Analyze, }

Analysis, ā-nal'i-sis, *n.*; *pl.* Analyses, -sēz, the resolution of a compound into its constituent parts; the method of determining the nature of a compound by resolution into its constituent parts; the resolving of problems by reducing the conditions that are in them to equations; a synopsis.

Analyst, an'ā-list, *n.* one who is skilled in analysis; one skilled in the resolution of chemical compounds.

Analytic, } an-ā-lit'ik, } *adj.* relating to, or characterised by, the method of analysis.
Analytical, } —i-kal, }

Analytically, -al-li, *adv.* in the manner or by means of analysis.

Analytics, an-ā-lit'iks, *n. pl.* the science of analysis.

Anamorphosis, an-ā-môr'fō-sis & an-ā-môr-fō'sis, *n.* the irregular and distorted representation of an object as viewed directly, but which is corrected and reduced to its proper proportion when regarded from a different point of view, or reflected by a curved mirror; the abnormal or monstrous development of a portion of a plant or flower; a gradual progression from one type to another.

Ananas, an-an'as, *n.* a genus of tropical plants, to which the pineapple belongs.

Anandrous, an-an'drus, *adj.* destitute of stamens.

Anantherous, an-an'thēr-us, *adj.* destitute of anthers.

Ananthous, an-an'thus, *adj.* without flowers.

Anapest, } an'ā-pest, { *n.* a foot comprising two short syllables and one long syllable.
Anapæst, }

Anaphora, an-af'ō-rā, *n.*; *pl.* Anaphoræ, -rē, the repetition at the commencement of the succeeding clauses or sentences of the word or words used in commencing the first; that part of the Eucharistic service which commences with the Sursum Corda; the oblique ascension of a star.

Antemetic, **Antiemetic,** ant-ē-met'ik, —i-ē-met'ik, *adj.* allaying vomiting: *n.* a medicine possessing this property.

Ante-Mosaic, an-tē-mō-za'īk, *adj.* before the time of Moses.

Antemundane, an-tē-mun'dān, *adj.* before the creation of the world.

Antenatal, an-tē-nā'tal, *adj.* before birth.

Ante-Nicene, an'tē-nī'sēn, *adj.* before the Council of Nicæa (325 A.D.).

Antenna, an-ten'à, *n.*; *pl.* Antennæ, -nē, the jointed horns or feelers upon the heads of insects and crustacea.

Antennal, Antennary, an-ten'al, —'ā-ri, *adj.* of the nature of antennæ.

Antenniferous, an-ten-nif'ėr-us, *adj.* bearing antennæ.

Antenniform, an-ten'i-fôrm, *adj.* shaped like an antenna.

Antennula, Antennule, an-ten'ū-la, —'ūl, *n.* ; *pl.* -lē, a little antenna.

Antenuptial, an-tē-nup'shal, *adj.* before marriage.

Antepaschal, an-tē-pas'kal, *adj.* before Easter ; preceding the Jewish Passover.

Antepast, an'tē-past, *n.* a foretaste.

Antepenult, Antepenultima, an-tē-pē-nult', an-tē-pē-nul'ti-mā, *n.* the last syllable but two of a word.

Antepenultimate, an-tē-pē-nul'ti-māt, *adj.* pertaining to the last but two : *n.* that which is last but two.

Anteprandial, an-tē-pran-di'al, *adj.* before dinner.

Anterior, an-tēr'i-or, *adj.* more to the front ; former.

Anteriority, an-tēr-i-or'i-ti, *n.* the quality of being anterior, esp. in order of time ; priority.

Anteroom, an'tē-room, *n.* a room before, or forming an entrance to, another ; an antechamber.

Antetemple, an'tē-tem-pl, *n.* the portico of an ancient temple or church ; the narthex.

Anthelion, ant-hē'- or an-thē'li-on, *n.* ; *pl.* Anthelia, -ā, a halo of a coloured ring or rings, opposite the sun, formed around the shadow of the head of the observer, as projected on a cloud or moist surface.

Anthem, an'them, *n.* a composition from the Scriptures or liturgy set to sacred music.

Anthem-wise, -wīz, *adv.* in the style of an anthem ; antiphonally.

Anther, an'thėr, *n.* the summit of the stamen of a flower containing the pollen or fertilising dust.

Antheriferous, an-thėr-if'ėr-us, *adj.* bearing anthers.

Antherogenous, an-thėr-oj'en-us, *adj.* producing anthers.

Antheroid, an'thėr-oid, *adj.* having the form of an anther.

Anthocarpous, an-thō-kär'pus, *adj.* having a fruit formed from the ovaries of several flowers, as the pineapple.

Anthography, an-thog'ra-fi, *n.* the scientific description of flowers.

Antholeucin, an-thō-lū'sin, *n.* the white colouring-matter in flowers.

Anthological, an-thō-loj'i-kal, *adj.* pertaining to an anthology ; consisting of beautiful extracts, more especially of those from the poets.

Anthologist, an-thol'ō-jist, *n.* one who compiles an anthology.

Anthology, an-thol'ō-ji, *n.* a collection of choice poems, epigrams, and fugitive pieces by various authors ; a hymnal.

Anthony's Fire. See Erysipelas.

Anthracene, an'thra-sēn, *n.* a complex hydrocarbon, obtained from coal-tar ; paranaphthalin.

Anthracite, an-thra-sīt, *n.* a non-bituminous coal which burns without smoke ; blind-coal ; glance-coal ; stone-coal.

Anthracitic, an-thra-sit'ik, *adj.* resembling, or of the nature of, anthracite.

Anthraconite, an-thrak'ō-nīt, *n.* black marble, and other black varieties of limestone, usually bituminous, and emitting a fetid smell when rubbed ; stinkstone.

Anthrax, an'thraks, *n.* ; *pl.* Anthraces, -ēz, a carbuncle, or malignant boil ; the splenic fever of sheep and cattle, caused by the presence of a bacillus in the blood and tissues ; the carbuncular disease caused in man by inoculation from affected sheep and cattle.

Anthropography, an-thrō-pog'ra-fi, *n.* that branch of anthropology which treats of the actual geographical distribution of the human race, and the local variations of its different divisions.

Anthropoid, an'thrō-poid, *adj.* resembling man : *n.* one of the higher apes resembling man.

Anthropoidea, an-thrō-poi'dē-a, *n.pl.* a suborder of primate mammals, including man, the apes, and monkeys.

Anthropological, an'thrō-po-loj'i-kal, *adj.* relating to anthropology.

Anthropologist, an-thrō-pol'ō-jist, *n.* a student of Anthropology.

Anthropology, an-thrō-pol'ō-ji, *n.* the science of man, considered zoölogically or ethnographically.

Anthropometric, an-thrō-po-met'rik, *adj.* relating to the measurement or proportions of the human body.

Anthropometrically, -al-li, *adv.* in an anthropological manner, or by means of anthropometry.

Anthropometry, an-thrō-pom'e-tri, *n.* the measurement of the human body ; the department of anthropology relating to such measurement of persons at various ages, and in different tribes, races, occupations, &c.

Anthropomorphic, an-thrō-po-môr'fik, *adj.* characterised by anthropomorphism; resembling man.

Anthropomorphism, an-thrō-po-môr'fizm, *n.* the ascription of a human form and attributes to the Deity, or to supernatural beings.

Anthropomorphist, an-thrō-po-môr'fist, *n.* one who invests the Divine Being with a human form and attributes.

Anthropomorphize, an-thrō-po-môr'fīz, *v.t.* to invest with human qualities.

Anthropophagi, an-thrō-pof'ȧ-jī, *n. pl.* men-eaters; cannibals.

Anthropophagistic, an-thrō-pof-ȧ-jis'tik, *adj.* cannibalistic.

Anthropophagous, an-thrō-pof'ȧ-gus, *adj.* feeding on human flesh.

Anthropophobia, an-thrō-pō-fō'bi-ȧ, *n.* the dread of meeting a fellow-man.

Anthysteric. See Antihysteric.

Antiar, an'ti-är, *n.* the upas-tree of Java; a poison made from one species of the upas-tree.

Anti-attrition, an-ti-ȧ-trish'un, *n.* that which resist attrition or friction.

Antibilious, an-ti-bil'i-us, *adj.* counteractive of biliousness.

Antic, an'tik, *adj.* grotesque: *n.* a clown; a trick; a grotesque gesture.

Anticatarrhal, an-ti-ka-tär'al, *adj.* efficacious against catarrh: *n.* a remedy thus used.

Antichrist, an'ti-krīst, *n.* an opponent of Christ, esp. the great personal opponent expected to appear before the end of the world [1 John ii. 22].

Arrondissement, à-rông-dēs'mäng, *n.* a sub-division in France, of a department forming an administrative district.

Arrow, ar'rō, *n.* a slender, pointed missile weapon, usually feathered and barbed, made to be shot from a bow.

Arrow-head, -hėd, *n.* the head or barb of an arrow; an aquatic plant so named from its leaves.

Arrowroot, ār'rō-rōōt, *n.* a starch obtained from the rootstocks of several species of W. Indian plants.

Arrow-wood, -wood, *n.* a wood of which the arrows of the Red Indians are made.

Arrow Characters, kar'ak-tėrs, *n. pl.* the arrow-headed (cuneiform or wedge-shaped) characters of the Assyrian inscriptions.

Arroyo, à-roi'ō, *n.*; *pl.* Arroyos, -ōz, a watercourse or rivulet; the dry bed of a small stream (U.S.).

Arsenal, är'se-nal, *n.* a magazine for the storage of arms and military stores for land or naval service, or their manufacture.

Arseniate, Arsenate, är-sē'ni-āt, —'sē-nāt, *n.* a salt formed by combination of arsenic acid with any base.

Arsenic, är'se-nik, *n.* an element of steel-gray colour and brilliant lustre, and exceedingly brittle, occurring usually in combination.

Arsenic, Arsenical, är-sen'ik, —'i-kal, *adj.* pertaining to or containing arsenic.

Arseniferous, är-sen-if'ėr-us, *adj.* bearing or producing arsenic.

Arsenious, är-sē'ni-us, *adj.* pertaining to or containing arsenic.

Arsenite, är'sen-īt, *n.* a salt of arsenious acid.

Arsis, är'sis, *n.* that part of a foot where the metrical accent is placed.

Arson, är'sn, *n.* the malicious firing of any building, agricultural produce, ship, &c., belonging to another, or one's own property, with the intent to defraud an insurance office.

Art, ärt, the 2nd pers. sing. indic. mood, pres. ten. of the verb to be. [Art is used only in solemn or poetic style.] See Be.

Art, ärt, *n.* the employment of means to the accomplishment of some end; the skilful adaptation and application to some purpose or use of knowledge or power acquired from Nature; a system of rules and established methods to facilitate the performance of certain actions; familiarity with such principles, and skill in applying them to an end or purpose, as of a practical, useful, or technical character: opposed to Science; one of the fine arts; the fine arts collectively; the power or quality of perceiving and transcribing the beautiful or æsthetical in Nature, as in painting or

sculpture; practical skill; dexterity; knack; cunning; artifice: *pl.* the branches of learning included in the ordinary course of academic study.

Artemisia, är-te-mis'ĭ-a, *n.* a large genus of plants, to which the common wormwood belongs, yielding a volatile oil (the chief ingredient of absinthe-liqueur); a festival held at Delphi in honour of Artemis (Diana).

Arterial, är-tēr'ĭ-ạl, *adj.* pertaining to an artery or the arteries; contained in an artery.

Arterial Blood, blud, *n.* the blood which passes through the arteries after oxygenisation in the lungs. It is of a lighter red colour than venous blood.

Arterial Navigation, nav-ĭ-gā'shun, *n.* navigation by connecting channels of inland water.

Arterialisation, **Arterialization**, är-tēr-ĭ-ạl-ĭ-zā'shun, *n.* the process of converting venous blood into arterial blood.

Arterialise, **Arterialize**, är-tēr'ĭ-ạl-īz, *v.t.* to convert as venous blood into arterial blood by exposure to oxygen in the lungs.

Arteriography, är-tē-rĭ-og'rà-fĭ, *n.* a systematic description of the arteries.

Arteriology, är-tē'rĭ-ol'ō-jĭ, *n.* that branch of anatomy which treats of the arteries.

Arteriotomy, är-tēr-ĭ-ot'o-mĭ, *n.* the opening of an artery; the part of anatomy treating of the dissection of the arteries.

Artery, är'tėr-ĭ, *n.*; *pl.* Arteries, -ĭz, one of a system of tubes or vessels which convey the blood from the heart to all parts of the body.

Artesian Well, är-tē'zĭ-ạn wel, *n.* a well formed by boring, often to great depth, through strata the nature and arrangement of which permit of the permeation and accumulation of water; on being freed from constraint, the water rises by pressure in the tube and overflows at the surface.

Artful, ärt'fụl, *adj.* cunning; crafty.

Artfully, -lĭ, *adv.* in a cunning or crafty manner.

Arthography, är-thog'rà-fĭ, *n.* the systematic description of the joints.

Arthritic, **Arthritical**, är-thrit'ik, —'ĭ-kạl, *adj.* pertaining to an inflammation of the joints, or the gout; gouty.

Arthritis, är-thrī'tis, *n.* any inflammation of the joints; the gout.

Arthropoda, är-throp'ō-dà, *n.pl.* one of the principal divisions of the sub-kingdom Annulosa, which includes invertebrate articulated animals having jointed legs, as the butterfly, spider, crab, centipede, &c.

Artichoke, är'tĭ-chōk, *n.* a plant with thistle-like foliage, and bearing large terminal flower-heads, the lower portion of which, consisting of a fleshy receptacle covered with thick scales, is used as food.

Article, är'tĭ-kl, *n.* a distinct portion or member; a single clause, item, or particular, as in a formal agreement or treaty; a concise statement; a prose composition, complete in itself, to a newspaper, magazine, or work of reference; a material thing, as one of a class; an item; a point of duty, faith, or doctrine; one of the words (*an* [a before consonant-sounds], the indefinite article, and *the*, the definite article [see A, An, & The]) used before nouns or substantives to define or limit their application; a jointed segment connecting two parts of a limb or body: *v.t.* to bind by articles of covenant or stipulation; specify.

Articular, är-tik'ū-lär, *adj.* pertaining to the joints or to a joint.

Articulata, är-tik'ū-lā'tà, *n. pl.* the third great division, in Cuvier's system, of the animal kingdom, which includes all invertebrate animals having an external skeleton composed of a series of rings, and comprises insects, crustaceans, worms, &c.

Articulate, är-tik'ū-lāt, *v.t.* to joint; unite by means of a joint; to form words; utter in distinct syllables; speak as a human being: *v.i.* to unite or form an articulation (with); utter articulate sounds; speak with distinctness: *adj.* jointed; formed with joints; segmented; characterised by syllabic division; uttered with distinctness.

Articulation, är-tik-ū-lā'shun, *n.* the act of jointing; the act of speaking distinctly; a distinct utterance; the state of being articulated; a joint or juncture between bones; the point of separation of organs or parts of a plant; a node or joint of the stem, or the space between two nodes.

Articulator, är-tik'ū-lā-tor, *n.* one who pronounces distinctly; an instrument to cure stammering; an apparatus attached to a telephone to secure regularity of tone; one who mounts skeletons.

Artifice, är'tĭ-fis, *n.* an artful or crafty device; an ingenious expedient; a trick or stratagem; a manœuvre.

Artificer, är-tif'ĭ-sėr, *n.* a skilled or artistic worker; a mechanic; a maker or constructor; an inventor.

Artificial, är-tĭ-fish'ạl, *adj.* made or contrived by art; produced by human skill or labour; feigned; unreal; assumed; affected; not genuine or natural.

Artificiality, **Artificialness**, -ĭ-ạl'ĭ-tĭ, -nes, *n.* the quality of being unreal or unnatural; that which is artificial.

Artificially, -li, *adv.* by human skill or contrivance.

Artillery, är-til'lėr-i, *n.* cannon; great guns; ordnance of all kinds, with its equipment of carriages, men, and material; the officers and men forming the artillery division of an army; the science which treats of the use or management of ordnance.

Artisan, / **Artizan,** ärʹti-zan, *n.* one skilled in any art or trade; a mechanic; a handicraftsman.

Artist, ärʹtist, *n.* one skilled in any branch of high art; one professing or practising one of the fine arts.

Artiste, är-tēst, *n.* one who is an expert in any branch of professional art other than the fine arts, as a public singer cook, &c.

Artistic, / **Artistical,** ärʹtis'tik, —'i-kal, *adj.* pertaining to artists; characterised by æsthetic feeling or conformity to the principles of a school of art or design.

Artistically, -al-li, *adv.* in a manner conformable to the rules and principles of art.

Artizan. Same as Artisan.

Artless, ärt'les, *adj.* lacking art; unskilful; devoid of cunning; simple; natural; undesigning; unaffected; ingenuous.

Artocarpus, är-tō-kärʹpus, *n.* a genus of tropical trees, to which the breadfruit-tree belongs.

Arum, āʹrum, *n.* a genus of plants, to which the common cuckoo-pint belongs.

Arundiferous, ar-un-difʹėr-us, *adj.* producing reeds or canes.

Arundinaceous, å-run-di-nāʹshus, *adj.* pertaining to, or resembling, a reed or cane.

Arundineous, ar-un-dinʹē-us, *adj.* resembling a reed; abounding with reeds.

Aruspex, / **Aruspice,** å-rusʹpeks, å-rusʹpis, *n.*; *pl.* Aruspices, -pi-sēz, one of a class of priests of Etruscan origin, who foretold events by inspecting the entrails of sacrificial victims. Also Haruspex.

Aryan, ā-ri- or arʹian, *adj.* pertaining to the Aryans, or to their language.

As, as, *n.*; *pl.* Asses, asʹsez, a Roman weight equivalent to the libra or pound: *conj.* & *adv.* in proportion to which; like; for instance; while; because; though.

Asafetida, / **Asafœtida,** as-å-fēt'i-då, *n.* a fetid sap obtained from the roots of several large umbelliferous plants of Persia and Afghanistan.

Asbestic, / **Asbestous,** as-besʹtik, —'tus, *adj.* pert. to, or containing, asbestos.

Asbestine, as-besʹtin, *adj.* pertaining to, or of the nature of, asbestos: incombustible.

Asbestos, / **Asbestus,** as-besʹtos, —'tus, *n.* a fibrous variety of hornblende, separable into flexible filaments of flax-like appearance and silky lustre, and possessing the property of being incombustible.

Ascend, å-sendʹ, *v.i.* to take an upward direction; mount; go up; rise; to proceed from an inferior to a superior; rise from a lower to a higher pitch or tone: *v.t.* to go or move upward upon; climb; go upward along.

Ascendable, / **Ascendible,** å-senʹda-bl, —'di-bl, *adj.* capable of being climbed or navigated.

Ascendancy, / **Ascendency,** å-senʹdan-si, —'den-si, *n.* a governing or controlling power or influence; domination.

Ascendant, / **Ascendent,** å-senʹdant, —'dent, *adj.* rising; superior; predominant; above the horizon: *n.* superiority or commanding influence; predominance; an ancestor, or one who precedes in genealogy or degrees of kindred: opposed to descendant: the particular zodiacal sign appearing above the horizon at the time of one's birth.

Ascension, å-senʹshun, *n.* the act of moving upward; a rising; the ascent of our Lord to heaven; the rising of a star or point above the celestial horizon.

Ascension Day, dā, *n.* a movable feast to commemorate Christ's ascension into heaven, celebrated on the Thursday next but one before Whit-Sunday: also called Holy Thursday.

Ascent, å-sentʹ, *n.* the act of rising; an upward movement; the act of climbing; the way or means of reaching a height; an acclivity; an upward slope.

Ascertain, as-ėr-tānʹ, *v.t.* to make certain; find out or determine definitely by test or examination.

Ascetic, as-setʹik, *adj.* exceedingly rigid in the exercise of religious duties and mortification of worldly desires: *n.* one who renounces the world and devotes himself to religious exercises; one who subjects himself to severe disciplinary methods of living; a hermit; a recluse.

Ascetically, al-li, *adv.* in an ascetical manner.

Asceticism, as-setʹi-sizm, *n.* the condition or mode of life adopted by one who renounces worldly matters; austerity.

Ascian, asʹsi-an, *n.* one who projects no shadow at noon; an inhabitant of the torrid zone, where twice in the year the sun is in the zenith at noon.

Ascidian, as-sidʹi-an, *adj.* pertaining to the Ascidia, a class of molluscs, with a

leathery tunic resembling a double-necked bottle: *n.* a member of the Ascidia; a sea-squirt.

Ascidiform, as-sid'i-fôrm, *adj.* bottle-shaped.

Ascidium, as-sid'i-um, *n.* a pitcher-shaped or flask-shaped organ peculiar to certain plants, as the pitcher-plants.

Asclepias, as-klē'pi-as, *n.* an extensive genus of plants, including the milkweed, &c.

Asclepias-butterfly, -but'ėr-flī, *n.* a large and handsome butterfly which feeds on plants belonging to the genus Asclepias.

Ascomycetes, as-kō-mī-sē'tēz, *n.pl.* a family of the fungi, including most of the lichens, which form free spores within elongated spore cases.

Ascomycetous, as-kō-mī-sē'tus, *adj.* of, or pertaining to, the Ascomycetes.

Ascribable, ȧ-skrī'bȧ-bl, *adj.* capable of being attributed or imputed.

Ascribe, ȧ-skrīb', *v.t.* to attribute, impute, or refer; assign; attribute.

Ascription ȧ-skrip'shun, *n.* the act of attributing or imputing; that which is assigned.

Ascus, as'kus, *n.*; *pl.* Asci, as'sī, the spore-case of lichens and fungi.

Aseptic, ȧ-sep'tik, *adj.* free from the germs of disease or putrefaction; not liable to putrefy: an aseptic substance.

Asexual, ȧ-seks'ū-al, *adj.* not sexual; produced by other than sexual processes.

Asexually, -li, *adv.* in a manner other than by conjunction of the sexes: applied to reproduction.

Ash, ash, *n.* the name popularly applied to trees of the genus Fraxinus, many of which supply valuable timber; the wood of the ash-tree: *adj.* pertaining to, or like, the ash; made of ash.

Ash, ash, *n.*; *pl.* Ashes, -ez, the residue of plant or animal substance remaining after subjection to red-heat: *pl.* the waste of burned coal; the remains of a human body when cremated, hence a corpse.

Ash-cake, ash'kāk, *n.* a cake made of corn and baked in the ashes (U.S.).

Ash-fire, ash'fīr, *n.* a slow fire banked up with cinders, used in chemical operations.

Ash-fly, ash'-flī, *n.* the oak-fly.

Ash-hole, ash'hōl, *n.* the cavity beneath a furnace; an ash-bin.

Ashamed, ȧ-shāmd', *p.adj.* affected or touched by shame; cast down or dejected by conscious guilt; abashed by a sense of indecorum; reluctant through fear of shame (followed by an infinitive).

Ashen, ash'n, *adj.* pertaining to the ash-tree; made of ash; of the colour of ashes; pale.

Ashlar, **Ashler,** ash'lȧr, —lėr, *n.* building-stone quarried; faced; thin slabs of building-stone squared for facing walls.

Ashlar-work, -wėrk, *n.* masonry of hewn, as distinguished from unhewn, stone.

Ashlering, ash'lėr-ing, *n.* uprights to which the laths are affixed in garrets; a wall faced with ashler.

Ashore, ȧ-shōr', *adv.* on shore; to the shore; on land.

Ash Wednesday, ash wens'dā, *n.* the first day of Lent; a special day set apart for fasting (the name is derived from the custom observed in the R. Cath. Ch. of sprinkling ashes on the heads of penitents on that day).

Asiatic Cholera, ā-shi-at'ik kol'ėr-ȧ *n.* a virulent form of cholera.

Aside, ȧ-sīd', *adv.* on or to one side; out of a given direction; apart; away from: *n.* a speech or utterance not intended for the present company; a remark made by an actor on the stage, and assumed to be heard only by the person for whom it is intended.

Asinine, as'i-nīn, *adj.* pertaining to the ass; having the nature or characteristics of an ass.

Asininity, as'i-nin'iti, *n.* the quality of being asinine; obstinate stupidity.

Ask, ȧsk, *v.t.* to request; seek to obtain by words; petition or beg for; claim or demand; expect or require; inquire respecting; interrogate; invite: *v.i.* to prefer by request; inquire after.

Askance, **Askant,** ȧ-skaṅs', ȧ-skant', *adv.* sideways; obliquely; awry; from the corner of the eye; aslant.

Askew, ȧ-skū', *adv.* obliquely; awry; out of position or arrangement.

Aslant, ȧ-slȧnt', *adv.* not at right angles; sloping; oblique; slanting; athwart.

Asleep, ȧ-slēp', *adv.* sleeping; in a state of slumber; dormant.

Aslope, ȧ-slōp', *adv.* in a sloping direction.

Asoak, ȧ-sōk, *adv.* in a state of saturation or soaked with moisture.

Asp, **Aspen,** asp, as'pen, *n.* a species of poplar, whose leaves have the property of trembling in the slightest breeze: *adj.* pertaining to the asp-tree; quivering like an aspen-leaf.

Asp, asp, *n.* a small venomous snake of Egypt; the common viper, or adder, of Europe; a royal symbol of ancient Egypt.

Asparagus, as-par'ȧ-gus, *n.* the genus of plants to which the vegetable A. belongs.

Aspect, as'peckt, *n.* visual or mental appearance; look; mien; air; outlook or prospect; the relative position of the planets as viewed from the earth; appearance.

Asper, as'pėr, *adj.* rugged; hard; warlike: *n.* the mark (') in Greek, to indicate the rough breathing, or aspirate.

Asperge, as-pėrj', *v.t.* to sprinkle.

Aspergillum, as-pėr-jil'um, *n.* the brush used for sprinkling holy-water.

Aspergillus, as-pėr-jil'us, *n.* a genus of microscopic fungi, to which several of the moulds belong.

Asperity, as-per'i-ti, *n.*; *pl.* Asperities, -tiz, roughness of surface; roughness or harshness of sound; sourness; bitterness of taste or temper.

Aspermous, ȧ-spėr'mus, *adj.* without seed; not producing seed.

Asperse, as-pėrs', *v.t.* to besprinkle; injure in reputation by calumny; slander.

Aspersion, as-pėr'shun, *n.* a sprinkling as of dust or water; injury by false and calumnious charges or reports; slander.

Aspersive, as-pėr'siv, **Aspersory,** —'sō-ri, *adj.* tending to asperse or defame; slanderous.

Aspersorium, as-pėr-sō'ri-um, *n.*; *pl.* Aspersoria, -ȧ, the vessel containing the holy-water for sprinkling; a brush or metallic instrument used for sprinkling the water.

Asphalt, as-falt', *n.* a compact, brittle variety of native bitumen, employed for the purposes of paving, roofing, and cementing: *v.t.* to lay down or cover with asphalt.

Asphaltic, as-fal'tik, **Asphaltite,** —'tit, *adj.* of the nature of, composed of, or containing asphalt.

Asphaltotype, as-fal'tō-tīp, *n.* a photographic negative on a plate finely coated with bitumen.

Asphaltum. Same as Asphalt.

Asphodel, as'fō-del, *n.* the name of several plants of the liliaceous genus Asphodelus; the daffodil of the older English poets; the unfading plant of the dead, which covered the meadows of Hades.

Asphyxia, as-fik'si-ȧ, **Asphyxy,** —'si, *n.* the condition of lifelessness occasioned by suspension or interruption of respiration.

Asphyxiate, as-fik'si-āt, *v.i.* to suffocate; deprive of oxygen, and so cause death or dangerous symptoms.

Aspic, as'pik, *n.* a venomous asp; the great lavender; a side-dish composed of game, fish, &c., encased in clear savoury meat-jelly.

Aspirant, as'pi-rant & ȧ-spīr'ant, *adj.* aspiring; ambitious: *n.* one who seeks to attain, or aspires to, a high object or position.

Aspirate, as'pi-rāt, *v.t.* to pronounce with a full breathing; to prefix the sound of the letter h: *n.* the sound of the letter h, as in horse; the mark or sign used to denote the sound: *adj.* pronounced with the audible breath.

Aspiration, as-pi-rā'shun, *n.* the act of aspirating; an aspirated sound; a breath; the yearning desire for something higher or better than that already possessed; ambition.

Aspiratory, as-pī'rȧ-to-ri, pertaining to breathing; suited to the inhaling of air.

Aspire, as-pīr', *v.i.* to seek after or desire with longing; yearn for that which is better or nobler; rise or ascend; to soar: *v.t.* to breathe to, or into; breathe forth; soar to; attain.

Aspirin, 'in, *n.* a drug for the relief of rheumatism.

Assurgent, as-sėr'jent, *adj.* ascending.

Assyrian, as-sir'i-an, *adj.* pertaining to Assyria or to its inhabitants.

Assyriological, as-sir-i-ō-loj'i-kal, *adj.* of, or pertaining to, Assyriology.

Assyriologist, as-sir-i-ol'ō-jist, *n.* a student of Assyriology.

Assyriology, as-sir-i-ol'ō-ji, *n.* the science or study of the language and antiquities of Assyria.

Astarboard, ȧ-stär'bōrd, *adv.* turning the helm over to the starboard side of the vessel.

Astatic, ȧ-stat'tik, *adj.* without polarity.

Astatically, -al-li, *adv.* in an astatic manner.

Astaticism, ȧ-stat'i-sizm, *n.* the state of being astatic.

Astay, ȧ-stā', *adv.* said of an anchor when on heaving it the cable makes an acute angle with the level of the water.

Aster, as'tėr, *n.* a genus of flowering-plants with rosette-shaped flowers, to which the Michaelmas-daisy belongs.

Asterial, as-tē'ri-al, *adj.* connected with, or related to, the stars.

Asterias, as-tē'ri-as, *n.* the typical genus of the star-fish family, which includes the star-fishes proper.

Asteriated, as-tē'ri-ā-ted, *adj.* radiated; having the form of a star.

Asterisk, as'tėr-isk, *n.* the mark (*) used in printing as a reference to a marginal passage or footnote appended to the text, or to indicate letters or words omitted (***): *v.t.* to mark with an asterisk.

Asterism, as'tėr-izm, *n.* a group or cluster of stars; three asterisks placed in the form of a triangle [⁂ or *⁂*] to direct attention to a particular passage; the star-like appearance in certain crystals.

Astern, ȧ-stėrn', *adj.* at or toward the hinder part of a ship; behind a ship.

Asternal, ȧ-stėr'nal, *adj.* not joined to the sternum or breastbone: said of ribs.

Asteroid, as'tėr-oid, *adj.* star-like; star-shaped: *n.* one of the small planets whose orbits lie between those of Mars and Jupiter; a minor planet.

Asteroidea, as-tėr-oi' dē-ȧ, *n.pl.* the order of echinoderms which includes the various families of star-fishes.

Asthenia, as-then'i-ȧ, *n.* debility.

Asthenic, as-then'ik, *adj.* pertaining to, or characterised by, asthenia; feeble.

Asthma, ast'mȧ & as'mȧ, *n.* a respiratory disease, chronically recurrent and attended by difficulty of breathing, with a wheezing cough and a sense of constriction in the chest.

Asthmatic, Asthmatical, { ast-mat'ik, —'i-kal, } *adj.* pertaining to asthma; affected by asthma: *n.* a person suffering from the disease.

Asthmatically, -ly, *adv.* in an asthmatical manner.

Astigmatic, as-tig-mat'ik, *adj.* pertaining to, affected with, or curing astigmatism.

Astigmatism, Astigmism, { as-tig'mȧ-tizm, —'mizm, } *n.* a defect in the structure of the eye causing variation of the focus of the crystalline lens.

Astir, ȧ-stėr', *adv.* or *adj.* on the move; active; stirring.

Astomatous, Astomous, { as-tom'ȧ-tus, as'to-mus, } *adj.* destitute of a mouth; without breathing pores.

Astonish, as-ton'ish, *v.t.* to strike with sudden wonder; surprise; amaze.

Astonishment, as-ston'ish-ment, *n.* the state of being astonished; amazement.

Astound, as-tound', *v.t.* to strike with amazement; shock; alarm; stun.

Astracan. See Astrakhan.

Astraddle, à-strad'l, *adv.* with one leg on each side of something; astride.

Astragal, as'trà-gal, *n.* a small moulding or bead of semicircular form: called also a roundel; the astragalus; the circular moulding near the mouth of a cannon.

Astragalus, as-trag'al-us, *n.*; *pl.* Astragali, -lī, the ball of the ankle-joint; the lower bone into which the tibia articulates; the name of a large genus of leguminous plants.

Astrakhan, Astracan, as-trà-kan', *n.* the skins of young lambs with curly wool, obtained from Astrakhan, in Russia; an imitation having a pile resembling this wool or fur.

Astral, as'tral, *adj.* pertaining to the stars; starry; star-shaped; pertaining to a supersensible substance presumed by occultists to pervade the regions of space and to enter into the composition of all bodies.

Astral Body, bod'i, *n.* a kind of ethereal body said by the occultists to be capable of projection to a distance, and to possess the power of occupying two places at the same instant; a ghost or double.

Astral Lamp, lamp, *n.* a lamp similar to an Argand lamp, giving an uninterrupted light

Astral Spirits, spir'itz, *n.pl.* spirits formerly supposed to inhabit the stars, and represented as fallen angels or spirits of fire.

Astray, à-strā', *adv.* out of the right way; wandering.

Astriction, as-trik'shun, *n.* act of binding; a contraction of parts by applications; compression by ligatures; constipation.

Astrictive, as-trik'tiv, *adj.* of a binding quality; astringent; styptic.

Astride, à-strīd', *adv.* with the legs wide apart; astraddle.

Astringency, as-trin'jen-si, *n.* the quality of being astringent; harshness; severity.

Astringent, as-trin'jent, *adj.* binding; contracting, opposed to laxative: *n.* a substance or medicine that produces contraction of the tissues and checks discharges.

Astrography, as-trog'rà-fi, *n.* a description of the stars, or the art of describing and mapping out the heavens.

Astrolabe, as'trō-lāb, *n.* an instrument formerly employed for taking the altitude of the sun or stars; a stereographic projection of the sphere on the plane of the equator or a meridian.

Astrolithology, as-trō-lith-ol'o-ji, the study of meteoric stones.

Astrologer, as-trol'ō-jėr, *n.* one who professes to forecast events by means of the stars.

Astrological, as-trō-loj'i-kal *adj.* pertaining to astrology, or the practice of astrology.

Astrologically, -li, *adv.* in an astrological manner; according to astrology.

Astrologise, Astrologize, as-trol'ō-jīz, *v.i.* to practise astrology; determine future events by means of astrology.

Astrology, as-trol'ō-ji, *n.* predestination by the stars; the art anciently pursued of foretelling or forecasting the future of mankind, by reference to the influence supposed to be exerted by the stars in their various aspects and relative positions upon the course of human destiny.

Astrometeorology, as-trō-mē-ţē-ór-ol'ō-ji, *n.* the art, or pretended art, of forecasting weather from the aspect of the heavenly bodies.

Astrometer, as-trom'e-tėr, *n.* an instrument for ascertaining and comparing the relative magnitude and lustre of the stars.

Astrometry, as-trom'e-tri, *n.* the art by which the apparent relative magnitude of the stars is determined.

Astronomer, as-tron'ō-mėr, *n.* one who studies, or is versed in, astronomy.

Astronomer Royal, roi'al, *n.* the official title of the astronomer in charge of a royal observatory in Gt. Britain and Ireland.

Astronomic, Astronomical, as-trō-nom'ik, —'i-kal, *adj.* pertaining to astronomy, or according to astronomical laws.

Astronomical Clock, klok, *n.* a clock which keeps sidereal time.

Astronomical Signs, sīnz, *n.pl.* the signs of the zodiac.

Astronomical Year, yēr, *n.* a year the length of which is determined by astronomical observations.

Astronomically, -li, *adv.* in an astronomical manner.

Astronomise, Astronomize, as-tron'ō-mīz, *v.i.* to study astronomy; apply the principles of astronomy.

Astronomy, as-tron'ō-mi, *n.* the study of the heavenly bodies; the science which treats of their magnitude, motions, relative positions, and all connective phenomena.

Astrophotography, as-trō-fō-tog'rà-fi, *n.* photography applied to the delineation of the heavenly bodies.

Astrophotometer, as-trō-fō-tom'e-tėr, *n.* an instrument for measuring the intensity of the light of stars.

Astrophysical, as-trō-fiz'i-kal, *adj.* pertaining to the physical structure of the stars.

Astute, as-tūt', *adj.* shrewd; keenly penetrating; sagacious; cunning; crafty.

Astylar, á-stī'lar, *adj.* not having columns or pilasters.

Asunder, á-sun'dėr, *adv.* apart; separately; into parts.

Aswail, as'wāl, *n.* the sloth-bear of India.

Asylum, á-sī'lum, *n.*; *pl.* Asylums, -lumz, a sanctuary or place of refuge wherein formerly criminals and debtors might find immunity from arrest; an institution for the care or relief of the aged, destitute, or afflicted.

Asymmetrical, as-i-met'ri-kal, *adj.* not symmetrical; disproportionate.

Asymmetrically, -li, *adv.* not symmetrical.

Asymmetry, á-sim'e-tri, *n.* lack of symmetry or proportion between the parts of a thing.

Asyndeton, á-sin'dē-ton, *n.* a figure of speech which omits connectives, as "I came, I saw, I conquered."

Ataghan, a variant of Yataghan.

Ataman. See Hetman.

Ataunt, **Ataunto,** á-tânt', —tân'tō, *adv.* fully rigged and with all sails set.

Atavism, at'á-vizm, *n.* the reversion, or tendency to revert, to the ancestral type of a species; resemblance to a remote ancestor, exhibited by a certain organism; the recurrence of any peculiarity or disease from which an ancestor in remote generations has suffered.

Atavistic, at-á-vis'tik, *adj.* of, or pertaining to, atavism.

Ataxia, **Ataxy,** á-tak'si-á, —si, *n.* irregularities in the functions of the body or in the course of a disease.

Ataxiagraph, á-tak'i-á-graf, *n.* an instrument for recording by curves and lines the irregularities caused by ataxia.

Ataxic, á-tak'sik, *adj.* pertaining to, or characterised by, ataxy.

Ataxic Fever, -fē'vėr, *n.* typhus fever of a malignant type.

Ate, et & āt. the preterit of Eat.

Atelier, á'tē-lyá, *n.* a workshop; the studio of a painter or sculptor.

A tempo, **A tempo primo,** ä tem'pō, —prēmo, a direction to a musician to restore the original time after acceleration or retardation.

A tempo giusto, ä tem'pō jūs'tō, a direction to a performer to sing or play in strict time.

Athalamous, á-thal'á-mus, *adj.* without apothecia (spore-vessels); said of lichens.

Athanasia, ath-á-nā'si-á, *n.* immortality.

Athanasian, ath-á-nā'si-an, *adj.* pertaining to Athanasius, bishop of Alexandria (c. 296-373): *n.* a follower of Athanasius; an adherent of the A. Creed.

Atlantes, at-lan'tēz, *n. pl.* figures or half-figures of men, used in place of columns or pilasters to support an entablature.

Atlas, at'las, *n.* a collection of maps in a volume (*pl.* Atlases); a work in tabulated form; a large size of drawing-paper.

Atlas-powder, at'las-pou'der, *n.* a powerful nitro-glycerine blasting compound.

Atmology, at-mol'ō-ji, *n.* the science of aqueous vapour, its laws and phenomena.

Atmometer, at'mom'e-tėr, *n.* an instrument for measuring the rate and amount of evaporation from a moist surface.

Atmosphere, at'mos-fēr, *n.* the aëriform fluid surrounding the earth, composed of a mechanical mixture of 79 parts by volume of nitrogen with 21 parts of oxygen, and a trace of carbonic acid and argon, with a varying proportion of aqueous vapour, ammonia, ozone, and organic matter; the gaseous envelope surrounding any of the heavenly bodies; the influence, mental and moral, exerted on a person by his environments.

Atmospheric, Atmospherical, at-mos-fēr'ik, -i-kal, *adj.* pertaining to, resembling, or consisting of, existing in, or dependent upon, the atmosphere.

Atmospheric Pressure, -presh'ėr, *n.* the pressure exerted in every direction upon a body by the atmosphere; equivalent to 14⅔ lb. on the sq. in., or 1,033 grams on the sq. centimetre.

Atoll, ȧ-tol & at'ol, *n.* a coral island having the form of an outer ring of coral surrounding a basin or lagoon.

Atom, at'um, *n.* supposed ultimate particle of matter; something very minute.

Atomic, Atomical, ȧ-tom'ik, -i-kal, *adj.* pertaining to, or consisting of, atoms; extremely minute.

Atomic Theory, ȧ-tom'ik thē'o-ri, *n.* that elemental bodies consist of ultimate atoms of definite weight, and that atoms of different elements unite chemically with each other in fixed proportions.

Atomic Weight, ȧ-tom'ik wāt, *n.* the weight of the atom of any element as compared with another taken as a standard, usually hydrogen, taken as 1.

Atomically, -li, *adv.* in an atomic manner.

Atomicity, at-ō-mis'i-ti, *n.* equivalence; the combining capacity of an element.

Atomise, Atomize, at'um-īz, *v.t.* to reduce to atoms or exceedingly fine particles.

Atomiser, Atomizer, at'um-ī-zėr, *n.* an instrument constructed to reduce a liquid to spray.

Atomism, at'um-izm, *n.* the doctrine of atoms.

Atomist, at'um-ist, *n.* one who maintains the atomic theory or philosophy of Democritus, the Greek philosopher, who believed that the world was composed and first came into existence from the downfall and swerve of innumerable atoms.

Atomy, at'um-i, *n.*; *pl.* Atomies, -iz, a skeleton, or anatomical preparation; an emaciated person; an atom; a pigmy.

Atonable, ȧ-tōn'ȧ-bl, *adj.* capable of being atoned for.

Atone, ȧ-tōn', *v.i., pret. & p.p.* Atoned, *p.pr.* Atoning to make reparation or amends, as for injury done or implied; expiate; make satisfaction for; reconcile.

Atonement, ȧ-tōn'ment, *n.* reparation or satisfaction offered or made in return for injury; expiation of wrong or sin by suffering; the recompense for sin typified by the sufferings and death of Christ; reconciliation.

Atonic, ȧ-ton'ik, *adj.* wanting tone, or vital energy; unaccented: *n.* an unaccented word or syllable; a medicine to allay excitement.

Atony, at'ō-ni, *n.* want of tone; debility; weakness of any organ.

Atrabilious, at-rȧ-bil'i-us, *adj.* melancholy; hypochondriacal.

Atramentous, at-rȧ-men'tus, *adj.* like ink; deep black

Atrip, ȧ-trip', *adv.* just clear of the ground.

Atrium, ā'tri-um *n.*; *pl.* Atria, -ȧ, the square entrance-hall, lighted from above, constituting the chief apartment in an ancient Roman house; a hall or entrance-court; a portico; the auricular portion of the heart; a cavity.

Atrocious, ȧ-trō'shus, *adj.* wicked in the highest degree; extremely criminal or cruel; outrageous; exhibiting or characterised by great atrocity; flagrant.

Atrocity, ȧ-tros'i-ti, *n.*; *pl.* Atrocities, -tiz, enormous wickedness; abominable cruelty; an atrocious deed.

Atrophy, at'rō-fi, *n.* a wasting, or diminution in bulk, of the body, or any part of the body arising from lack of nourishment; the degeneration of an organ or part; *v.i., pret. & p.p.* Atrophied, *p.pr.* Atrophying, to waste away; to dwindle.

Atropia, Atropin, Atropine, ȧ-trō'pi-ȧ, -'pin, -'pīn, *n.* a crystalline alkaloid of very poisonous nature extracted from the deadly nightshade (belladonna), having the singular property of producing dilatation of the pupil of the eye.

Atropism at'rō-pizm, *n.* poisoning by atrophine, or belladonna.

Atrous, ā'trus, *adj.* pure black.

Attacca, åt-tåk'kå, a direction to a musician at the end of a movement to follow on with the next without pause.

Attach, at-tach', *v.t.* to fasten, or fix, to or on; bind; connect with or appoint to; connect by ties of affection; to take, or seize, by legal authority: *v.i.* to adhere.

Attaché, åt-tå'shā', *n.* one who is attached to another, or as part of a suite or staff, as of an embassy or legation.

Attachment, at-tach'ment, *n.* the act of attaching; adherence; fidelity; affection or regard; that which attaches, or the thing which is attached; a taking into custody or seizure of the person, goods, or estate by virtue of a legal process.

Attack, at-tak', *v.t.* to assault; fall upon with force; assail with intent to overcome or to damage, discredit, or bring into ridicule; begin to affect or act upon, as disease: *v.i.* to make an onset or attack; *n.* the act of attacking in any sense of the word.

Attaghan. See Yataghan.

Attain, at-tān', *v.t.* to achieve; gain; compass; accomplish: *v.i.* to reach; come, or arrive at.

Attainability, at-tā-nå-bil'i-ti, *n.* attainableness.

Attainable, at-tā'nå-bl, *adj.* capable of being attained.

Attainableness, -nes, *n.* the quality of being attainable.

Attainder, at-tān'dėr, *n.* the act of attainting, or the state of being attainted; an act, formerly in operation, for the deprivation of all civil rights and of power to inherit or transmit property: applied to persons under sentence of death or outlawry for treason or felony.

Bing, bing. *n.* a heap or pile of anything.

Binnacle, bin'ă-kl, *n.* a turret-shaped box containing a ship's compass.

Binocle, bin'ō-kl or bī'no-kl, *n.* a field or opera glass with two eye-tubes for the use of both eyes at once.

Binocular, bī-nok- or bin-ok'ū-lėr, *adj.* having two eyes; pertaining to, or suited to, the use of both eyes. Also Binoculate.

Binomial, bī-nō'mi-ăl, *n.* an expression or quantity consisting of two terms connected by the sign plus (+) or minus (−): *adj.* consisting of two terms; pertaining to binomials; having two names.

Binomial Theorem, thē'ō-rem, *n.* the celebrated theorem of Sir Isaac Newton, which expresses the law of formation of any power of a binomial.

Binoxide, *n.* Same as Dioxide.

Binuclear, ∫ bī-nū'klē-ėr, ⎫ *adj.* having two
Binucleate, ⎩ —āt, ∫ nuclei.

Bioblast. Another name for Bioplast.

Biocellate, bī-ō-sel'āt, *adj.* marked with two eye-like spots, as a wing.

Biodynamics, bī-ō-dī-nam'iks, *n.* the doctrine of vital force or energy.

Biogenesis, ∫ bī-ō-jen'e-sis, ⎫ *n.* the doctrine
Biogeny, ⎩ —oj'ē-ni, ∫ that living organisms can proceed only from, or be generated by, living parents or germs; the science of life development.

Biogenetic, bī-ō-jē-net'ik, *adj.* pertaining to biogenesis.

Biogenesist, **Biogenist,** bī-ō-jēn'e-sist, *n.* one who believes in the theory of biogenesis.

Biographer, bī-og'rà-fėr, *n.* one who writes the history of a particular person's life.

Biographically, bī-o-graf'i-kal-li, *adv.* in the manner of a life history.

Biography, bī-og'rà-fi, *n.* ; *pl.* Biographies, -iz, the history of the life of a particular person ; biographical writings in general.

Biologic, Biological, bī-ō-loj'ik, *adj.* pertaining to the science of life.

Biologically, -li, *adv.* in accordance with the principles of biology.

Biologist, bī-ol'o-jist, *n.* one who studies, or is skilled in, the science of living forms.

Biology, bī-ol'ō-ji, *n.* the science which deals with the origin and life-history of plants and animals.

Biomagnetism, bī-ō-mag'net-izm, *n.* animal magnetism.

Bioplasm, bī-ō-plaz'm, *n.* living germinal matter or protoplasm.

Bioplast, bī'ō-plast, *n.* a minute mass of protoplasm possessing formative powers.

Biotaxy, bī'ō-tak-si, *n.* the classification of living organisms according to their structural characters.

Biparous, bip'à-rus, *adj.* bringing forth two at a birth.

Bipartible, Bipartile, bī-pär'ti-bl, *adj.* divisible into two parts.

Bipartite. bī-pär'tīt, *adj.* divided into two similar parts.

Bipartition, bī-pär-tish'un, *n.* the act of dividing into two parts ; the state of being so divided.

Bipectinate, bī-pek'ti-nāt, *adj.* having two comb-like margins.

Biped, bī'ped, *adj.* having two feet : *n.* a two-footed animal.

Bipedal, bī'ped-al, *adj.* pertaining to a biped ; two-footed.

Bipennate, Bipennated, bī-pen'nāt, *adj.* having two wings.

Bipinnate, Bipinnated, bī-pin'nāt, *adj.* doubly pinnate.

Biplane, bī'plān, *n.* an aeroplane having two main planes or gliding boards, usually of equal size, one above the other.

Biquadrate, Biquadratic, bī-kwōd-rāt, *adj.* pertaining to the fourth power : *n.* the fourth power, arising from the multiplication of a square number or quantity by itself.

Birch, bėrch, *n.* ; *pl.* Birches, -ez, a tree or shrub belonging to the genus Betula ; a rod formed of birch twigs used for punishment ; a birch-bark canoe : *adj.* birchen : *v.t.* to chastise with a birch rod ; flog.

Birchen, bėr'chen, *adj.* pertaining to, or consisting of, birch.

Bird, bėrd, *n.* a warm-blooded feathered vertebrate, furnished with wings, and belonging to the class Aves ; small feathered game, as distinguished from water-fowl : *v.i.* to shoot or catch birds.

Birdlime, bėrd'līm, *n.* a viscous substance prepared from holly-bark, and used for entangling small birds in bird-snaring : *v.t.* to smear with birdlime.

Bird's-eye, bėrdz'ī, *n.* a variety of cut tobacco ; the popular name of several plants whose flowers resemble a bird's eye.

Bireme, bī'rēm, *n.* an ancient galley having two tiers of oars.

Biretta, bē-ret'tà, *n.* a square ecclesiastical cap. Also Birretta, Beretta, Berretta.

Birkie, bėr'ki, *adj.* spirited : *n.* a lively or self-assertive person (Scot.).

Birn, bėrn, *n.* that part of a clarionet or a similar instrument into which the mouthpiece fits.

Birostrate, bī-ros'trāt, *adj.* having a double beak, or beak-like process.

Birr, bėr, *v.i.* to make a whirring sound, like that of a spinning wheel : *n.* a whirring noise.

Birretta. See Biretta.

Birth, bėrth, *n.* the act of coming into life ; the fact of being born ; the act of bringing forth ; lineage ; extraction ; descent ; origin ; beginning.

Birth-rate, 'rāt, *n.* the increase of population as shown by the percentage of registered births to the number of inhabitants in a district within a specified period.

=100–140 fathoms: *v.t.* to fasten with a cable; transmit by telegraph cable.

Cablegram, kā'bl-gram, *n.* a message sent by a submarine cable.

Cabochon, kab'ōō-shon, *n.* a precious stone polished but not faceted.

Caboose, kā-bōōs', *n.* a ship's galley or kitchen; the guard's van of a goods train.

Cabriolet, kab-ri-ō-lā', *n.* a covered carriage with two or four wheels drawn by one horse.

Cacaine, ka-kā'in, *n.* the essential principle of cacao.

Cacao, ka-kā'ō, *n.* a small evergreen tree of tropical America and the W. Indies, from the seeds of which cocoa and chocolate are prepared.

Cachelot, kash'a-lot & lō', *n.* the sperm whale, which yields spermaceti.

Cache, kash, *n.* a place of concealment for food for future use: *v.t.* to hide (provisions) in the ground.

Cachet, ka'shā, *n.* a seal.

Cachinnation, kak-in-ā'shun, *n.* loud or unrestrained laughter.

Cachinnatory, kak-in-ā-to'ri, *adj.* characterised by loud laughter.

Cacholong, kash'ō-long, *n.* a milk or greyish-white variety of opal; pearl opal.

Cachou, kā-shōō', *n.* a pill for sweetening the breath.

Cachuca, ka-chōō'ka, *n.* a Spanish dance; a small American boat.

Cacique, ka-sēk', *n.* the name or title of the aboriginal chiefs of the W. Indies, and of some parts of S. America.

Cackle, kak'l, *v.t.* to cry like a hen or goose; laugh like a hen which has laid an egg; giggle; prattle: *n.* the cry of a hen or goose; silly talk.

Cacoethes, kak-ō-ē'thēz, *n.* a bad habit or propensity.

Cacography, kak-og'ra-fi, *n.* bad spelling or writing.

Cacolet, kak'ō-lā, *n.* a mule-chair for carrying the sick or travellers in a hilly district.

Cacology, ka-kol'o-ji, *n.* incorrect pronunciation or choice of words.

Cacophonous, ka-kof'o-nus, *adj.* discordant.

Cactus, kak'tus, *n.*; *pl.* Cacti -tī & Cactuses, -ez, a spiny fleshy plant with showy flowers.

Cad, kad, *n.* a vulgar, ill-bred fellow; an omnibus conductor.

Cadastral, ka-das'tral, *adj.* pertaining to landed property, its extent, value, ownership, &c.

Cadastre, ka-das'tėr, *n.* an official survey of the real estate of a district or county as a basis for taxation.

Cadaverous, ka-dav'ėr-us, *adj.* resembling a human body; pale; ghastly.

Caddie, kad'i, *n.* a lad who carries golf clubs.

Caddis, kad'is, *n.* the larva of the caddis-fly.

Caddy, kad'i, *n.*; *pl.* Caddies, -iz, a small box for keeping tea.

Cade, kād, *n.* a barrel or cask of 500 herrings, or 1,000 sprats.

Cadence, kā'dens, *n.* the full modulation of the voice in reading or speaking; rhythm; a musical run or trill.

Cadenza, ka-den'za, *n.* a vocal or instrumental flourish.

Cadet, ka'det, *n.* a younger son; a student in a naval or military academy.

Cadge, kaj *v.t.* to obtain by begging: *v.i.* to peddle or hawk.

Cadi, kā'dī', *n.* a Mohammedan judge.

Cadmean, kad-mēn', *adj.* of or belonging to Cadmus; Theban.

Cadmium, kad'mi-um, *n.* a bluish-white ductile metal, resembling tin.

Cadre, kad'r, *n.* the staff of a regiment.

Caducean, ka-du'sē-an, *adj.* pertaining to the caduceus, the winged staff of Mercury, entwined with serpents.

Caducous, ka-du'kus, *adj.* falling off quickly or before maturity.

Cæcal, sē'kal, *adj.* pertaining to the cæcum; having a blind end.

Cæcum, sē'kum, *n.*; *pl.* Cæca, -ka, the blind gut; a pouch-like appendage of the large intestine, having one end closed.

Caen-stone, kā'en-stōn, *n.* a soft oölitic stone from Caen.

Cæsarian, sē-zar-e'an, *adj.* pertaining to Cæsar.

Cæsarian Operation, oper-a'shun, *n.* a delivery of a fœtus by cutting through the walls of the abdomen.

Cæsarism, sē'zar-izm, *n.* imperialism; absolute rule or government.

Cæsium, sēs'i-um, *n.* a rare metal associated with rubidium.

Café, kaf'ā, *n.* a restaurant.

Café Chantant, shäng'täng, *n.* a place of entertainment where refreshments, music, &c., are provided.

Caffeine, kaf'ē-in, *n.* a bitter alkaloid extracted from coffee; theine.

Cage, kāj, *n.* a box or inclosure furnished with metal bars for confining birds, or other animals; a contrivance for raising and lowering men in a mine shaft: *v.t.* to confine in a cage; shut up.

Cagmag, kag'mag, *n.* decomposed meat or scraps: *adj.* decaying; unfit for food.

Cahier, ka'ye-ā, *n.* sheets of paper put loosely together; a report of a committee.

Cainozoic, kā-nō-zō'ik, *adj.* Tertiary and Quarternary. Also Kainozoic.

Caique, kà-ēk', *n.* a skiff or light rowing boat used on the Bosphorus.

Ça Ira, sä ē-rà (Fr. "It will go"), a famous song of the French Revolution of 1789.

Cairn, kārn, *n.* a conical heap of stones erected as a monument; a kind of terrier.

Cairngorm, kārn'gorm, *n.* a yellow or brown variety of quartz or rock-crystal.

Caisson, kā'song, *n.* an ammunition-waggon or chest; a box filled with explosives for firing a mine; a water-tight box or casing used for building structures in water; a sunken panel in a ceiling; a structure for raising and floating sunken vessels.

Caitiff, kā'tif, *n.* a despicable or cowardly wretch: *adj.* despicable; vile; cowardly.

Cajeput, kaj'i-put, *n.* a tree of the Moluccas yielding a volatile oil.

Cajole, kà-jōl', *v.t.* to coax or deceive by flattery; wheedle; cheat.

Cake, kāk, *n.* a small mass of dough, sweetened and baked; a compressed or solidified mass of any substance, especially if thin or flat; a simpleton: *v.t.* to form into a cake: *v.i.* to consolidate into a hard mass.

Calabar Bean, kal-à-bär'bēn, *n.* the plant *Physostigma venenosum* and its seed. Called also Ordeal Bean, from its use by the natives as a test for witchcraft.

Calabash, kal'à-bash, *n.* the fruit of the calabash tree of tropical America, used when dried as a vessel for liquids, &c.

Calamanco, kal-à-mang'kō, *n.* a glossy woollen stuff brocaded or checkered.

Calamandar-wood, kal-à-man'dėr-wood, *n.* a fine variety of ebony of very hard texture.

Calamary, kal'à-mà-ri, *n.pl.* Calamaries, -riz, a cuttle-fish.

Calambac, kal'am-bak, *n.* agallochum.

Calamine, kal'à-mīn, *n.* native hydrous silicate of zinc.

Calamint, kal'à-mint, *n.* a fossil plant of the Carboniferous Age.

Calamitous, kà-lam'it-us, *adj.* producing, or resulting from, calamity.

Calamity, kà-lam'i-ti, *n.pl.* Calamities, -tiz, any cause that produces evil, disaster, or extreme misfortune; distress; affliction.

Calamus, kal'à-mus, *n.pl.* Calami, -mī, a genus of palms producing the rattan canes; the sweet flag.

Calendo, kà-lan'dō, *prep.phr.* gradually; slower and softer: a musical direction.

Calash, kà-lash', *n.* a light carriage with low wheels and a folding removable top; a hood formerly worn by women.

Calc-spar, kalk-spär, *n.* a crystalline carbonate of lime or calcite.

Calcar, kal'kär, *n.* a tube or spur at the base of a petal or sepal; a furnace used in glass-making.

Calcarate, kal'kär-āt, *adj.* furnished with a spur.

Calcareous, kal-kār'ē-us, *adj.* of the nature of, or containing, lime.

Calceolaria, kal-sē-ō-lā'ri-à, *n.* a genus of ornamental plants of S. America.

Calciferous, kal-sif'ėr-us, *adj.* containing carbonate of lime.

Calciform, kal'si-form, *adj.* in the form of lime or chalk.

Calcify, kal'si-fī, *v.t.*, *pret.* & *p.p.* calcified, *p.pr.* calcifying, to convert into lime: *v.i.* to become strong by conversion into lime.

Calcimine, kal'si-mīn, *n.* white or tinted wash for walls or ceilings.

Calcination, kal-si-nā'shun, *n.* the act or process of reducing to powder by heat.

Calcine, kal-sīn', *v.t.* to reduce a substance to powder by heat; oxidise: *v.i.* to undergo calcination.

Calcite, kal'sīt, *n.* crystallised carbonate of lime.

Calcium, kal'si-um, *n.* the metallic base of lime.

Calcium Carbide, see Carbide.

Calcography, kal-kog'ra-fi, *n.* the art of drawing with coloured chalks or pastels.

Calculary, kal'ku-lėr-i, *adj.* pertaining to, or of the nature of, culculi.

Calculate, kal'ku-lāt, *v.t.* to compute; ascertain or determine by any process of reasoning; estimate: *v.i.* to make a computation; suppose or think [U.S.].

Calculation, kal-ku-lā'shun, *n.* the art of reckoning by numbers; computation; something deduced by reasoning or inference; estimate; opinion: *adj.* Calculative.

Calculator, kal'ku-lā-tor, *n.* one who, or a machine that, computes or reckons.

Calculous, kal'ku-lus, *adj.* stony; gritty.

Calculus, kal'ku-lus, *n.pl.* Calculi, -lī, a stony concretion in the body; one of the higher branches of mathematics; the differential calculus.

Caldera, kal'dār-à, *n.* a deep caldron-like cavity on the summits of extinct volcanoes.

Caldron. See Cauldron.

Calcannon, kal-kan'un, *n.* a favourite Irish dish of boiled greens and potatoes mashed

together and seasoned with salt, pepper, &c. Also Colecannon.

Caledonian, kal-i-dō'ni-an, *adj.* pertaining to Caledonia, the ancient name of Scotland; Scottish: *n.pl.* a set of quadrilles.

Calefacient, kal-i-fā'shi-ent, *adj.* exciting heat: *n.* a substance exciting heat.

Calendar, kal'en-dėr, *n.* a register of the days, weeks, and months of the year, &c.; a register or list; a list of criminal causes arranged for trial: *v.t.* to register or place on a list.

Calendar Month, munth, *n.* a solar month reckoned according to the calender, as distinguished from the lunar month.

Calender, kal'en-dėr, *n.* a machine consisting of heated rollers, used for smoothing and glazing paper or cloth: *v.t.* to press in a calender.

Calender, kal'en-dėr, *n.* a mendicant dervish.

Calends, kal'endz, *n.pl.* in the Roman calendar, the first day of each month. Also Kalends.

Calendula, kà-len'du-lā, *n.* a genus of plants, including the marigold, from which a medical tincture is obtained.

Calendulin, kà-len'du-lin, *n.* a gummy substance obtained from the marigold.

Calenture, kā'len-tūr, a violent fever affecting sailors in hot latitudes.

Calescence, kà-les'ens, *n.* increasing heat.

Calf, kăf, *n.*; *pl.* Calves, kăvz, a young bovine quadruped, especially of the cow; the young of certain marine mammalia, as the whale; leather made from the skin of a calf; a small island, or iceberg near a larger one; a stupid or silly person; the thick fleshy part of the leg behind.

Calibre, kal'i-bėr, *n.* the diameter of a cylindrical body; mental capacity.

Calibrate, kal'i-brāt, *v.t.* to determine the calibre of; graduate.

Calibration, kal-i-brā'shun, *n.* the act of calibrating.

Calicle, kal'i-kl, *n.* a small cup-shaped cell.

Calico, kal'i-kō, *n.*; *pl.* Calicoes & os, -kōz, white or unprinted cotton cloth.

Calid, kal'id, *adj.* hot; tepid.

Californian, kal'i-fôr'ni-an, *adj.* of, or belonging to, California.

Caligo, kà-lī'go, *n.* dimness of vision.

Caligraphy, **Calligraphy,** kà-lig'ra-fi, *n.* elegant or beautiful writing.

Calin, kal'in, *n.* an alloy of tin and lead used by the Chinese for making tea-canisters.

Calipash, kal'i-pash, *n.* the part of a turtle belonging to the upper shell, inclosing a dull greenish gelatinous substance.

Calipee, kal'i-pē, *n.* the part of a turtle belonging to the lower shell, inclosing a light yellow gelatinous substance.

Caliph, kal'or kā'lif, *n.* a title of the successors of Mohammed. Also Calif.

Calipers, kal'i-pėrz, *n.pl.* compasses for measuring the diameters of cylindrical bodies.

Caliphate, kal'i-fāt, *n.* the office, dignity or government of a caliph.

Calisthenic, **Callisthenic,** kal-is-then'ik, *adj.* pertaining to calisthenics.

Calisthenics, **Callisthenics,** kal-is-then'iks, *n.pl.* the art of promoting health by physical exercise; simple gymnastics.

Calk, **Caulk,** kâk, *v.t.* to drive oakum into the seams of a ship.

Calk, kâk, *v.t.* to copy (a drawing) by covering the back with chalk or lead, and trace over the lines with a style for transfer.

Calk, kâk, *n.* that part of a horseshoe which projects downward to prevent slipping; a semi-circular piece of iron nailed to the heel of a boot: *v.t.* to furnish with a calk.

Call, kâl, *v.t.* to summon from, or invite to, any place; convoke judicially or officially; designate for an office; name; characterise as; exhort; utter in a loud voice; rouse from sleep: *n.* a summons or invitation; a request or command; a short visit; the cry or note uttered by certain animals; a demand for payment due on shares; the option of claiming stock at a certain time at a stipulated price.

Caller, kal'ėr, *adj.* cool; fresh; in season; recently caught: said of fish.

Calligrapher, **Calligraphist,** kal-lig'raf-ėr, *n.* one skilled in handwriting. Also Caligrapher.

Calling, kâl'ing, *n.* the act of summoning; a summons or invitation; a vocation, trade or profession; the state of being divinely called (2 Pet. i. 10).

Calling-crab, -krab, *n.* a name of certain land-crabs that hold up one of the claws when disturbed, as if beckoning with it.

Callisthenics. See Calisthenics.

Callosity, kal-os'i-ti, *n.*; *pl.* Callosities, -tiz, the state or quality of being hardened; a callus.

Callous, kal'us, *adj.* hardened; insensible.

Callow, kal'ō, *adj.* unfledged.

Callus, kal'us, *n.*; *pl.* Calli -ī, the hardening of the skin from pressure; bony matter which unites the ends of fractured bones.

Calm, käm, *adj.* tranquil; still; undisturbed: *n.* stillness; serenity: *v.t.* to quiet; still; pacify: *v.i.* to become calm (with *down*).

Calomel, kal'ō-mel, *n.* mercurous chloride: used as a purgative medicine.

Caloric, kȧ-lor'ik, *n.* pertaining to heat.

Caloricity, kal-ō-ris'i-ti, *n.* the power in animals of developing and maintaining heat.

Calorie, kal'ō-rē, *n.* the unit of heat (metric system) to express the amount of heat required to raise one kilogramme of water from 0° to 1° Cent. Also Calory.

Calorifacient, kȧ-lor'i-fā-shi-ent, *adj.* heat-producing: said of food-stuffs.

Calorific, kal-o-rif'ik, *adj.* heating.

Calorification, kȧ-lor'i-fi-kā'shun, *n.* the production of heat.

Calorific Rays, rāz, *n.pl.* the invisible heating rays emanating from the sun and heated bodies.

Calorimeter, kal-o-rim'i-tėr, *n.* an apparatus for measuring heat produced or given off by a body.

Calorimetry, kal-o-rim'i-tri, *n.* the art or process of determining the amount of heat contained in, or given off by, bodies.

Calorimoter, kal-o-ri-mō'-tėr, *n.* a galvanic apparatus for producing heat in a short external circuit.

Calotte, kȧ'lot, *n.* a plain skull-cap of satin, &c.; a cap or hood on the heads of certain birds.

Calotype, kal'o-tīp, *n.* a photographic process in which the image is received on paper prepared with iodide of silver. Also called Talbotype, from the name of the inventor.

Caloyer, kal'o-yėr, *n.* a Greek monk of the order of St. Basil.

Calp, kalp, *n.* a dark-coloured soft limestone found in Ireland.

Calpac, kal'pak, *n.* a tall sheep-skin cap worn by Turks and Armenians.

Caltha, kal'thȧ, *n.* a genus of plants, to which the marsh marigold belongs

Caltrop, kal'trop, *n.* an iron instrument with four spikes, placed in ditches, &c., to hinder the advance of troops; a name for various plants with prickly fruit.

Calumba, kȧ-lum'ba, *n.* the root of a plant of Mozambique, used as a medicine and tonic.

Calumet, kal'ū-met, *n.* the tobacco-pipe of the N. American Indians, smoked as a symbol of peace, or to ratify treaties.

Calumniate, kȧ-lum'ni-āt, *v.t.* to accuse falsely and maliciously: *v.i.* to utter calumnies.

Calumniation, kȧ-lum-ni-ā'shun, *n.* the act of calumniating.

Calumnious, kȧ-lum'ni-us, *adj.* slanderous; defamatory.

Calumny, kal'um-ni, *n.*; *pl.* Calumnies; -niz, a false accusation; a slander.

Calvarium, kal-vā'ri-um, *n.*; *pl.* Calvaria, -ȧ, the skull-cap.

Calvary, kal'vȧ-ri, *n.* the place where Christ was crucified; in Roman Catholic countries a representation of the crucifixion erected in the open air.

Calvary-cross, -krôs, *n.* a cross mounted on three steps.

Calve, kȧv, *v.i.* to bring forth a calf; become detached from: said of glaciers when icebergs break off from them.

Calvinism, kal'vin-izm, *n.* the doctrines of John Calvin [1509–64], the French theologian and reformer, especially those relating to predestination and election.

Calvinist, kal'vin-ist, *n.* one who holds the doctrines of Calvin.

Calvinistic, kal-vin-is'tik, *adj.* pertaining to Calvin or his doctrines.

Calx, kalks, *n.*; *pl.* Calxes -ez, or Calces, -ēz, lime or chalk; the residuum of a metal left after calcination.

Calycle, kal'i-kl, *n.* a whorl of small bracts forming a secondary calyx below the true calyx.

Calymene, kȧ-li'mē-nē, *n.* a genus of trilobites characteristic of the Silurian rocks.

Calyptra, kȧ-lip'trȧ, *n.* the hood-like covering of the spore-case of mosses.

Calyptrate, kȧ'lip'trāt, *adj.* furnished with a calyptra or hood.

Calyx, kā'liks, *n.*; *pl.* Calyxes, -ez, Calices, -li-sēz, the whorl of a flower.

Cam, kam, *n.* a projecting part of a wheel or other moving piece of machinery for imparting an eccentric or alternating motion.

Camaieu, kȧ-mā'yōō, *n.* a painting executed in different shades of the same colour; a stone engraved in relief.

Camaraderie, kam-ȧ-rad'rē, *n.* good fellowship; close companionship.

Camber, kam'bėr, *n.* a convexity on an upper surface; a piece of timber thus bent; the concavity or arch of an aeroplane wing; fore and aft curvature; a small dock for unloading timber: *v.t.* to curve or bend; arch.

Camber-window, -win'dō, *n.* a window arched at the top.

Cambist, kam'bist, *n.* one who deals in notes or bills of exchange; a money-changer.

Cambium, kam'bi-um, *n.* the formative layer of cellular tissue which lies between the young wood and the bark of exogenous trees.

Cambrasine, kam'brà-zēn, *n.* a fine kind of cambric; batiste.

Cambrian, kam'bri-an, *adj.* pertaining to Wales, or Cambria: *n.* strata underlying the Silurian rocks, now classed with them.

Cambric, kām'brik, *n.* a very fine thin linen: *adj.* pertaining to, or made of, cambric.

Cambric-muslin, -mus'lin, *n.* a fine cotton imitation of cambric.

Came, *pret.* of Come.

Camel, kam'el, *n.* a large ruminant quadruped, of which there are two species, the Arabian C., or dromedary, with a single hump, and the Bactrian C. with two humps; a water-tight structure placed beneath a vessel to raise and float it over a shoal or bar.

Camel's-thorn, -thorn, *n.* a spiny leguminous shrub on which camels feed: it yields a sweet gum, called manna.

Cameleer, kam-e-lēr', *n.* a camel driver.

Camellia, kà-mēl'i-à, *n.* a genus of Asiatic evergreen shrubs, cultivated for their beautiful rose-like flowers and shining foliage.

Capture, kap'tūr, *n.* the act of seizing or taking, as a prisoner or a prize; arrest; the thing taken: *v.t.* to take or seize by force, surprise, or stratagem; make a prisoner or prize of.

Capuchin, kap'ū-shēn or -ōō-shēn, *n.* a Franciscan monk of the mendicant order: so named from the long pointed cowl or capouch worn by the members; a woman's cloak and hood.

Caput, kap'ut, *n.*; *pl.* Capita, -i-tà, the head.

Car, kär, *n.* a wheeled vehicle, esp. one having only two wheels; a carriage running upon rails; the basket suspended beneath a balloon to contain the aëronaut; a chariot of war or state.

Caracal, kar'à-kal, *n.* a species of lynx.

Carak, Carrack, kar'ak, *n.* a large round-built vessel formerly used by the Portuguese and Spaniards in the E. Indian and American trade.

Caracole, kar'à-kōl, *n.* a half turn which a horseman makes, either to the right or left; a spiral staircase. Also Caracol: *v.i.* to move in a caracole; wheel.

Carafe, Caraffe, kà-ràf', *n.* a glass water-bottle for the table.

Caramel, kar'à-mel, *n.* burnt sugar, used for colouring spirits, gravies, soups, &c.; a kind of sweetmeat.

Carapace, kar'à-pās, *n.* the upper shell of the tortoise, turtle, &c.; the upper covering of the Crustacea.

Carat, kar'at, *n.* the weight of 3·17 grains, used for weighing precious stones and pearls; a twenty-fourth part, a term used to express the fineness of gold used in jewellery: thus, gold of 22 carats fine contains 22 parts of pure gold and 2 of alloy (copper or silver). Also Karat.

Caravan, kar'à-van or kar-à-van', *n.* a company of travellers, merchants, or pilgrims, associated together for mutual security, esp. when travelling through deserts or regions infested by robbers; a large covered waggon or carriage for the conveyance of travelling exhibitions or passengers; a van.

Caravaneer, kar-à-van-ēr', *n.* one who leads the camels, &c., of a caravan.

Caravansary, kar-à-van-'sà-ri, *n.*; *pl.* Caravansaries, -riz, in the East, a kind of inn consisting of a large unfurnished building surrounding a spacious court, where caravans rest at night. Also Caravanserai.

Caravel, Carvel, kar'à-vel, kär'vel, *n.* a name given to several kinds of ships, as a small 16th century vessel, used by the Spaniards and Portuguese, with broad bows, narrow high poop, four masts, and lateen sails.

Caraway, kar'à-wā, *n.* a biennial plant with aromatic and pungent seeds, used medicinally and as a condiment.

Carbazotic, kär-bā-zot'ik, *adj.* pertaining to or composed of carbon and nitrogen.

Carbazotic Acid, as'id, *n.* an acid obtained by the action of nitric acid on indigo and other vegetable and animal substances: used in dyeing.

Carbide, kär'bīd, *n.* a compound of carbon with a metal; abbreviation for calcium carbide (made by fusing coal or coke with lime in an electrical furnace), which, with water, produces acetylene gas.

Carbine, kär'bīn, *n.* a short rifle adapted to the use of cavalry. Also Carabine.

Carbineer, kär-bi-nēr', *n.* a soldier armed with a carbine. Also Carabineer.

Carbohydrate, kär-bō-hī'drāt, *n.* one of a group of organic compounds of carbon, hydrogen, and oxygen.

Carbolic, kär-bol'ik, *adj.* pertaining to, or derived from, carbon or coal-tar.

Carbolic Acid, as'id, *n.* an acid obtained from coal-tar by distillation: largely used as an antiseptic in surgery, and as a disinfectant. Also called Phenic Acid.

Carbolise, Carbolize, kär'bol-īz, *v.t.* to treat or impregnate with carbolic acid.

Carbon, kär'bon, *n.* an elementary substance present in all organic compounds, and occurring in nature in two distinct forms, as the diamond and graphite. The action of heat on vegetable and animal tissues produces C. in the form of charcoal, lampblack, coke, &c.: *v.t.* to place carbons in an arc-lamp. Symb. C.

Carbonic-dioxide, -dī'oks-īd, *n.* carbonic acid gas.

Carbon-light, -līt, *n.* a brilliant light produced by passing an electric current through carbon-points.

Carbon-point, -point, *n.* the rod of an arc-lamp, moved forward by clockwork to maintain its position to another opposing rod as it is burned away.

Carbon-process, -prō'ses, *n.* a method of producing positive pictures upon a carbon pigment.

Carbon-telephone, -tel'e-fōn, *n.* an invention of Edison in which compressed carbon is used in the circuit.

Carbonaceous, kär-bō-nā'shus, *adj.* pertaining to, consisting of, or containing, carbon.

Carbonari, kär-bō-nä'ri, *n.pl.* a secret Republican society in Italy and France in the earlier part of the 19th cent.

Carbonate, kär'bon-āt, *n.* a compound of carbonic acid with a base.

Carbonated, kär'bon-ā'ted, *adj.* combined, or impregnated, with carbonic acid.

Carbonic, kär-bon'ik, *adj.* pertaining to, or obtained from, carbon.

Carbonic-acid, -as'id, *n.* (C.-dioxide) a gaseous colourless compound of carbon and oxygen in the proportion of 12 parts of carbon to 32 of oxygen. It is a heavy irrespirable gas, and acts as a narcotic poison.

Carboniferous, kär-bō-nif'ér-us, *adj.* containing or yielding carbon or coal.

Carboniferous System, sis'tem, *n.* strata of the Palæozoic Age from which coal is derived.

Carbonise, Carbonize, kär'bō-nīz, *v.t.* to convert into carbon by combustion, by the action of fire, or an acid.

Carboy, kär'boi, *n.* a large globular bottle of glass, protected by basket-work, used to contain or convey corrosive acids.

Carbuncle, kär'bung-kl, *n.* a beautiful gem of a deep red colour; an inflammatory tumour, boil, or ulcer.

Carbuncular, kär-bung'kū-lér, *adj.* pertaining to, or resembling, a carbuncle; red; inflamed.

Carburet, an old form of Carbide.

Carburetted, kär'bu-ret-ed, *p. adj.* combined with carbon in the manner of a carbide.

Carburetter, kär'bu-ret-ér, *n.* a device, used in motors, for vaporising gasolene or other liquid fuel.

Carburise, Carburize, kär'bū-rīz, *v.t.* to combine with carbon.

Carcase, Carcass, kär'kas, *n.*; *pl.* Carcases, -ez, the dead body of an animal; a corpse; the decaying remains of a bulky thing; the framework or skeleton of a building, ship, &c.; a perforated shell filled with combustibles, used to set fire to buildings, ships, &c.

Carcel-lamp, kär'sel-lamp, *n.* a lamp, the oil in which is raised mechanically; used in lighthouses, and as a table-lamp.

Carcinology, kär-si-nol'o-ji, *n.* that department of zoölogy which treats of the Crustacea, as crabs, shrimps, &c.

Card, kärd, *n.* a printed piece of pasteboard used for various social or business purposes; such a piece printed bearing certain devices or figures, used for playing games; a short business advertisement in a newspaper; the dial of a mariner's compass; an instrument for combing the fibres of wool, flax, or cotton, preparatory to spinning: *v.t.* to comb or open, as wool, flax, &c., with a card.

Card Catalogue, kat'á-log, *n.* a catalogue, each item of which is entered on a separate card.

Card-sharper, -shär'pér, *n.* one who cheats at cards and fleeces those he traps into playing with him.

Cardamine, kär'dá-min, *n.* a genus of herbs, which includes the cuckoo-flower.

Cardamom, kär'dá-mum, *n.* the capsule of several species of plants of the ginger family with its aromatic seeds, used medicinally and as a condiment.

Cardia, kär'di-á, *n.* the heart; the upper or cardiac end of the stomach where the œsophagus or gullet enters it.

Cardiac, kär'di-ak, *adj.* pertaining to the heart; stimulating the heart's action: *n.* a medicine which excites action in the heart through the medium of the stomach, and stimulates the spirits; a cordial; stimulant.

Cardialgia, kär-di-al'ji-á, *n.* heartburn.

Cardigan, kär'di-gan, *n.* a knitted woollen jacket or waistcoat.

Cardinal, kär'di-nal, *adj.* chief; pre-eminent; fundamental.

Cardinal Numbers, num'bérz, *n.pl.* the numbers *one, two, three,* &c., in distinction from *first, second, third,* &c., which are called *ordinal numbers.*

Cardinal Points, pointz, *n.pl.* N., S., E., W.

Cardinal Signs, sīnz, *n.pl.* Aries, Libra, Cancer, and Capricorn.

Cardinal Virtues, ver'tūz, *n.pl.* justice, prudence, temperance, and fortitude.

Cardinal Winds, windz, *n.pl.* winds which blow due N., S., E., and W.

Cardinal, kär'di-nal, *n.* an ecclesiastical prince ranking in dignity next to the Pope; a woman's short cloak with a hood.

Cardinalate, kär'di-nal-āt, *n.* the office, rank, or dignity of a cardinal.

Cardiometry, kär-di-om'ē-tri, *n.* the process of ascertaining the dimensions of the heart by auscultation.

Carditis, kär-dī'tis, *n.* inflammation of the muscular tissue of the heart.

Cardol, kär'dol, *n.* an oily liquid extracted from the pericarp of the cashew-nut, and used for blistering.

Cardoon, kär-dōōn', *n.* a plant related to and resembling the artichoke, and used as a vegetable in Spain and France.

Care, kār, *n.* concern; solicitude; anxiety; a burdensome responsibility; caution; charge or oversight; attention, watchfulness; an object of watchful attention and regard: *v.i.* to be anxious or solicitous; be concerned, troubled, or interested.

Careen, kȧ-rēn', *v.t.* to bring (a ship) on one side for the purpose of calking, cleansing, or repairing; *v.i.* to incline on one side, as a ship under press of sail.

Career, kȧ-rēr', *n.* a run at full speed; general course of action; an occupation or calling: *v.i.* to move or run rapidly.

Careful, kār'fuł, *adj.* full of care; anxious; attentive; watchful; cautious; provident; thoughtful.

Carefully, -li, *adv.* in a careful manner.

Carême, kā-rām', *n.* the forty days fasting of Lent.

Caress, kȧ-res', *n.* any act or expression of affection; an embrace: *v.t.* to treat with tokens of affection; bestow caresses upon.

Caret, kā'ret or kar'et, *n.* a mark (^) used in writing, or in correcting proofs, to indicate the place where something is omitted or is to be added.

Cargo, kär'gō, *n.*; *pl.* Cargoes & os, -gōz, the lading or freight of a ship.

Carib, **Caribbee,** kar'ib, —i-bē, *n.* a native of the Caribbee Is., or one of a tribe inhabiting certain regions of Central America and the north of S. America.

Caribou, **Cariboo,** kar'i-bōō, *n.* the N. American reindeer.

Caricature, kar'i-kȧ-tūr, *n.* a pictorial or descriptive representation of a person or thing, in which the defects or peculiarities are exaggerated so as to produce a ludicrous effect; parody: *v.t.* to represent in a ridiculous or exaggerated style; parody; burlesque.

Caricaturist, kar-'i-kȧ-tūr-ist, *n.* one who represents others in caricature.

Caries, kā'ri-ēz, *n.* decay of bones, teeth, or vegetable tissue.

Carillon, kar'i-lon, *n.* a chime of bells diatonically tuned and played by hand or machinery; a simple air adapted for playing on a set of bells.

Carina, kȧ-rī'nȧ, *n.*; *pl.* Carinæ, -nē, a keel; the two lower petals of a papilionaceous flower (as the furze) partially joined; the keel of the breast-bone of birds.

Carinate, kar'i-nāt, *adj.* shaped like a keel.

Cariole, kar'i-ōl, *n.* a small open carriage; a light covered cart.

Cariosity, kā-ri-os'i-ti, *n.* the state of being carious.

Carious, kā-ri-us, *adj.* affected with caries.

Cark, kärk, *v.i.* to be anxious or concerned: *v.t.* to vex; load with care or grief.

Carl, **Carle,** kärl, *n.* a strong, sturdy, fellow; a rustic; a churl.

Carline, kär'lin, *n.* a ship's timber running fore and aft from one transverse deck-beam to another, serving as a foundation for the planks of the deck.

Carlock, kär'lok, *n.* a kind of isinglass made of the sturgeon's bladder, and used in clarifying wine.

Carlovingian, kär-lō-vin'ji-an, *adj.* pertaining to, or descended from, Charlemagne, the founder of the dynasty.

Carlylian, kär-lī'li-an, *adj.* relating to, or resembling, the style or opinions of Thomas Carlyle [1795–1881], the author. Also Carlylean, Carlyleian.

Carmagnole, kär-mȧ-nyōl', *n.* a popular song and dance of the time of the first French Revolution; a costume adapted by the revolutionists; a bombastic report from the French armies during the Revolution.

Carmelite, kär'mel-īt, *n.* a mendicant friar of the order of Our Lady of Mount Carmel (found. 12th cent.); a variety of pear; a kind of woollen cloth: *adj.* of, or belonging to, the order of Carmelites.

Carminative, kär-min'ȧ-tiv, *n.* a medicine which expels wind and relieves colic and flatulence: *adj.* expelling wind.

Carmine, kär'mīn or -min, *n.* the essential colouring principle of cochineal; a rich crimson pigment.

Carnage, kär'nāj, *n.* slaughter; great destruction of life by violence; massacre.

Carnal, kär'nal, *adj.* pertaining to the body, its passions and its appetites; animal; fleshy; sensual; impure; not spiritual, but essentially human; secular.

Carnal Knowledge, nol'ej, *n.* sexual intercourse: usually illicit.

Carnally, -li, *adv.* in an animal or fleshy manner.

Carnalism, **Carnality,** kär'nal-izm, kär-nal'i-ti, *n.* the state of being carnal; sensuality.

Carnalist, kär'nal-ist, *n.* a sensualist.

Carnation, kär-nā'shun, *n.* a light rose-pink; flesh colour; the parts of a picture in which flesh is represented; a pink.

Carnationed, kär-nā'shund, *adj.* having a pink colour like that of flesh.

Carney, kär'ni, *n.* a disease of horses, in which the furred condition of the mouth prevents eating.

Carnification, kär-ni-fi-kā'shun, *n.* tissue so altered as to resemble flesh.

Carnival, kär'ni-val, *n.* the season of rejoicing before Lent: observed in Rom. Cath. countries; feasting or revelry.

Carnivora, kär-niv'ō-rà, *n.pl.* flesh-feeding animals; an order of mammals which includes the lion, tiger, bear, wolf, &c.

Carnivore, kär'ni-vōr, *n.* a carnivorous animal.

Carnivorous, kär-niv'ō-rus, *adj.* eating or feeding on flesh.

Carnose, kär'nōs, **Carnous**, —'nus, *adj.* pertaining to flesh; fleshy.

Carob, kär'ob, *n.* an evergreen tree which yields a nutritious pod known as St. John's-bread.

Carol, kar'ul, *n.* a song of joy or praise, esp. one in honour of the Nativity: *v.i.*, *pret.* & *p.p.* -ed & carolled, *p.pr.* -ing & carolling, to sing in joy; warble: *v.t.* to praise or celebrate in song.

Caroline, kar'ō-lin, *adj.* belonging to the period of Charles I.

Carolinian, kar-ō-lin'i-an, *adj.* of or pertaining to either N. or S. Carolina, U.S.

Carolus, kar'ō-lus, *n.* a gold coin struck in the reign of Charles I., and worth 20s., subsequently 23s.

Carotic, kà-rot'ik, *adj.* pertaining to, or of the nature of, stupor; also, same as Carotid.

Carotid, kà-rot'id, *n.* one of the two principal arteries, one on either side of the neck, which convey the blood from the aorta to the head; *adj.* pertaining to the two great arteries of the neck.

Carouse, kà-rous', *n.* a feast or festival; a noisy drinking bout or revel. Also Carousal: *v.i.* to drink heartily and with jollity.

Carp, kärp, *v.i.* to cavil or find fault.

Carp, kärp, *n.* a fresh-water fish.

Carpal, kär'pal, *adj.* pertaining to the carpus or wrist.

Carpel, kär'pel, *n.* a simple pistil, or one of the parts of a compound pistil or ovary of a flower.

Carpellary, kär'pel-là-ri, *adj*, pertaining to a carpel or carpels.

Carpenter, kär'pen-tèr, *n.* an artificer who works in timber and prepares the woodwork of houses, ships, &c.: *v.i.* to perform carpenter's work.

Carpentry, kär'pen-tri, *n.* the art of cutting, framing, and joining timber; work done by a carpenter.

Cartage, kärt'āj, *n.* the charge made for conveyance by a cart; the act of carting.

Carte, kärt, *n.* a bill of fare.

Carte Blanche, kärt blängsh, a blank paper; a signed sheet of paper given to another to be filled up as he pleases: hence, unconditional terms or authority.

Carte-de-visite, kärt'-dė-vi-zēt, *pl.* Cartes-de-visite, a photograph of a person mounted on a card of a size formerly used as a visiting card.

Carte, kärt, *n.* in fencing, a position in thrusting or parrying.

Cartel, kär'tel, *n.* an agreement between hostile states regarding the exchange of prisoners; a challenge to single combat.

Cartesian, kär-tē'zi-an, *adj.* pertaining to the French philosopher René Descartes [1596-1650], or his philosophy.

Cartesian Devil, dev'il, *n.* a scientific toy used to demonstrate the principle of specific gravity.

Carthaginian, kär-thâ-jin'i-an, *adj.* pertaining to ancient Carthage, a city of N. Africa.

Carthusian, kär-thū'zi-an, *n.* one of an order of monks founded (1086) by St. Bruno in the Grande Chartreuse, France; a scholar of the Charterhouse.

Cartilage, kär'ti-lāj, *n.* elastic animal tissue, forming bone; gristle.

Cartilaginous, kär-ti-laj'i-nus, *adj.* pertaining to, or in the form of, cartilage; gristly.

Cartographer, Cartography, &c. See Chartographer, &c.

Carton, kär'tong, a kind of thin pasteboard; a white disc within the bull's-eye of a target; a shot which hits such a disc.

Cartonnage, kär'tong-āj, *n.* pasteboard used for binding books; the boards of which mummy cases are constructed.

Carton-pierre, kär-tong-piär', *n.* papier-maché in imitation of stone or bronze.

Cartoon, kär-tōōn', *n.* a study or design executed on strong paper, and of the size to be reproduced in fresco or tapestry; a pictorial sketch dealing with a political or social subject.

Cartouch, kär-tōōsh', *n.* a cartridge; a cartridge-box; an ornament in the form of an unrolled scroll; on Egyptian monuments, &c., an oval figure containing the name or title of a sovereign or deity.

Cartridge, kär'trij, *n.* a case of cardboard, metal, or other material, containing the charge of a firearm.

Cartridge-paper, -pā'pėr, a stout paper used for various artistic purposes.

Caruncle, kar'ung-kl, *n.* a small fleshy excrescence; the comb or wattle of a fowl; an appendage surrounding the hilum of a seed.

Carve, kärv, *v.t.* to form a design; shape by cutting; cut into slices: *v.i.* to exercise the trade of a sculptor or carver; cut up meat.

Caryatic, kär-i-at'ik, *adj.* pertaining to the Caryans, or to caryatids.

Caryatid, kar-i-at'id, *n.* a figure of a woman in long robes, serving to support an entablature.

Caryophyllaceous, kar-i-ō-fi-lā'shus, *adj.* a term applied to flowers having five petals with long claws enclosed in a tubular calyx, as the pink.

Caryopsis, kar-i-op'sis, *n.* a small dry fruit, having the thin pericarp adherent to the seed, as in wheat, &c.

Cascade, kas'kād, *n.* a small waterfall.

Cascalho, kas-kal'yō, *n.* a term used to denote the alluvial deposits in which the Brazilian diamonds are usually found.

Cascara, kas'kà-rà, *n.* a bark canoe.

Cascarilla, kas-ka-ril'a, *n.* the bark of a W. Indian shrub, possessing aromatic and bitter properties; the shrub itself, from

which is obtained a white bitter crystalline substance, Cascarillin.

Case, kās, *n.* a covering or receptacle; a sheath; a box with its contents; a frame or casing; a divided tray for types; 225 sq. ft. of crown glass; the metallic box of a motor; *v.t.* to cover with, or enclose in, a case.

Case, kās, *n.* that which happens or befalls; the matters involved in a question under discussion or investigation; a certain form or instance of disease; a suit or action at law; one of the forms or inflections in the declension of a noun, pronoun, or adjective, which indicates its relation to other words.

Case-harden, kās-härʹdn, *v.t.* to harden the surface of (as iron) by conversion into steel.

Caseic, kāʹsē-ik, *adj.* pertaining to, or derived from cheese.

Casein, kāʹsē-in, *n.* the curd-matter of milk,

Casemate, kāsʹmāt, *n.* a shell-proof vault or battery, having embrasures for cannon; a hollow moulding.

Casement, kāsʹment, *n.* a hinged window-frame made to open outward; a compartment between the mullions of a window.

Caseous, kāʹsē-us, *adj.* cheesy.

Casern, kā-zėrnʹ *n.* a lodging or barrack for soldiers in garrison towns.

Cash, kash, *n.* money; ready money: *v.t.* to turn into, or exchange for, money.

Cash-book, a book in which a register is kept of money received or paid out.

Cash, kash, *n.* the name applied by Europeans to various Eastern coins of low value: the C. of China being = ·07d.

Cashew, kā-shōōʹ *n.* a tree native of tropical America which produces the C.-nut, a kidney-shaped fruit containing an edible kernel from which a caustic oil is obtained.

Cashier, kash-ērʹ, *n.* one who has charge of the money, and superintends the payments and receipts of a bank or trading establishment: *v.t.* to dismiss from service or place of trust; discharge.

Cashmere, kashʹmēr, *n.* a soft woollen fabric for shawls, &c., originally made in Cashmere, from the downy hair of the wild goat of Thibet and the Himalayas; a soft woollen dress fabric made in imitation of real cashmere: *adj.* made of cashmere.

Cashmerette, kash-mē-retʹ, *n.* an imitation cashmere.

Cashmerian, kash-mēʹri-an, *adj.* of or pertaining to Cashmere (Kashmir), a native state of India. Also Kashmerian.

Cash-register, -rejʹis-tėr, *n.* an automatic till, which shows and records the amount placed in it.

Casing, kāsʹing, *n.* the act of covering with or placing in a case; a covering.

Casino, ka-sēʹno, *n.*; *pl.* E. Casinos, -nōz, It. Casini, -nē, a small country house; a public room or building used for social meetings, dancing, gaming, &c.

Cask, kàsk, *n.* a vessel composed of wooden staves, bound by iron hoops, for holding liquors; the quantity contained in a cask.

Casket, kàsʹket, *n.* a small chest or box for jewels, &c.; a costly coffin [U.S.]; *v.t.* to place or preserve in a casket.

Casque, kàsk, *n.* a helmet.

Cassareep, kasʹà-rēp, *n.* a relish made from the root of the bitter cassava.

Cassation, kas-āʹshun, *n.* abrogation.

Cassava, kasʹà-và, *n.* a plant of tropical America and Africa, cultivated for its tuberous roots which yield a nutritious starch, from which cassava-bread and tapioca are made.

Casse-paper, kasʹpā-pėr, *n.* broken or imperfect paper.

Cassia, kashʹià, *n.* a genus of leguminous plants, the leaves of several species of which constitute the drug senna.

Cassia-oil, -oil, *n.* oil extracted from C.-bark and C.-buds. Called also Oil of Cinnamon.

Cassimere, kasʹi-mer, *n.* a thin twilled woollen cloth, used for men's garments. Also Casimire, and Kerseymere.

Cassiterite, kà-sitʹer-īt, *n.* native tin dioxide; the principal ore of tin.

Cassock, kasʹuk, *n.* a long, close-fitting vestment worn by clergymen, choristers, &c.

Cassonade, kas-on-ādʹ, *n.* raw sugar.

Cassowary, kasʹō-wā-ri, *n.*; *pl.* Cassowaries, -riz, a large bird resembling the ostrich, inhabiting Australia and the Papuan Is.

Circulation, sėr-kū-lā'shun, *n.* the act of moving round; passing or transmitting from place to place; the extent to which a thing is circulated; currency of money.

Circulator, sėr'kū-lā-tor, *n.* a circulating decimal.

Circulatory, sėr'kū-lā-tō-ri, *adj.* circulating.

Circum, sėr'kum, a prefix=*around*, forming compounds the meaning of many of which is obvious, as *circum*polar, *around* the pole, &c.

Circumambient, sėr'kum-am'bi-ent, *adj.* inclosing, or being surrounded, on all sides.

Circumbendibus, sėr-kum-ben'di-bus, *n.* a roundabout or indirect way.

Circumcise, sėr'kum-sīz, *v.t.* to cut off the foreskin or prepuce; purify the heart.

Circumcision, sėr'kum-sizh-un, *n.* the act of circumcising; spiritual purification.

Circumference, sėr-kum'fėr-ens, *n.* the line that bounds a circle; a periphery.

Circumferential, sėr-kum'fėr-en'shal, *adj.* pertaining to the circumference.

Circumferentially, -li, *adj.* in a circumferential manner.

Circumflect, sėr-kum-flekt', *v.t.* to bend around.

Circumflection, sėr-kum-flek'shun, *n.* the act of circumflecting; a circular or winding movement. Also Circumflexion.

Circumflex, sėr'kum-fleks, a mark (^ ˆ ~) over a vowel or syllable to denote accent or contraction: *adj.* marked with such an accent; curved or winding: *v.t.* to pronounce or mark with the circumflex.

Circumfuse, sėr-kum-fūz', *v.t.* to pour or spread around.

Circumjacent, sėr-kum'jā'sent, *adj.* lying around; bordering on every side.

Circumlocution, sėr-kum-lō-kū'shun, *n.* a roundabout way of speaking; an indirect mode of statement.

Circumlocutionary, -ā-ri, *adj.* roundabout.

Circumlocutory, sėr-kum-lok'ū-tō-ri, *adj.* expressing few words in many.

Circumnavigable, sėr-kum-nav'i-gā-bl, *adj.* capable of being circumnavigated.

Circumnavigate, sėr-kum-nav'i-gāt, *v.t.* to sail round: usually the globe.

Circumnavigator, sėr-kum-nav'i-gā-tor, *n.* one who circumnavigates.

Circumscribe, sėr-kum-skrīb', *v.t.* to inclose within certain lines or boundaries; restrict.

Circumscriptive, -skrip'tiv, *adj.* limiting.

Circumspect, sėr-kum'spekt, *adj.* cautious; prudent; watchful on all sides.

Circumspection, sėr-kum-spek'shun, *n.* caution; watchfulness on every side; prudence.

Circumstance, sėr'kum-staṅs, *n.* something relative or appendent to a fact; an incident: *pl.* state of affairs: *v.t.* to place in a particular situation [only in p.p.]

Circumstantial, sėr-kum-stan'shal, *n.* something incidental and subordinate to the main subject: *pl.* incidentals: *adj.* accidental; detailed; proving indirectly.

Circumstantially, -li, *adv.* incidentally; not essentially; minutely; exactly.

Circumstantiality, -shi-al'i-ti, *n.* the state of being circumstantial; fullness of detail

Circumstantiate, sėr-kum-stan'shi-āt, *v.t.* to verify in every particular.

Circumvallation, sėr-kum-val-ā'shun, *n.* the art of throwing up walls or fortifications.

Circumvent, sėr-kum-vent', *n.* to gain an advantage over by stratagem or deception.

Circumvention, -ven'shun, *n.* the act of circumventing; a stratagem.

Circumventive, -tiv, *adj.* deceiving by artifice.

Circumvolution, sėr-kum-vō-lū'shun, *n.* the act of rolling round; the state of being rolled round.

Circus, sėr'kus, *n.*; *pl.* Circuses, -ez, a large level oblong space for feats of horsemanship, &c., with seats for the spectators arranged in tiers; a semi-circular space.

Cirrigrade, sir'i-grād, *adj.* moving by means of tendril-like appendages, or cirri.

Cirriped, sir'i-ped, *adj.* having feet resembling cirri; pertaining to the Cirripedia, a subclass of parasitic crustaceans, as the barnacles and acorn-shells.

Cirro-cumulus, sir-ō-kū'mū-lus, *n.* a cloud broken up into small fleecy masses.

Cirrose, sir'ōz, *adj.* terminating in a curl, tuft, or tendril. Also Cirrous.

Cirro-stratus, sir-ō-strā'tus, *n.* a horizontal or slightly inclined light fleecy cloud.

Cirrus, sir'us, *n.*; *pl.* Cirri, -ī, a tendril; a soft tactile appendage of the mantle of certain of the Mollusca; a tuft of curly plumes or hairs; a barbel.

Cisalpine, sis-al'pīn, *adj.* this side of the Alps with regard to Rome; S. of the Alps.

Cisatlantic, sis-at-lan'tik, *adj.* on this side of the Atlantic Ocean.

Cisco, sis'kō, *n.* the Canadian lake herring.

Ciseleur, sēz'lėr, *n.* an artist in bronze and ormolu metal-work.

Cisleithan, sis-lī'than, *adj.* on the Austrian side of the river Leitha.

Cislura, sēz'lūr, *n.* the art or operation of chasing; chased metal-work.

Cismontane, sis-mon'tān, *adj.* on this (northern) side of the Alps.

Cispodane, sis-pō'dān, *adj.* on this (south) side of the river Po, with regard to Rome.

Cissing, sis'ing, *n.* a process for preparing a surface prior to graining it.

Cist, sist, *n.* a pre-historic stone tomb consisting of two rows of stone, and covered with a flat stone slab; a box or chest.

Cistercian, sis-tėr'shan, *n.* one of a Benedictine order of monks, founded 1098 at Citeaux, France: *adj.* pertaining to the Cistercians.

Cistern, sis'tėrn, *n.* a rectangular receptacle for storing water; a reservoir.

Citable, sī'tà-bl, *adj.* capable of being cited.

Citadel, sit'à-del, *n.* a fortress, a castle.

Citation, sī-tā'shun, *n.* an official summons to appear before a court, esp. an ecclesiastical court; a quotation.

Citatory, sī'tā-tō-ri, *adj.* having the form or nature of a citation; citing.

Cite, sīt, *v.t.* to summon officially to appear in court; quote.

Cithara, sith'à-rà, *n.* an ancient lyre.

Citizen, sit'i-zen, *n.* a native or inhabitant of a town or city; a freeman; a member of a state or nation who enjoys political rights and privileges; a tradesman.

Citrate, sit'rāt, *n.* a salt of citric acid.

Citreus, sit'ri-us, *adj.* of a lemon colour.

Citric Acid, sit'rik as'id, *n.* an acid found in the lemon and orange.

Citrine, sit'rin, *adj.* lemon-coloured.

Citron, sit'run, *n.* a tree with a fruit like the lemon.

City, sit'i, *n.*; *pl.* Cities, -iz, a large and important town with a corporation, which is, or has been, the seat of a bishopric; a corporate town [U.S.].

Diacritical Mark, märk, *n.* a mark employed to distinguish letters or sounds which resemble each other, and to indicate their true pronunciation, as ä, ō.

Diadelphia, -del'fi-à, *n.pl.* a class of plants in the Linnean system, including plants which have the stamens in two bundles.

Diadem, 'à-dem, *n.* a crown; tiara.

Diæresis, same as Dieresis.

Diaglyphic, -glif'ik, *adj.* pert. to, or like, an intaglio; sunk into the general surface.

Diagnose, -ag-nōs', *v.t.* to ascertain a disease by its general symptoms.

Diagnosis, -nō'sis, *n.*; *pl.* Diagnoses, -sēz, scientific discrimination; the recognition of a disease by its symptoms.

Diagnostic, -nos'tik, *adj.* characteristic: *n.* a symptom distinguishing a disease.

Diagometer, -gom'e-tèr, *n.* a kind of electroscope for measuring and determining relative conductivity.

Diagonal, -ag'ō-nal, *adj.* extending from one angle to another : *n.* a straight line dividing a rectangular figure into equal parts.

Diagonally, -li, *adv.* in a D. manner.

Diagonal Scale, skāl, *n.* a scale upon a flat ruler, consisting of parallel lines with other lines crossing them obliquely, thus permitting minute measurements to be made.

Diagram, 'a-gram, *n.* a geometrical figure ; a mechanical plan ; an outline, drawing, or figure.

Diagrammatic, -at'ik, *adj.* pert. to, or illustrated by, a diagram.

Diagrammatically, -al-li, *adv.* by a D.

Diagraph, 'a-grâf, *n.* an instrument for drawing figures or objects mechanically.

Diaheliotropism, -hē-li-ot'rō-pizm, *n.* the tendency of a plant or plant-organ to move in a transverse direction to the light.

Dial, dī'al, *n.* an instrument for showing the time by the sun's shadow ; the face of a timepiece ; any plate on which an index finger marks revolutions, pressure, &c. ; an insulated fixed wheel used in telegraphy : *v.t., pret.* & *p.p.* -ed dialled, *p.pr.* -ing, dialling, to measure or indicate by a dial ; survey with a miner's compass.

Dialect, 'a-lekt, *n.* the peculiar manner in which a language is spoken in a province or district of a country ; idiom ; a subdivision of a language.

Dialectic, 'ik, *adj.* pert. to a dialect, or to logic. Also Dialectical.

Dialectics, 'iks, *n.pl.* the art of reasoning.

Dialectician, -tish'an, *n.* a logician.

Dialectology, -tol'ō-ji, *n.* that branch of philology which treats of dialects.

Dialing, Dialling, 'al-ing, { *n.* the art of constructing dials.

Dialogue, 'a-log, *n* a conversation between two or more persons ; a literary composition in which persons are represented as reasoning on, or discussing, a subject.

Dialysis, -al'i-sis, *n.* the breaking up, or division, of one syllable into two ; in Latin grammar, the change of *j* and *v* into *i* and *u* ; the separation of different substances in solution by diffusion through a moist membrane or septum.

Diamagnetism, -mag'net-izm. *n.* the property possessed by certain bodies when under the influence of magnetism, and freely suspended, of taking a position at right angles to the magnetic meridian.

Diameter, dī-am'e-tėr, *n.* the length of a line passing through the centre of any object from one side to the other ; the distance through the lower part of the shaft of a column.

Diametrical, -a-met'ri-kal, *adj.* pert to a diameter ; directly adverse or opposite.

Diametrically, -li, *adv.* in a D. manner.

Diamond, dī'a-mund, *n.* a gem of extreme hardness and refractive power ; a rhomboidal figure ; a playing card with one or more lozenge-shaped figures ; a glass cutter's tool ; the smallest kind of type generally used : *adj.* resembling a diamond.

Diamond-drill, -dril, *n.* a rod or tube furnished at the end with diamonds for boring very hard rock.

Diamantiferous, dī-a-man'tif-ėr-us, *adj.* yielding diamonds.

Diandria, dī-an'dri-a, *n.pl.* in the Linnean system the second class of plants, including genera with two stamens.

Dianthus, -an'thus, *n.* a large genus of ornamental plants, including the pinks.

Diapason, -a-pā'zon, *n.* the entire compass of a voice or instrument ; a recognised musical standard of pitch ; the foundation stops of an organ.

Diaper, 'a-pėr, *n.* linen cloth woven in geometric patterns ; a napkin ; surface decoration of one or more simple figures repeated : *v.t.* to variegate or embroider ; work in diaper.

Diaphane, -af'a-nē, *n.* the art of imitating stained glass by transparencies on plain glass.

Diaphanometer, -a-fā-nom'e-tėr, *n.* an instrument for measuring the transparency of the air.

Diaphanoscope, -fan'ō-skōp, *n.* a dark box or room for viewing positive photographs with or without a lens.

Diaphanotype, 'ō-tīp, *n.* a coloured picture produced by superimposing a translucent coloured print exactly over a printed duplicate.

Diaphanous, -af'a-nus, *adj.* transparent.

Diaphantograph, -fan-tō'grâf, *n.* an instrument for drawing objects from their reflection on a sheet of glass.

Diaphonic, same as Diacoustic.

Diaphoretic, -fō-ret'ik, *adj.* producing perspiration : *n.* a sudorific medicine.

Diaphragm, 'a-fram, *n.* the midriff, which divides the chest from the abdomen ; any substance that intercepts or divides.

Diaphylactic, -fi-lak'tik, *n.* a preventive against disease.

Diarist, -a-rist, *n.* one who keeps a diary.

Diarrhœa, dī-a-rē'a, *n.* a morbidly persistent purging or looseness of the bowels.

Diary, 'a-ri, *n.* ; *pl.* Diaries, -riz, a register of daily occurrences or duties ; a book for daily memoranda.

Electrically, -al-i, *adv.* by electricity.

Electrician, -trish'un, *n.* one who is skilled in the science of electricity; the maker or vendor of electrical appliances.

Electricity, -tris'i-ti, *n.* an imponderable and invisible agent producing light, heat, chemical decomposition, and other physical phenomena; the science of the laws and phenomena which characterise electricity.

Electrifiable, 'tri-fi-a-bl, *adj.* capable of receiving, being charged with, or transmitting, electricity.

Electrification, -fi-kā'shun, *n.* the act of electrifying; the state of being electrified.

Electrify, 'tri'fī, *v.t.*, *prep.* & *p.p.* electrified, *p.pr.* electrifying, to charge with, or act upon, by electricity; pass an electric current through. Also Electrise, -ize.

Electro, a *prefix* denoting electricity as the motive power, or operating agent, used in many words, the meaning of which is self-evident, as *electro*-engrave, *electro*-gild, &c.

Electrocute, 'trō-kūt, *v.t.* to put to death (a criminal) by an electric current: *n.* Electrocution.

Electro-biology, -bī-ol'ō-ji, *n.* mesmerism.

Electro-cautery, kâ'tér-i, *n.* cauterising by a platinum wire heated by electricity.

Electrode, 'trōd, *n.* either of the terminals of an electric current; anode or cathode.

Electro-dynamics, -dī-nam'iks, *n.* that branch of physics which treats of electric currents.

Electro-dynamometer, -nâ-mom'e-tér, *n.* an instrument for measuring the strength of an electric current.

Electrograph, -grâf, *n.* an apparatus used for recording electrical impressions.

Electrography, -trog'râ-fi, *n.* a process of copying fine engravings on copper or steel by means of an electro-copper deposit.

Electrokinectics, -kī-net'iks, *n.* that branch of electrical science which treats of electricity in motion, as distinguished from electrostatics.

Electrolier, -trō-lēr', *n.* an ornamental metal bracket for supporting electric lamps.

Electrolysis, -trol'i-sis, *n.* the decomposition of a chemical compound by electricity into its competent parts.

Electrolyse, Electrolyze, 'trō-līz, *v.t.* to decompose by the direct action of electricity or galvanism.

Electro-magnet, -mag'net, *n.* a coil of soft iron rendered magnetic by the passage of an electric current through it.

Electromagnetics, -mag-net'iks, *n.* the science of electro-magnetism.

Electromassage, -mas-āj', *n.* massage with the application of an electric current.

Electrometallurgy, -met'al-ér-ji, *n.* the art of precipitating certain metals from their solutions, or of separating metals from their ores, &c., by a slow electric current.

Electrometer, -trom'e-tér, *n.* an instrument for measuring the amount of electrical force.

Electromotor, -mō'tŏr, *n.* any arrangement, or apparatus, which produces or excites an electric current; a dynamo.

Electron, 'tron, *n.* an atom corpuscle; the β (Beta) ray of radium; the carrier of negative electricity.

Electronegative, -neg'â-tiv, *adj.* having a tendency to pass to the positive pole in electrolysis.

Electropathy, -trop'â-thi, *n.* the treatment of diseases by electricity.

Electrophone, -fōn. *n.* an instrument for producing resonant sounds by electric currents.

Electrophorus, -trof'ō-rus, *n*, an instrument for generating statical electricity by induction

Electrophotometer, - fō-tom'e-tér, *n.* an instrument for comparing the brightness of various lights with that produced by an electric spark.

Electrophotomicrography, fō-tō-mi-krog'-rà-fi, *n.* photographing by electric light objects magnified by the microscope.

Electrophysiology, -fiz-i-ol'ō-ji, *n.* that branch of electricity which investigates the electric phenomena of living organisms.

Electroplate, 'trō-plāt, *v.t.* to cover with a coating of silver another metal by means of a current of electricity: *n.* an article thus coated.

Electropositive, -poz'i-tiv, *adj.* tending to pass to the negative pole in electrolysis.

Electroscope, -skōp, *n.* an electrometer.

Electrotherapeutics, see Electropathy.

Electrotechnics, -tek'niks, *n.* the science of the processes or methods in which electricity is applied to the industrial arts.

Electrotinting, -tint'ing, *n.* a method of producing a design, &c., in relief on a metal plate, the lines of which when exposed in an electro-bath are protected by an agent.

Electrotype, 'trō-tīp, *n.* a facsimile in metal of any object made by covering a mould, plate, &c., with a coating of copper by the action of a galvanic electric current: *v.t.* to take a copy by electrical deposition.

Electrum, 'trum, *n.* amber; German silver plate.

Electuary, -lek-tū-à'ri, *n.* a purgative composed of powders and fruit preserves.

Eleemosynary, el-ē-mos'i-nā-ri, *adj.* pert. to alms; devoted to charitable purposes; dependent upon charity: *n.* one who lives on alms.

Elegance, 'e-gans, *n.*; *pl.* Elegances, -gan-siz. the state or quality of being elegant; polish; refinement; symmetry.

Elegant, -gant, *adj.* characterised by refinement and good taste; refined; polished; beautiful in form, colour, or design.

Elegantemente, ā-lā-gän-te-men-te, *adv.* in a graceful or pleasing style [Mus.].

Elegiac, el-ē-ji'ak, or **e-lē'ji-ak,** *adj.* pert. to, or of the nature of, an elegy; plaintive; mournful: *n.* a song expressing sorrow; a funeral song.

Elegit, ē-lē'jit, *n.* a writ of execution under which a creditor can hold a debtor's goods until his claim is satisfied.

Elegy, el'e-ji, *n.*; *pl.* Elegies, -jiz, a funeral song or ode; dirge; requiem.

Element, el'e-ment, *n.* a first or constituent principle; a component or essential part; a substance which cannot be decomposed by any known method; natural environment; ingredient: *pl.* the letters or sounds of the alphabet; the Eucharistic bread and wine.

Elemental, -'àl, *adj.* pert. to, or characteristic of, an element; fundamental. Also Elementary.

Elemi, 'e-mi, *n.* the name of various fragrant resinous gums.

Elephant, 'e-fant, *n.* a large five-toed proboscidian mammal with a flexible trunk and large tusks.

Elephant-beetle, -bēt'l, *n.* a huge W. African beetle.

Elephanter, -fan'tèr, *n.* in the E. Indies the beginning or end of the monsoon.

Elephantiasis, -tī'à-sis, *n.* a cutaneous disease resembling leprosy.

Elephant-grass, -gràs, *n.* an E. Indian plant, the leaves of which are used for matting, baskets, &c.

Elephantidæ, 'ti-dē *n.pl.* a family of the Proboscidea, containing living elephants and fossil mammoths.

Elephantine, 'tin, *adj.* pert. to, or resembling, an elephant; huge; unwieldy.

Elephantoid, 'toid, *adj.* like an elephant.

Eleusinian, -ū-sin'i-an, *adj.* pert. to the festival (Eleusinia) or mysteries held at Eleusis in honour of Demeter and Persephone.

Elevate, el'e-vāt, *v.t.* to raise from a lower to a higher position; ennoble; animate; inspire; raise by training or education; become slightly intoxicated.

Elevation, -vā'shun, *n.* the act of elevating; the state of being elevated; a sketch plan of the front or principal side of a building; the altitude of a heavenly body above the horizon; raising of the land by seismic or other agency; slight intoxication.

Elevator, -tòr, *n.* that which raises up or exalts; a hoisting machine or lift; warehouse for the storage of grain [U.S.]. See also Aviation Glossary.

Elevatory, -tō-ri, *adj.* tending to elevate.

Élève, ā-lāv', *n.* a pupil; student. [Fr.].

Eleven, e-lev'n, *aaj.* 10 with 1 added: a cardinal number: *n.* the sum of 10 + 1.

Eleventh, -lev'nth, *adj.* next in order after 10; an ordinal number; constituting one of 11 parts: *n.* one of 11 equal parts.

Elf, elf, *n.*; *pl.* Elves, elvz, a diminutive mischievous sprite supposed to haunt hills and wild places; a dwarf; fairy.

Elf-arrow, -àr'ō, *n.* a popular name for an arrow-head of flint.

Elf-child, 'chīld, *n* a child believed to have been left by the fairies in the place of one stolen by them; a changeling.

Elfin, 'fin, *n.* an inhabitant of fairyland; a sportive child: *adj.* pert. to elves.

Elf-fire, -fīr, *n.* will-o'-the-wisp.

Elfish, 'fish, *adj.* resembling, or caused by, an elf; mischievous.

Elfkin, 'kin, *n.* a little elf.

Elf-lock, 'lok, *n.* a knot of hair twisted in an intricate manner.

Eliac, ē'li-ak, *adj.* pert. to Elis, an ancient Greek city, or to the famous school of philosophy founded there by Socrates.

Elicit, -lis'it, *v.t.* to draw out.

Elide, -līd', *v.t.* to slur over, or cut off, a final vowel.

Eligibility, el-i-ji-bil'i-ti, *n.* the quality of being eligible.

Eligible, el'i-ji-bl, *adj.* capable of being, or fit to be, chosen; legally qualified.

Eliminate, e-lim'i-nāt, *v.t.* to leave out of consideration, or cast aside.

Eliquate, el'i-kwāt, *v.t.* to separate or melt out, as metal from ore.

Elision, e-lizh'un, *n.* the cutting off of a vowel or syllable for the sake of euphony, as *o'er* for *over*.

Élite, ā-lēt', *n.* the choicest part, as of society, a profession, an army, &c.

Elivagar, e-liv'ä-gär, *n.pl.* the cold and poisonous rivers which flow from Niflheim.

Elixir, -liks'ser, *n.* an imaginary liquid of the alchemists supposed to be capable of prolonging life indefinitely, and of changing baser metals into gold; a tincture, essence, or cordial.

Elizabethan, -liz-ä-beth'an, *adj.* pert. to Queen Elizabeth and her times.

Elk, elk, *n.* a very large deer of N. Amer. and N. Europe; the moose-deer.

Elkwood, 'wood, *n.* the wood of the umbrella-tree.

Ell, el, *n.* a measure (1¼ yds.) formerly used for cloth, varying in different countries, and taken from the length of a man's arm.

Ellbone, 'bōn, *n.* the ulna.

Elleborin, -leb'ō-rin, *n.* a species of resin.

Ellipse, el-, or e-lips', *n.* one of the sections of a cone; the elliptical orbit of a planet.

Ellipsis, 'is, *n.* the omission of a word or words in a sentence, the sense of which is obvious.

Ellipsoid, 'oid, *n.* an elliptical spheroid.

Elliptic, -lip'tik, *adj.* pert. to, or formed like, an ellipse; having a part omitted. Also Elliptical.

Elliptically, -al-li, *adv.* in an E. manner.

Ellipticity, -lip-tis'i-ti, *n.* the quality of being elliptic; the extent of any divergence of any ellipse from the circle.

Elm, elm, *n.* a tree of various species belonging to the genus Ulmus.

Elocution, el-ō-kū'shun, *n.* the art, manner, or style of speaking in public; delivery.

Elocutionary, -ā-ri, *adj.* pert. to E.

Elocutionist, -ist, *n.* one skilled in, or a teacher of, the art of elocution.

Elod, el'od, *n.* the odic force of electricity.

Éloge, ā-lōzh', *n.* a funeral oration, esp. one pronounced on the death of a member of the French Academy.

Elohim, el'ō-him, *n.* one of the names of God in the O. Test.; deities in general.

Elohist, -ist, *n.* the title of the supposed writers or writers of the Elohistic passages of the Hexateuch.

Elohistic, -his'tik, *adj.* pert. to those passages in the Hexateuch where God is called in the Hebrew text Elohim, not Yahveh.

Elongate, e-long'gāt, *v.t.* to stretch out; extend; lengthen.

Elongation, -gā'shun, *n.* extension.

Elope, e-lōp', *v.t.* to escape privately; run away with a lover or paramour.

Elopement, 'ment, *n.* running away.

Eloquence, el'ō-kwens, *n.* the art of speaking with fluency and elegance.

Eloquent, 'kwent, *adj.* having the power of fluent and elegant oratory.

Else, els, *adv.* besides; otherwise.

Elsewhere, 'hwār, *adv.* in another place.

Elucidate, e-lūs'i-dāt, *v.t.* to make clear; render intelligible; illustrate.

Elucidator, -i-dā-tor, *n.* one who elucidates; an expositor.

Elude, e-lūd', *v.t.* to avoid by artifice or dexterity; shun; escape.

Elusion, -lū'zhun, *n.* evasion; artifice.

Elusive, 'siv, *adj.* deceptive; fallacious.

Elusory, 'sō-ri, *adj.* evasive; deceptive.

Elvan, 'van, *adj.* pert. to elves.

Elver, 'vèr, *n.* a young conger.

Elves, *pl.* of Elf.

Elysian, -liz'i-an, *adj.* pert. to Elysium: yielding the highest enjoyment.

Elysium, 'i-um, *n.* the Greek Paradise or residence of the blessed after death; a condition of perfect happiness.

Elytrum, 'i-trum, *n.*; *pl.* Elytra, -trā, one of the thickened forewings or bony sheath of a beetle. Also Elytron.

Elzevir, 'ze-vir, *adj.* pert. to the Elzivirs, Dutch printers of Amsterdam and Leyden, famous for their editions of the classics.

Em, em, *n.* the square body of any size of type, serving as a unit of measurement.

Emaciate, e-mā'shi-āt, *v.i.* to lose flesh gradually; pine away: *v.t.* to make thin.

Emanate, em'ā-nāt, *v.i.* to flow out, issue, or proceed, as from a source.

Emancipate, e-man'si-pāt, *v.t.* to liberate from servitude or bondage; set free; enfranchise.

Emancipator, -pā-tòr, *n.* a liberator.

Emarginate, -mar'gin-āt, *adj.* indented at the edges; having the apex notched.

Emasculate, -mas'kū-lāt, *v.t.* to castrate; deprive of virility; weaken by expurgation: *adj.* castrated; deprived of vigour.

Emasculator, -lā-tòr, *n.* one who emasculates in any sense.

Embalm, em-bäm', *v.t.* to preserve from decay by balsams or aromatic spices; keep from putrefaction by antiseptics.

Embank, -bangk', *v.t.* to throw up a bank; defend or protect by a bank.

Embankment, 'ment, *n.* a bank of earth, stones, &c., for protection or defence.

Embargo, -bär'gō, *n.*; *pl.* Embargoes, -gōz, an order by authority prohibiting the departure of vessels for a port.

Embark, 'bärk, *v.t.* to put on board ship; venture or invest: *v.i.* to go on board a vessel; engage in any affairs.

Embarrass, -bar'ás, *v.t.* to hinder; perplex; involve in pecuniary difficulties; distress.

Embarrassment, -ment. *n.* confusion of mind; pecuniary difficulties.

Embassy, 'bà-si, *n.*; *pl.* Embassies, -iz, the public function, mission, or official residence of an ambassador; a legation.

Embattled, 'bat'ld, *p.adj.* furnished with battlements; drawn up in battle array.

Embed, 'bed, *v.t.* to lay in, or as in, a bed; set in surrounding matter.

Embellish, -bel'ish, *v.t.* to make beautiful; set off by ornamentation.

Ember, 'bèr, *n.* a small live coal or inextinguished smouldering ashes.

Ember Days, -dāz, *n.pl.* days set apart in the Church Calendar for fasting and prayer, during which ordinations are held by the bishop. They are the Wed., Fri., and Sat. next following the first Sun. in Lent, Whit Sunday, Holy Cross Day (Sept. 14) and St. Lucia (Dec. 13).

Ember-goose, -gōōs, *n.* the loon.

Embezzle, -bez'l, *v.t.* to appropriate fraudulently property entrusted to one's care.

Embitter, -bit'èr, *v.t.* to make bitter, or more bitter; exasperate. Also Imbitter.

Embla, 'blä, *n.* in Norse mythology, the first woman, who was formed from a tree.

Emblazon, -blā'zn, *v.t.* to adorn with heraldic figures; blazon; decorate; celebrate the praises of.

Emblazonry, -ri, *n.*; *pl.* Emblazonries, -riz, heraldic decoration.

Emblem, 'blem, *n.* a symbolical figure or design; a visible sign of an idea.

Emblemata, -blē'mà tà, *n.pl.* detachable figures, with which the ancients ornamented gold, silver, or other metallic vessels.

Emblematic, -blem-at'ik, *adj.* pert. to an emblem; symbolical. Also Emblematical.

Emblematically, -ál-li, *adv.* in an emblematical manner.

Emblements, -'ble-ments, *n.pl.* annual crops produced by the labour of the cultivator.

Embodier, -bod'i-èr, *n.* one who embodies.

Embodiment, 'i-ment, *n.* the act of embodying or uniting in a whole.

Embody, -bod'i, *v.t.*, *pret.* & *p.p.* embodied, *p.pr.* embodying, to collect into one mass or united whole; invest with, or as with, a material body: *v.i.* to coalesce.

Emboitment, äng-bwät'mäng, *n.* the theory that all successive generations are included in the first original germ; a closing up of a rank, as of soldiers in the front rank; the articulation of one bone into another.

Embolden, em-bold'en, *v.t.* to encourage.

Embolism, 'bō-lizm *n.* an intercalation; the insertion of days, months, or years into the calendar to produce regularity of time; the presence of obstructing clots in the blood vessels.

Embolus, -bō'lus, *n.*; *pl.* Emboli, -lī, something inserted and acting in another thing, as a piston-rod.

Embonpoint, äng-bong-pwäng', *n.* plumpness of figure, esp. of the bust.

Embosom, em-booz'um, *v.t.* to hold in the bosom; inclose in the midst; shelter.

Emboss, 'bos, *v.t.* to cover with bosses or studs; raise in relief from the surface.

Embossing, 'ing, *n.* the art of producing raised or projecting figures or designs in relief on surfaces

Embouchure, äng-bōō-shūr', *n.* the mouth of a river, a cannon, &c.; the mouthpiece of a musical wind instrument.

Embowel, em-bou'el, *v.t.*, *pret.* & *p.p.* embowelled, *p.pr.* embowelling, to remove the intestines from; disembowel.

Embower, -bou'èr, *v.t.* to cover with, or as with, a bower: *v.i.* to rest, as in a bower; shelter or inclose.

Embrace, -brās', *v.t.* to take in close or press to the bosom with affection; hug; cling to; receive with willingness: *v.i.* to join in an embrace; attempt to influence by threats or bribes: *n.* the act of embracing; a clasping in the arms; a hug.

Embracery, -brā'sèr-i, *n.* the act of attempting to corrupt or influence a jury.

Embrasure, 'zhūr, *n.* an opening in a wall or parapet from which to fire guns; a window or door having its sides slanted on the inside.

Embrocate, 'brō-kāt, *v.t.* to moisten and rub a diseased or injured part with a lotion.

Embrocation, -kā'shun, *n.* a liniment for applying to, or rubbing, an injured part of the body.

Embroider, -broid'ėr, *v.t.* to decorate with needlework; embellish with additions.

Embroidery, -i, *n.*; *pl.* Embroideries, -iz, ornamental work of gold, silver, silk, &c., executed with the needle; embellishment.

Embroil, 'broil, *v.t.* to throw into confusion; involve in contention; mix up; entangle.

Embryo, -bri'ō, *n.*; *pl.* Embryos, -ōz, the first germ or rudiment of an organism; the first or undeveloped state of anything.

Embryogeny, -oj'e-ni, *n.* the development of the embryo in the ovule.

Embryologist, -ol'ō-jist, *n.* one who studies, or is skilled in, embryology.

Embryology, 'ō-ji, *n.* that branch of biology which treats of the development of embryos.

Embryonic, -on'ik, *adj.* pert. to, or resembling, an embryo; rudimentary.

Embryoplastic, -plas'tik, *adj.* pert. to the formation and development of an embryo.

Embryoscope, 'skōp, *n.* an instrument for the observation of the development of embryos.

Embryotomy, -ot'ō-mi, *n.* the extraction of an embryo or fœtus by cutting.

Emendation, e-men-dā'shun, *n.* the alteration or correction of a text, so as to give an improved reading.

Emendator, 'tor, *n.* one who corrects or improves the text of a work.

Emerald, em'e-rald, *n.* a precious stone of a rich, deep green colour: a variety of beryl; a size of type: *adj.* of a colour like the E.

Emerald Isle, īl, *n.* Ireland.

Emeraldine, -din, *n.* a dye of a dark green colour.

Emerge, e-merj', *v.i.* to rise up, or come forth, from anything which conceals; become apparent.

Emergency, -mėr'jen-si, *n.*; *pl.* Emergencies, -siz, a sudden occasion; pressing necessity; strait; crisis: *adj.* pert. to, or used in, an emergency.

Emergency Man, man, *n.* a person engaged for special service, as for the assistance of boycotted tenants in Ireland.

Emeritus, -mėr'i-tus, *adj.* retired from service with honour: said of a university or college professor.

Emerods, Emeroids, em'ėr-odz, -oidz, *n.pl.* an archaic form of Hemorrhoids.

Emersed, e-merst', *adj.* standing about and out of water.

Emersion, -mėr'shun, *n.* the act of emerging; the reappearance of a heavenly body after an eclipse.

Emersonian, em-ėr-sō'ni-an, *adj.* pert. to, or resembling, Ralph Waldo Emerson, the American poet and philosopher.

Emery, 'ėr-i, *n.* a very hard variety of corrundum: used when powdered for grinding or polishing.

Emetic, e-met'ik, *adj.* inducing vomiting: *n.* a medicine possessing emetic properties.

Emetically -al-li, *adv.* acting as an E.

Émeute, ā-mūt', *n.* a seditious or revolutionary outbreak; riot.

Emigrant, em'i-grant, *n.* one who quits his own country to settle in another: *adj.* moving from one country to another: pert. to, or used by, emigrants.

Emigrate, 'i-grāt, *v.t.* to leave one's country to settle in another.

Émigré, ā-me-grā', *n.* an emigrant (usually a Royalist) from France during the Revolution of 1789.

Eminence, em'i-nens, *n.* that which is lofty; elevation; height; high in rank station, celebrity, or repute; a title given to cardinals.

Eminent, -nent, *adj.* high in office, rank, or reputation: *adj.* distinguished; exalted; conspicuous.

Emir, ē-mir', *n.* a prince: a title of dignity given to a Mohammedan prince or chieftain; notably the Emir of Afghanistan. Also Ameer, Amir.

Emissary, em'i-sa-ri, *n.*; *pl.* Emissaries, -riz, a person, or agent, sent on a mission, esp. of a secret nature.

Emission, e-mish'un, *n.* the act of sending out; that which is issued at the time, as bank notes.

Emissive, -mis'iv, *adj.* sending out.

Emit, -mit', *v.t.*, *pret.* & *p.p.* emitted, *p.pr.* emitting, to send or give forth; issue an order or decree; to print and send into circulation, as bank notes.

Emmet, 'et, *n.* an ant.

Emollient, e-mol'yent, *adj.* softening: *n.* a medicine that has a softening effect on living tissues.

Emolliotype, i-ō-tīp, *n.* a picture taken on opal glass by the collodio-chloride process.

Emolument, 'ū-ment, *n.* profit; remuneration; income; pecuniary gain.

Emotion, -mō'shun, *n.* mental agitation; excited feeling; passion.

Emotional, -al, *adj.* pert. to, or characterised by, emotion.

Emotionality, -al'i-ti, *n.* the quality of being emotional.

Emotive, -mō'tiv, *adj.* producing E.

Empale, same as Impale.

Emperor, em'pėr-or, *n.* the sovereign or supreme ruler of an empire.

Emphasis, 'fa-sis, *n.* a particular stress of the voice on a word or words in reading or speaking; special force of language or thought.

Emphasise, Emphasize, 'fa-sīz, *v.t.* to pronounce with emphasis; bring out clearly and distinctly.

Emphatic, -fat'ik, *adj.* uttered with emphasis; forcibly significant; impressive; earnest. Also Emphatical.

Emphatically, -al-li, *adv.* in an E. manner.

Empire, 'pīr, *n.* supreme power or dominion; imperial rule or sovereignty; the region ruled over by an emperor or sovereign; sway; control.

Empire City, sit'i, *n.* New York.

Empire Day, dā, *n.* the day (May 24th) on which the Imperial unity of the Empire is annually celebrated.

Empiric, -pir'ik, *adj* pert. to, founded upon, or derived from, experience. Empirical.

Empirically, -al-li, *adv.* in an E. manner.

Empiricism, 'i-sizm *n.* observation, or practical experience apart from scientific knowledge; the practice of medicine without the usual medical training or qualification; quackery.

Employ, 'ploi, *v.t.*, *pret.* & *p.p.* employed, *p.pr.* employing, to give occupation to; keep busy; exercise; make use of; apply or devote to an object: *n.* occupation.

Employee, -ē', *n.* one who works for another (Fr. Employé, -ā').

Employment, 'ment, *n.* business.

Emporium, -pō'ri-um, *n.* a commercial centre or place of trade; a large shop.

Empower, -pou'ėr, *v.t.* to authorise; enable.

Empressario, -pres-ä'ri-ō, *n.* a contractor who introduces foreign settlers into Mexico by arrangement with the Government; a musical director, usually Impressario (*g.v.*).

Empress, 'pres *n.* a woman invested with sovereign sway over an empire; the consort, or widow, of an emperor.

Emptiness, emp'ti-nes, *n.* the state of being empty; want of knowledge or sense.

Empty, 'ti, *adj. comp.* emptier, *super.* emptiest, containing nothing; vague; unsatisfactory; destitute of force, knowledge, or sense; fasting; vacant: *v.t.*, *pret.* & *p.p.* emptied, *p.pr.* emptying, to deprive of the contents; pour out; discharge; make vacant: *v.i.* to become empty; discharge itself; vain: *n.pl.* (Empties) an empty vessel, packing case, or sack.

Emptying, -ing, *n.* the act of making empty: *pl.* the lees of beer or cider, used as yeast (pron. *emptins*) [U.S.].

Emptysis, 'ti-sis, *n.* spitting of blood.

Empyrean, em-pir'e-an, *adj.* pert. to the highest and purest region of heaven, or the region of pure fire; ethereal. Also Empyreal.

Emu, ē'mū, *n.* a large Australian ostrich-like bird.

Emulate, em'ū-lāt, *v.t.* to strive to equal or excel; vie with; rival.

Emulator, -lā-tor, *n.* a rival; competitor.

Emulgent, e-mul'jent, *adj.* draining out: applied to the arteries and veins: *n.* an emulgent vessel; a medicine that promotes a flow of bile.

Emulous, em'ū-lus, *adj.* desirous to excel; rivalling; competitive.

Emulsion, e-mul'shun, *n.* any liquid preparation resembling milk; a substance suspended in gelatine or collodion, used in the preparation of dry photographic plates.

Emunctory, -mungk'tō-ri, *adj.* serving to carry off anything excrementitious from the body: *n.* an excretory duct or canal.

Enable, en'ā-bl, *v.t.* to make able; furnish with adequate means or power; empower.

Enact, -akt', *v.t.* to decree; pass into law; act the part of.

Enacting Clause, klâz, *n.* the introductory clause of a bill or act, usually commencing "Be it enacted."

Enactment, 'ment, *n.* the act of enacting; a statute; the passing of a bill into law.

Enactor, 'tor, *n.* one who enacts.

Enamel, -am'el, *n.* an opaque, semi-transparent, or coloured substance, or glass, used in coating the surface of metals or porcelain, and afterwards fired; anything enamelled; any smooth hard coating, esp. the dense white substance of the teeth: *v.t.*, *pret.* & *p.p.* enamelled, *p.pr.* enamelling, to lay on, cover, or decorate with, enamel; adorn with various hues: *v.i.* to practice the art of enamelling.

Enamour, -am'or, *v.t.* to captivate.

En bloc, äng blok', in a lump.

Encamp, -kamp', *v.i.* to form a camp; halt on the march; go into camp or settle in

temporary quarters: *v.t.* to form into a camp.

Encampment, 'ment, *n.* a temporary resting place for an army or company of travellers.
